Schools for the feeble-minded.....	1349
Branches of manual training taught in State schools for feeble-minded.....	1377
Index.....	1381

CHAPTER XXI.

AGRICULTURAL AND MECHANICAL COLLEGES.

[The institutions commonly known as "agricultural and mechanical colleges" are brought together in this chapter and made the subject of special treatment, but in addition to being considered here they are included in the general tables of the different classes of schools in other parts of this Report, the dominating character of each institution determining whether it shall be classed among the universities and colleges or as a technological, or normal, or secondary school; those for colored students appear still a third time, in the tables of colored schools.]

CONTENTS.—General statement—Students—Property—Income—Endowment of August 30, 1890—Summary of legislation in 1905—Changes in courses of study—New buildings—Courses of study offered—Statistics.

GENERAL STATEMENT.

The reports of the presidents of the institutions endowed by the acts of Congress approved July 2, 1862, and August 30, 1890, show continued growth and development along all lines of work. The Iowa College of Agriculture and Mechanic Arts established during the year a course of study in agricultural engineering, the University of Florida courses in civil and electrical engineering, the Kansas Agricultural College in veterinary science, and the Oklahoma Agricultural and Mechanical College in civil engineering. Short courses in agricultural lines were established during the year in Arkansas, Louisiana, and Tennessee.

STUDENTS.

The total number of students in all departments of the institutions endowed by the acts of Congress approved July 2, 1862, and August 30, 1890, was 54,974, an increase of 1,813 over the number for the preceding year. Of the total number enrolled 6,381 were reported by the institutions for colored students. Omitting the latter there were in the college departments of agriculture and mechanic arts 20,835 students, and in short and special courses 5,075 students. The number of students reported in regular four-year technical courses of study of college grade was as follows: Agriculture, 2,357; horticulture, 71; forestry, 45; mechanical engineering, 4,206; civil engineering, 3,528; electrical engineering, 2,843; mining engineering, 970; chemical engineering, 300; sanitary engineering, 31; textile engineering, 68; general engineering, including unclassified engineering students, 829; architecture, 225; household economy, 717. Special and short-course students were as follows: Agriculture, 4,175; horticulture, 173; dairying, 597; mechanic arts, 909; household economy, 536; mining, 20. There were reported 585 students in courses of study in veterinary medicine, 620 in pharmacy, and 16,636 receiving instruction in military drill.

Of the students in institutions for colored people 3,990 were in preparatory departments, 709 in college departments, 56 in short and special courses, and 1,626 in other departments. The number enrolled in industrial courses was as follows: Agriculture, 1,624; carpentry, 689; machine-shop work, 234; blacksmithing, 497; shoemaking, 141;

broommaking, 15; wheelwrighting, 122; bricklaying, 246; painting, 105; printing, 113; harnessmaking, 35; tailoring, 108; plastering, 189; sewing, 2,024; cooking, 774; laundering, 465; nursing, 72; millinery, 174. The number in military drill was 1,566.

PROPERTY.

The total property of all the institutions amounts to \$81,497,445, an increase of nearly seven millions over the amount reported the preceding year. The items comprised in the total are as follows:

Land-grant fund of 1862.....	\$12, 045, 629
Other land-grant funds.....	2, 262, 192
Other permanent funds.....	16, 769, 772
Unsold land grant of 1862.....	4, 168, 746
Farms and grounds.....	6, 820, 333
Buildings.....	28, 192, 386
Apparatus.....	2, 410, 854
Machinery.....	2, 170, 224
Libraries.....	2, 769, 352
Live stock.....	342, 997
Miscellaneous equipment.....	3, 544, 960
Total.....	81, 497, 445

The value of the property reported by the separate institutions for colored students amounts to \$4,007,508, of which sum \$1,828,852 are endowment funds.

INCOME.

The amount of income derived by each institution from each of the several sources is given in Table 7. The total income, excluding the United States appropriation for experiment stations, amounts to \$11,659,955, an increase of \$774,405 over the amount for the preceding year. The total amount derived from each of the several sources is as follows:

From States and Territories:	
From endowment funds granted by States.....	\$91, 688
Appropriations or tax for current expenses.....	3, 464, 737
Appropriations or tax for buildings or other special purposes.....	2, 212, 361
Total State and Territorial aid.....	\$5, 768, 786
From the Federal Government:	
Land grant of 1862.....	721, 494
Other land grants.....	133, 589
Endowment act of August 30, 1890.....	1, 200, 000
Total Federal aid.....	2, 055, 083
From endowments other than Federal or State.....	671, 888
Tuition fees.....	1, 115, 855
Incidental fees.....	373, 317
Miscellaneous.....	1, 675, 026
Total income.....	11, 659, 955
Received from Federal Government for experiment stations.....	681, 000

It is becoming more and more difficult from year to year as the rate of interest on money decreases for the several States to comply with the requirement of the act of Congress approved July 2, 1862, to invest the funds derived from the sale of the lands granted by said act in stocks or bonds yielding not less than 5 per cent per annum.

As stated in previous reports, this difficulty has been met in some cases by the issuance by the States of irredeemable certificates of indebtedness bearing varying rates of interest. In several States provision has been made for meeting out of the State treasury any deficit in the income from the land-grant fund caused by investment in securities bearing interest at a rate less than 5 per centum per annum. To this number has been added the past year the State of Connecticut, which, by an act of May 18, 1905, allows the investment of the land-grant fund in any securities in which savings banks of the State may invest and provides that the interest or income therefrom shall be paid semiannually to the State treasurer. The State treasurer is required to pay quarterly to the Connecticut Agricultural College interest at the rate of 5 per cent per annum on the original principal of the fund out of any money in the treasury not otherwise appropriated.

Endowment of August 30, 1890.—Table 8 gives in summarized form the amounts of the funds received under the act of Congress approved August 30, 1890, that were expended by each institution for instruction, including salaries and facilities, in the several branches of study mentioned in the said act, as shown by the reports of the treasurers of the institutions. The proportion expended from year to year for the several subjects is fairly constant, as shown in the following tabular statement, covering the past three years:

Subjects.	Proportion expended in—		
	1903.	1904.	1905.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
Agriculture.....	16.1	16.8	16.8
Mechanic arts.....	27.9	29.5	29.6
English language.....	12.3	12.3	12.4
Mathematical science.....	12.9	11.8	11.8
Natural and physical science.....	24.7	23.4	23.2
Economic science.....	6.1	6.2	6.2

The reports show that of the total amount expended during the year the sum of \$1,125,239.03, or 93.6 per cent, was for salaries, while the remainder was expended for facilities for instruction. In 28 institutions all expenditures of these funds were for the payment of salaries.

The number of institutions expending during the year certain amounts of the funds received under the act of August 30, 1890, for instruction in the several branches of study mentioned in the act, is as follows:

Amount expended.	Number of institutions expending for instruction in—					
	Agriculture.	Mechanic arts.	English language.	Mathematical science.	Natural and physical science.	Economic science.
Nothing.....	5	3	4	5	3	21
Less than \$1,000.....	7	2	6	10	5	14
\$1,000 to \$2,000.....	15	2	18	12	10	13
\$2,000 to \$3,000.....	14	8	15	18	4	6
\$3,000 to \$4,000.....	7	8	15	13	6	8

SUMMARY OF LEGISLATION, 1905.

The legislation enacted during 1905 includes changes in the governing boards of the institutions in Florida, Michigan, Nevada, New York, and Pennsylvania; a general reorganization of the system of higher education in Florida, including the University

of Florida; provision for an annual tax levy of two-sevenths of a mill on each dollar of the assessed valuation of property in Wisconsin and three-eighths of a mill in Wyoming. California appropriated \$150,000 for a farm and buildings for an agricultural school; Minnesota provides for an agricultural school at Crookston, and New Jersey for short courses in agriculture. Utah provides for a commission to investigate the duplication of work by the agricultural college and the university. Washington changed the name of the agricultural college to State College of Washington. Wisconsin appropriates \$200,000 annually for three years for buildings and equipment. Connecticut provides for the investment of the land-grant fund and requires the State treasurer to pay 5 per cent per annum on the principal of said fund. Generous provision is made in many instances for buildings, maintenance, and experimentation in agricultural subjects. A summary of the legislation in each State in 1905 follows:

University of Arizona.—Prohibits the establishment and maintenance of saloons, gambling houses, and other places inimical to good morals within territory embraced within a radius of 4,000 feet of the center of the university grounds. (Act of March 4, 1905.)

Appropriates \$4,000 for the reconstruction of the pump house and engine house; \$2,000 for the completion of the library and museum buildings; \$1,300 for the planting, development, and care of a date palm orchard; \$1,500 for printing, binding, etc., for the agricultural experiment station; \$4,000 for fire protection; \$3,500 for a modern sanitary sewer system or connection; \$1,500 for fences, entrances, and roadways on the campus; \$700 for repairs and furnishings for dormitories; \$1,500 for a brick barn and seed room. (Act of March 16, 1905.)

University of Arkansas.—Appropriates for two years ending March 31, 1907: Men's dormitory, \$20,000; women's dormitory, \$35,000; maintenance of dormitory, \$2,500; matron, \$1,000; chemistry building, \$8,000; erection and maintenance of infirmary, \$5,000. Maintenance of departments: Electrical engineering, \$5,305; physics, \$2,000; mechanical engineering, \$2,000; biology, \$961.11; ancient languages, \$200; history and political science, \$750; civil engineering, \$2,808; chemistry, \$2,000; mechanics and shops, \$2,000; music, \$3,000; preparatory, \$500; philosophy and pedagogy, \$1,000; military science, \$600; economics, \$400; mathematics, \$200; modern languages, \$300; library, \$1,500; geology, \$750; mining engineering, \$1,000; museum, \$700; physical culture and elocution, \$800; art, \$700; for salaries, \$50,000; insurance, \$2,000; night watchman, \$1,000; fuel, \$5,000; fireman, \$500; student labor, \$5,000; campus, \$400; repairs, \$4,000; janitors, \$2,000; plumbing, \$500; stationery and printing, \$1,500; postage, \$800; trustees' expenses, \$1,200; water, \$1,200; students' annual, \$200; secretary to president, \$960; heating buildings, \$6,900; completion of engineering hall, \$8,000; waterworks, \$3,351; Y. M. C. A., \$1,000; sanitary improvements, \$3,844.60; provides that no salary shall be paid to teachers in the university for the time they are absent, except from sickness and when on lawful business of the university. (Act of May 6, 1905.)

University of California.—Appropriates \$5,000 for printing. (Act of March 11, 1905.)

Appropriates \$5,075 to repay regents for funds expended on forestry station at Santa Monica. (Act of March 7, 1905.)

Appropriates \$20,000 for experimental and research work in the field of viticulture, including both cultural and industrial processes. (Act of March 18, 1905.)

Appropriates \$10,000 for discovering and making known improved methods of cereal culture in the State, the investigation to be made under the supervision of the director of the agricultural experiment station. The control of the funds is vested in the governor of the State. (Act of March 18, 1905.)

Appropriates \$150,000 for the purchase of a farm, the erection thereon of buildings, the purchase of supplies, implements, machines, live stock, etc., as shall be necessary for an agricultural school. The instruction given shall be such as to meet the needs of persons who desire instruction in agriculture, horticulture, viticulture, animal industry, dairying, irrigation, and poultry raising, and to prepare them for the pursuit thereof. Short courses of instruction shall also be arranged for in each of the leading branches of agricultural industry, so regulated as to provide for popular attendance and general instruction in agricultural practice. (Act of March 18, 1905.)

Appropriates \$10,000 for the establishment of a light and power plant at the Lick Observatory. (Act of March 18, 1905.)

Provides for the establishment of a State hygienic laboratory for bacteriological and chemical analyses and appropriates \$2,000 per annum for two years for the equipment of the laboratory and for the payment of salaries. The director of the laboratory

shall be appointed from the existing teaching staff of the university. (Act of March 18, 1905.)

• Appropriates \$6,000 per annum for two years for farmers' institutes to be held under the direction of the regents of the university. (Act of March 18, 1905.)

Appropriates \$15,000 to complete and equip the building known as the president's house. (Act of March 18, 1905.)

Authorizes the exchange of the Santa Monica forestry station for another larger tract of land more advantageously situated. (Act of March 20, 1905.)

Requires the regents to hold at least semiannually examinations to determine the qualifications and fitness of applicants for certification and registration as registered nurses. (Act of March 20, 1905.)

Appropriates for two years \$200,000 for support and maintenance; \$4,000 for maintenance of poultry experiment station; \$12,000 for printing, binding, ruling.

Authorizes the organization of a department of music; creates a professorship of music with a salary of \$3,000 per annum, and appropriates \$3,000 per annum for two years for the purpose. (Act of March 22, 1905.)

Appropriates \$5,000 for the establishment at Lick Observatory of a photographic laboratory in combination with a fireproof vault for the storing of astronomical plates and photographs. (Act of March 22, 1905.)

Appropriates \$30,000 for the establishment and maintenance in southern California of a pathological laboratory for the investigation of tree and plant diseases and pests, and branch agricultural experiment station. (Act of March 18, 1905.)

Colorado Agricultural College.—Appropriates \$30,000 for the years 1905 and 1906, of which amount \$4,000 annually is to be expended for the extension of the instruction in agriculture, \$4,000 annually for farmers' institutes, and \$7,000 annually for the work of the agricultural experiment station. (Act of April 6, 1905.)

Authorizes vacancies in the State board of agriculture caused by death, resignation, or removal from the State to be filled by a majority of the members; a majority shall be a quorum for the transaction of business. Members of the board receive no compensation, but may be allowed actual traveling expenses, provided, however, the board may allow the president a salary of \$200 per annum. (Act of April 10, 1905.)

Connecticut Agricultural College.—The treasurer of the State and said commissioner (of the school fund) may invest any moneys belonging to the principal of said fund (land-grant fund of July 2, 1862) in any securities in which savings banks of this State may invest, and said commissioner shall semiannually receive and pay the interest or income accruing from said fund to the treasurer. The said treasurer shall pay quarterly to the Connecticut Agricultural College interest at the rate of five per centum per annum on the original principal of said fund, out of any money in the treasury not otherwise appropriated. (Act of May 18, 1905.)

Appropriates \$40,000 for the two years ending September 30, 1907, for the improvement of land, repairs of buildings and equipment, erection of minor buildings, insurance, and other necessary purposes. (Act of June 13, 1905.)

Delaware College.—Appropriates \$15,000 for the erection, alteration, and repair of necessary buildings. (Act of March 20, 1905.)

State College for Colored Students (Delaware).—Appropriates \$6,000 for the erection, alteration, and repair of necessary buildings. (Act of March 20, 1905.)

University of Florida.—An act of the legislature approved June 5, 1905, provides for the reorganization of the higher educational system of the State of Florida. The principal provisions are as follows:

SECTION 1. Abolishes the University of Florida at Lake City, the Florida State College at Tallahassee, the White Normal School at De Funiak Springs, the East Florida Seminary at Gainesville, the South Florida College at Bartow, and the Florida Agricultural Institute in Osceola County.

SECTION 2. Provides that all the property of whatever kind belonging to the institutions shall revert to the State of Florida and shall rest absolutely in the State board of education, in trust for the purposes and uses provided in the act.

SECTION 4. Revokes all continuing appropriations made to the institutions mentioned in section 1.

SECTION 6. Abolishes all boards of trustees, managers, and officers of the several institutions mentioned in section 1, and the boards of trustees, officers, and managers of the Blind, Deaf, and Dumb Institute and of the Colored Normal School.

SECTION 7. Repeals sections 278-285, 287, 288, 289, 291-299 of the Revised Statutes relating to the Florida Agricultural College.

SECTION 8. Repeals sections 301-323, 325, 326, and 327 of the Revised Statutes relating to the seminaries east and west of the Suwanee River.

SECTION 9. Repeals section 268 of the Revised Statutes relating to the White Normal School at De Funiak Springs.

SECTION 10. Abolishes the industrial and normal department of the St. Petersburg Normal and Industrial School, repeals an act approved May 31, 1901, to assist in maintaining said school, and grants all rights in its property acquired by the State to the county of Hillsborough.

SECTION 11. Amends section 269 of the Revised Statutes to read as follows:

"SECTION 269. Colored Normal School: A normal school for the training and instruction of colored teachers is established under the supervision and control of the State board of education and the board of control hereinafter provided. The board of control shall elect a faculty to consist of a principal and two assistant instructors, who shall have in charge the training and instruction of all students, subject at all times to the approval of and under such rules and regulations as the board of control hereinafter created shall prescribe, and such board, under rules and regulations hereinafter to be made, shall have the power of removal of all or any of the faculty, may increase or diminish the same, and may add such other departments of instruction and education to such institution from time to time as may be deemed advisable. The Colored Normal School now established at Tallahassee shall be such school, and the faculty remain as now until changed by said board, but the State board of education shall have power to change the location of same at any time it may deem it of benefit or advantage to such institution or the purposes for which it was created, and that one-half of the Morrill fund coming or that may come to the State for the purposes provided in such act is set apart and appropriated to the support and maintenance of said school."

SECTION 12. Establishes the University of the State of Florida and the Florida Female College.

SECTION 13. Creates a board of control, to consist of five citizens of the State, one from east Florida, one from south Florida, one from west Florida, one from middle Florida, and one from middle south Florida, who shall have been residents thereof for at least ten years prior to their appointment, who shall be appointed by the governor for terms of four years and until their successors are appointed and qualified, except that of the first board two members shall be appointed for two years and three members for four years. Appointments to fill vacancies shall be for the unexpired term. The governor may remove members for cause and shall fill all vacancies. No member of the first board shall be appointed from any county in which any of the institutions named in this act are located, and no appointment upon such board shall ever be made from any county in which any institution created, established, or maintained by this act may hereafter be located or situated.

SECTION 14. The members of the board shall be paid only their actual expenses while in the performance of their duties and in traveling to, from, and upon the same.

SECTION 15. The board of control, except as herein provided, shall act in conjunction with, but at all times under and subject to, the control and supervision of the State board of education.

SECTION 16. Provides that the location of the University of the State of Florida, Florida Female College, Colored Normal School, and Institute for the Blind, Deaf, and Dumb shall be fixed by the State board of education and the board of control in joint session.

SECTION 21. The University of the State of Florida shall have and contain the following departments and such other departments as may from time to time be determined upon and added at any joint meeting of the State board of education and the board of control, to wit: A department of agriculture, mechanical and industrial arts, a scientific and classical department, a normal department for the training and instruction of white teachers. It being intended that the design and scope of this institution shall be to teach such branches of learning as are related to agriculture and the mechanical and industrial arts, scientific and classical studies and instructions in all the various higher branches of education, the fundamental laws and in what regards the rights and duties of citizens, and shall include military tactics if the said joint boards deem the same requisite and proper.

SECTION 23. No student shall be admitted to the university who has not passed a satisfactory examination at some high school and through the twelfth grade as now established, or some other institution of learning having an equivalent instruction to the twelfth grade. The board of control may change the grade at any time they may see fit as a prerequisite to such entrance. White male students only are to be admitted, except that male and female students may be admitted to the normal department.

SECTION 24. Allows each county in the State to send one student annually to the university, the female college, and the normal department of the university without any charge for instruction. Other citizens of the State shall be admitted at the lowest rate and expense consistent with the welfare and efficiency of the institutions.

SECTION 25. Provides for the distribution of the libraries and laboratories of the abolished institutions among the university, female college, deaf, dumb, and blind institute, and for the disposal of such part as may not be required for their equipment.

SECTION 26. Appropriates exclusively to the establishment, maintenance, and support of the university all the bonds, moneys, properties, and assets belonging to the University of Florida, or held for its benefit, and the rents, revenues, issues, and profits thereof. The Florida Agricultural Experiment Station shall be and remain a department of the university, together with all the rents, benefits, donations, and emoluments that may accrue therefrom, or under the act of Congress commonly known as the Hatch Act, or under the act of Congress commonly known as the Morrill Act. The provisions of sections 286 and 290, revised statutes of Florida, are made applicable hereto, and all estate, right, property, claim, emolument, and the rents and issues thereof or any substitute thereof, and all claims and demands arising or that may or can arise thereunder, or any act of Congress in that regard are hereby preserved, maintained, and transferred to the State board of education for the use and benefit of the University of the State of Florida.

SECTION 27. Provides that all bonds, property, assets, and effects of the Florida State College, and the rents, revenues, issues, and profits thereof, shall be set aside and appropriated for the Florida Female College if located at Tallahassee. If not located at Tallahassee, so much of the funds and property remaining after settlement with the city of Tallahassee shall be used for the said female college.

SECTION 28. All other funds, appropriations, and property which may come to the State of Florida or into the hands or control of the State board of education for such purpose, or which may lawfully be applied to the promotion and advancement of schools of higher education, including the assets of the abolished institutions not otherwise disposed of, shall be held and appropriated for the "said four respective institutions equally and ratably in proportion as the needs of said institutions may from time to time require: *Provided*, That the income arising from the 'seminary fund' shall be divided equally between the university and the female college, one of which is to be located east and the other west of the Suwanee River."

SECTION 30. Appropriates \$100,000 for the establishment, maintenance, and support of the university, female college, colored normal school, and institute for the deaf, dumb, and blind, in such proportion as the boards may deem best, and the legislature shall, at each session, make the like or some reasonable and sufficient appropriation for the institutions.

SECTION 31. Provides for the payment out of funds vested in the State board of education of \$2,716 annually to cover the deficit in the interest derived on the bonds in which is invested the fund received by the State under the act of Congress of July 2, 1862, for colleges of agriculture and the mechanic arts.

SECTION 32. The State treasurer shall receive and pay out all moneys.

SECTION 34. Payments of moneys shall be on vouchers drawn by the board of control and approved by the comptroller, who shall draw his warrant upon the State treasurer for the payment thereof.

SECTION 35. The board of control shall be a body corporate, have a seal, elect a secretary and remove him at will, employ all necessary clerks and servants, have power to contract and be contracted with, sue and be sued, plead and to be impleaded, to receive donations, to purchase lands and tenements and to contract for the sale and disposal of the same, but the title to all donations and property however acquired shall be vested in the State board of education and shall only be transferred and conveyed by it. It shall have and possess all the powers of a body corporate for all purposes created by or that may exist under the provisions of this act or any act or acts amendatory thereof.

SECTION 37. Requires reports to be made to each legislature by the State board of education, the State board of control, the treasurer, and the comptroller. Requires the comptroller to examine the institutions semiannually and as often as, in his judgment, may be required or necessary.

SECTION 38. Authorizes and empowers the board of control to provide a system and course of written examinations by questions and answers for all the public high schools in the State, and no pupil shall be admitted to the high schools or be advanced to any successive grade therein or shall be permitted to enter any institution created or maintained in and by this act until such examinations have been had according to such procedure, and the results shall have been approved by the board of control in each instance and a certificate of such admission or advancement by the said board of control.

SECTION 39. Requires the superintendent of public instruction to inspect each and all of the institutions created and maintained by this act once in each month and to make report thereof in writing to the governor, and a duplicate annual report embodying the results of his monthly reports, one to the governor and one to the comptroller.

SECTION 40. Repeals all laws or parts of law in conflict with the provisions of this act.

SECTION 41. Act to take effect upon approval by the governor or becoming a law without approval. (Act approved June 5, 1905.)

University of Georgia.—Appropriates for each of the years 1906 and 1907: For support and maintenance, \$30,500; interest on land-scrip fund, \$6,314.14; farmers' institutes, \$2,500. Appropriates for 1906 the sum of \$5,000 for furnishing library. (Act of August 23, 1905.)

Georgia State Industrial College.—Appropriates \$8,000 for support for each of the years 1906 and 1907. (Act of August 23, 1905.)

Appropriates \$5,000 for heating, lighting, and furnishing water for class-room building. (Act of August 22, 1905.)

University of Idaho.—Requires State superintendent of public instruction to issue a State teacher's certificate to any applicant who is a graduate from the University of Idaho, receiving either the A. B. or B. S. degree, who has finished a two years' course in the department of pedagogy or has taught successfully in the public schools of the State for a period of five years and who is recommended by the professor or instructor of pedagogy of said institution. (Act of March 8, 1905.)

Appropriates \$40,000 for the site, erection, and equipment of a metallurgical laboratory. (Act of March 8, 1905.)

Appropriates \$12,000 for the site, erection, and equipment of a domestic science building to be paid out of one-eighth of the interest on the proceeds of the sale of all lands or of timber growing thereon granted to the State for a State university. (Act of March 8, 1905.)

Appropriates for the purchase of a library, \$3,000; completion and furnishing of the gymnasium, \$2,500; improvement of campus and construction of cement walks, \$500; repairs upon main building, \$1,500. (Act of March 6, 1905.)

Creates the university fund to consist of the income from the proceeds of the sale of the 72 sections and 50,000 acres of land granted for a university, of the income from the proceeds of the sale of timber grown upon said lands, any and all moneys received as rentals for such lands, and interest on deferred payments on sale of said lands. Appropriates for the support and maintenance of the university all moneys which belong to the university fund, and provides that after January, 1907, the same shall be available for such purpose immediately upon being credited to the said fund. (Act of March 6, 1905.)

Creates the scientific school fund, to consist of the income from the proceeds of the sale of 100,000 acres of land granted for a scientific school, of the income from the proceeds of the sale of the timber growing thereon, any and all moneys received as rentals for such land, and interest on deferred payments on sale of said lands. Appropriates all moneys which may accrue to said fund during 1905 and 1906 for the payment of a portion of the cost of supporting and maintaining the college or department of arts of the university during 1905 and 1906. (Act of March 6, 1905.)

Creates the agricultural college fund to consist of the income derived from the 90,000 acres of land granted for an agricultural college, and appropriates the moneys which may accrue to said fund during 1905 and 1906 for the payment of a portion of the cost of supporting and maintaining the college or department of arts of the university during 1905 and 1906. (Act of March 6, 1905.)

University of Illinois.—Appropriates for payment of salaries, care of buildings and grounds, and ordinary operating expenses, \$350,000 per annum; materials for shop practice, \$5,000 per annum; scientific cabinets and collections, \$2,000 per annum; additions to library, \$25,000; apparatus and appliances, \$3,000 per annum; fire protection, \$1,500 per annum; maintenance and extension of engineering equipment and expense of engineering experiment station, \$75,000 per annum; State water analyses, \$4,000 per annum; draining, fencing, and repairs on farms, \$5,000 per annum; maintenance of department of social and political and industrial economics, \$8,000 per annum; school of music, \$3,000 per annum; additional teachers in college of agriculture and to enable the college to meet demands for instruction at farmers' institutes, \$6,000 per annum; equipment of law school, \$10,000; equipment of chemical laboratory, \$10,000 per annum; equipment of water station, \$3,000; telephone exchange, \$1,500; general heating plant, \$35; heating and furnishing woman's building, \$15,000; purchase of Young Men's Christian Association lots, \$15,000; auditorium and furnishings complete, \$100,000. (Act of May 18, 1905.)

Appropriates \$50,000 annually for the years 1905 and 1906 for instruction in agriculture; \$25,000 annually for investigations in animal husbandry; \$15,000 annually for experiments on production of corn, wheat, oats, and clover; \$25,000 annually for chemical and physical examination of the soils of the State; \$15,000 annually to discover and demonstrate the best methods of orchard treatment; \$15,000 annually for promotion of dairy interests. (Act of May 18, 1905.)

Provides for one scholarship annually to each county in the State, which shall entitle the holder to gratuitous instruction in the university for a period of four years; each member of the general assembly is also authorized to nominate and appoint annually one person from his district, who shall by virtue of this appointment receive a certificate of scholarship in the university. The act provides for the examination of candidates and repeals an act of June 24, 1895, providing for State scholarships. (Act of May 12, 1905.)

Establishes a State geological survey at the university under the direction of a commission composed of the governor, the president of the State university, and one other person appointed by the governor, who shall hold office for four years, who shall serve without compensation, but shall be paid their actual expenses incurred in the performance of their duties. The commissioners have general charge of the bureau and shall appoint a director, who may, with the approval of the commissioners, appoint the necessary assistants and employees.

The objects of the bureau are: (1) A study of the geological formations of the State, with special reference to its products—i. e., coals, ores, clays, building stones, cement, materials suitable for use in the construction of roads, gas, mineral and artesian water, and other mineral resources; (2) the preparation of geological and other necessary maps to illustrate the resources of the State; (3) the preparation of reports, with necessary illustrations and maps, which shall include both a general and detailed description of the geological and mineral resources of the State; (4) the consideration of such other scientific and economic questions as in the judgment of the commissioners shall be deemed of value to the people.

All materials collected after having served their purpose shall be distributed to the educational institutions of the State or placed on exhibition in the State Museum of Natural History at Springfield or in the museums of the University of Illinois.

Section 9 appropriates \$25,000 per annum for the expenses of the bureau, not including printing, which shall be provided to an amount of \$5,000 per annum out of the State printing contract.

Sections 10 and 11 provide for cooperation with the United States Geological Survey in the preparation and completion of a contour topographic survey and map or maps of the State, and section 12 appropriates for this work a sum equal to that expended thereon by the United States Geological Survey, not to exceed, however, \$10,000 in any one year.

Section 13 makes it the duty of the University of Illinois to give thorough and reliable instruction in the geology of clay-working materials, their origin, classification, physical and chemical properties, and their behavior under such influences as are met with during the processes of manufacture, and to provide for this purpose such instructor, laboratories, apparatus, and all illustrative material as may be necessary to make this instruction practical; appropriates \$5,000 annually for this purpose. (Act of May 12, 1905.)

Purdue University (Indiana).—Appropriates \$5,000 for the year ending October 31, 1905, to aid in acquiring and diffusing among the people of the State of Indiana useful and practical information on subjects connected with agriculture and to promote scientific investigation respecting the principles of agriculture and of agricultural science. Appropriates annually thereafter \$25,000 to be expended as follows: \$5,000 in conducting experiments in live stock feeding, having particular regard for beef production; \$5,000 in conducting experiments in crop and soil improvement, including tests of varieties of corn, their adaptability to different soils and different sections of the State, and including fertilizer tests; \$5,000 in experiments and dissemination of results for the advancement of the dairy interests of the State; \$10,000 for the publication and dissemination of results among the people of the State and for advancing the experimental work of the experiment station and securing needed additions to equipment. The work outlined shall be carried out along lines to be agreed upon by the director of the experiment station and an advisory committee of three persons, one of whom shall be appointed by the Corn Growers' Association of the State of Indiana, one by the Dairymen's Association of the State of Indiana, and one by the Live Stock Association of the State of Indiana. Said advisory committee shall be entitled to no compensation for such service. (Act of March 3, 1905.)

Appropriates \$60,000 for chemical building and \$40,000 for civil engineering building. (Act of March 7, 1905.)

Kansas State Agricultural College.—Appropriates \$50,000 for horticultural building, greenhouses, and equipment; \$3,000 for addition to boiler room; \$10,000 for boilers and stacks; \$3,000 for addition to engine room; \$4,000 for granary and warehouse; current expense, \$90,000 for 1906, and \$100,000 for 1907. Each student shall be charged an incidental fee of \$3 per term. To students residing in States and Territories other than Kansas the fees shall be: Matriculation fee of \$10, and an incidental fee of \$10 per term. (Act of March 9, 1905.)

Appropriates \$1,250 for each of the years 1906 and 1907 for experiments with crude oil for the improvement of public roads. (Act of March 9, 1905.)

Appropriates \$500 annually for contingent expenses. (Act of March 9, 1905.)

Abolishes the office of loan commissioner and provides for the investment of the agricultural college funds by the State school fund commissioners. (Act of March 8, 1905.)

Requires analyses of food products to be made by the department of chemistry when requested by boards of health. (Act of March 9, 1905.)

Provides for an examination of accounts by the State accountant. (Act of February 15, 1905.)

Appropriates for expenses of regents, \$1,750 per annum for 1906 and 1907. (Act of March 9, 1905.)

University of Maine.—Appropriates for each of the years 1905 and 1906 the sum of \$12,000 for ordinary maintenance and repairs. (Resolve of March 8, 1905.)

The trustees shall receive from the State treasurer \$5 per day for their services when employed and actual traveling expenses. (Act of March 15, 1905.)

Massachusetts Agricultural College.—Appropriates for 1905: \$15,000 for 120 free scholarships; \$13,000 for theoretical and practical education; \$10,000 for maintenance, of which \$5,000 shall be used as a labor fund for the assistance of needy students; \$1,000 for maintenance of veterinary laboratory; \$500 for maintenance of heating and lighting plant; \$500 for maintenance of dining hall; \$10,500 for agricultural experiment station; \$3,000 for collecting and analyzing samples of concentrated commercial feed stuffs; \$500 for expenses of trustees; \$850 for printing and binding report of trustees. (Act of February 2, 1905.)

Appropriates \$39,950 for erecting, heating, and equipping a building for horticultural department; \$3,200 for enlargement of the laboratory and for a new plant house for the entomological department; \$8,500 for the extension of the central heating system; \$1,000 for repairs to dairy building, barns, and stable. (Resolve of May 17, 1905.)

Appropriates \$3,285 to meet the deficit in interest on the land-grant fund of 1862. (Act of February 9, 1905.)

Appropriates \$2,500 for the payment of premiums on investments of the technical education fund, Commonwealth grant. (Act of March 16, 1905.)

Massachusetts Institute of Technology.—Appropriates \$29,000. (Act of February 2, 1905.)

Authorizes the institute to hold real and personal estate to any amount. (Act of May 17, 1905.)

Michigan Agricultural College.—Appropriates \$55,000 for the erection and equipment of a dormitory. (Act of June 7, 1905.)

Appropriates \$20,000 for the purpose of improving, experimenting with, and exhibiting the live stock and poultry of the agricultural college for the biennial period ending June 30, 1907, provided that \$2,000 of said amount shall be expended for improving, experimenting with, and exhibiting poultry, and in supporting and encouraging poultry raising in the State. (Act of June 13, 1905.)

Appropriates \$10,000 for building one new barn and for removing and repairing old barns. (Act of June 13, 1905.)

Amends section 1 of act No. 232 of the acts of 1901 to read as follows:

“SECTION 1. There shall be assessed in the year 1901 and each year thereafter upon the taxable property of the State, as fixed by the State board of equalization in the year 1901 and each five years thereafter for the use and maintenance of the Michigan Agricultural College, the Upper Peninsula experiment station, and such other experiment stations as have been established, the sum of one-tenth of a mill on each dollar of said taxable property: *Provided*, That after the close of the fiscal year ending June 30, 1907, not more than \$100,000 shall be assessed in any one year. The State board of agriculture shall make an annual report to the governor of the State of all the receipts and expenditures of the Michigan Agricultural College, the Upper Peninsula experiment station, and such other experiment stations as have been established.” (Act of June 17, 1905.)

Amends section 1834 of the compiled laws of 1897 so as to read as follows:

“SEC. 1834. A board is hereby constituted and established which shall be known under the name and style of the ‘State board of agriculture.’ It shall consist of seven members holding office for the term of six years each or until their successors are appointed and qualified, one of whom shall be a resident of the Upper Peninsula of this State, besides the governor of the State and the president of the State Agricultural College, who shall be ex-officio members of the board. The governor, by and with the consent of the senate, on or before the third Wednesday of January of each biennial session, except as hereinafter provided, shall appoint two suitable persons to fill the vacancies

that shall next occur; on the taking effect of this act the governor, by and with the consent of the senate, shall appoint the seventh member of said board; and on or before the third Wednesday of January in 1911 and each sixth year thereafter the governor shall, by and with the consent of the senate, appoint three suitable persons to fill the vacancies that shall then occur: *Provided*, That the vacancies shall at all times be so filled that at least three of the members shall be practical agriculturists." (Act of June 17, 1905.)

University of Minnesota.—Divests the State board of control of all authority, jurisdiction, and control of the State university granted by the act of April 2, 1901, except that it reserves to the board of control full authority in all financial matters so far only as relates to the erection and construction of new buildings, the purchase of fuel, and the placing of insurance on buildings and contents. Control in all other matters is granted to the board of regents. The act provides for the appointment by the president of the board of regents of a purchasing agent and prescribes the routine for the purchase of supplies and for the payment of bills. (Act of April 7, 1905.)

Makes it a duty of the board of regents to organize and establish in the university as soon as practicable a teachers' college, or department of pedagogy, for the purpose of affording proper professional training for those persons who intend to become public and high school instructors, principals, and superintendents of schools. (Act of April 7, 1905.)

Establishes at or near the city of Crookston, under the direction and educational supervision of the board of regents of the University of Minnesota, a school of agriculture, which shall be a department of the University of Minnesota, under such name and designation as the board of regents may determine, and wherein shall be taught such studies and branches of learning as are related to agriculture and domestic economy. (Act of April 11, 1905.)

Authorizes the University of Minnesota to accept, in trust or otherwise, any gift, grant, bequest, or devise for educational purposes, and to hold, manage, invest, and dispose of the same and the proceeds and income thereof, in accordance with the terms and conditions of such gift, grant, bequest, or devise, and of the acceptance thereof; any person or persons contributing not less than \$50,000 to the university may endow a professorship therein, the name and object of which shall be determined by the board of regents. If the purposes of such gift, grant, devise, or bequest are not otherwise limited by the donor, the university may use the same or the proceeds thereof for any of the purposes of the university, and may, among other things, construct buildings and acquire land. (Act of April 15, 1905.)

Makes the general library of the university a depository of all books, pamphlets, documents, maps, and other works published by or under the authority of the State. (Act of April 18, 1905.)

Appropriates for University of Minnesota for year ending July 31, 1906: Current expenses, \$60,000; main building and construction, \$200,000; power house and equipment, including electric-lighting plant, \$20,000; plant building and equipment, \$10,000; equipment of bacteriological building, \$20,000; repairs, \$10,000; general library, \$5,000; periodicals, rebinding and repairs of books, and miscellaneous expense of general library, \$1,500; improvement of campus, \$4,000; new animal house, \$2,500; equipment officers' band corps, \$600; apparatus and machinery for school of mines, \$2,000. For year ending July 31, 1907: Current expense, \$60,000; completion of main building and equipment, \$150,000; repairs and betterments, \$10,000; library, \$5,000; periodicals, rebinding and repair of books, and miscellaneous expense for library, \$1,500; improvement of campus, \$4,000; apparatus and machinery for school of mines, \$2,000. Makes available the insurance on old main building for the construction of new main building.

Appropriates for school of agriculture for the year ending July 31, 1906: Steel water tower and tank, \$5,500; reel and hose, \$1,000; additional for main building and land, \$60,000; live stock, \$4,500; campus, \$500; plant breeding and experimentation, \$4,000; soil investigation, \$1,000. For year ending July 31, 1907: Enlarging kitchen and equipment, \$10,000; live stock, \$4,500; campus, \$500; plant breeding and experimentation, \$4,000; soil investigation, \$1,000; insectary, \$2,500.

Appropriates for substation at Crookston for year ending July 31, 1906: Current expense, \$8,000; drainage of farm, including experiments in tile draining, \$4,000; school building for Crookston School of Agriculture and equipment, \$15,000. For year ending July 31, 1907: Current expense, \$8,000; dwelling house, machinery shed, and barn, \$5,000.

Appropriates for substation at Grand Rapids for year ending July 31, 1906: Current expense, \$4,000; dairy building, well, gasoline engine, silo, and root cellar, \$2,000. For year ending July 31, 1907: Current expense, \$4,000. (Act of April 19, 1905.)

University of Missouri.—Appropriates out of the general revenue fund for support and maintenance during the years 1905 and 1906, of the department at Columbia, \$250,000; out of the State seminary moneys and collateral inheritance tax: \$121,000 for maintenance; summer schools, \$12,000; hospital, \$10,000; college of agriculture and experiment station, \$50,000; Benton Hall, \$15,000; gymnasium, \$50,000; student labor, \$6,000; fellowships and scholarships, \$4,000; libraries, \$20,000; publications and advertising, \$5,000; grading, granitoid, and fences, \$2,000; heat, light, and power plant, \$18,700; law department, \$3,000; medical department, \$3,000; cattle barn, \$5,000; State military school, \$300; engineering department, \$15,000; laboratories, \$10,000. (Act of March 14, 1905.)

Appropriates out of collateral inheritance tax \$6,000 for the support of State cadets during 1905 and 1906. (Act of April 17, 1905.)

Missouri School of Mines and Metallurgy.—Appropriates out of the general revenue fund for the years 1905 and 1906: Support and maintenance, \$40,000; ore-dressing building and mill, \$10,000; out of the State seminary moneys and collateral inheritance tax: Ore-dressing building and mill, \$10,000; furnishing new buildings, \$6,000; grading and fencing, \$2,000; waterworks, \$5,000; gymnasium equipment, \$1,000; machinery for shops and laboratories, \$15,000; boilers and stack, \$3,000; equipping new library rooms, \$1,000; books, \$2,500; equipment of laboratories, \$25,000; sidewalks, \$2,500. (Act of March 14, 1905.)

Lincoln Institute (Missouri).—Appropriates for the years 1905 and 1906: Academic and normal training departments, \$21,400; equipment and incidentals in said departments, \$1,500; industrial department, \$9,500; agricultural department, \$2,000; salaries of matron, janitor, and student help, \$3,500; contingent expenses, \$8,500; general repairs, \$4,000; summer school, \$1,000; library, \$1,000; girls' dormitory, \$25,000. (Act of March 14, 1905.)

Montana College of Agriculture and Mechanic Arts.—Provides for issuance of bonds to the amount of \$80,000 to redeem agricultural college bonds amounting to \$100,000. The bonds are secured by 50,000 acres of land granted to the State for the establishment and maintenance of an agricultural college. (Act of March 1, 1905.)

Appropriates for the year ending November 30, 1905: For maintenance, \$17,500; for maintenance of the agricultural experiment station, \$5,000; for experimental purposes at the experiment station, \$1,000. For the year ending November 30, 1906: For maintenance, \$18,000; maintenance of the experiment station, \$5,000; experimental purposes at experiment station, \$1,000. (Act of March 3, 1905.)

University of Nebraska.—Appropriates \$20,000 for the maintenance and improvement of the substation of the agricultural experiment station at North Platte; \$12,000 for maintenance of farmers' institutes. (Act of April 1, 1905.)

Appropriates for the biennium ending March 31, 1907, payable from the temporary university fund: \$80,000 for general current expenses; \$25,000 for farm departments, schools, and experiment station; \$16,000 for repairs of buildings; \$7,000 for electrical apparatus for light and power; \$15,000 for equipment and furnishing of new buildings; \$55,470 for permanent improvements; \$50,000 for one wing of a fire-proof museum building; \$32,000 for one wing of a woman's building on a farm; \$30,000 for library books, and equipment, physics apparatus, poultry husbandry, and farm land. Appropriates also \$1,000 for books for the law library. (Act of April 3, 1905.)

Appropriates from the temporary university fund for the biennium ending March 31, 1907, \$350,000 for salaries and wages. (Act of April 3, 1905.)

Authorizes the regents to condemn land for the university. (Act of March 27, 1905.)

Authorizes counties to appropriate \$100 per annum to defray local expenses of farmers' institutes. (Act of March 25, 1905.)

Nevada State University.—Appropriates \$2,740.65 to pay indebtedness incurred in 1901, 1902, 1903, and 1904. (Act of February 20, 1905.)

Appropriates \$6,000 for a dining hall and provides for an annual tax levy not to exceed one-eighth of 1 cent on each \$100 to pay the interest on bonds issued for the purpose and to create a sinking fund for their retirement. (Act of March 1, 1905.)

Appropriates \$7,000 for a mining and metallurgical laboratory and \$9,000 for its equipment, and provides for an annual tax levy not to exceed three-eighths of 1 cent on each \$100 to pay the interest on the bonds issued for the purpose and to create a sinking fund for their retirement. (Act of March 2, 1905.)

Provides for the establishment of an agricultural experiment farm in the southeastern part of the State and appropriates \$10,000 for its maintenance in 1905 and 1906. (Act of March 2, 1905.)

Appropriates \$675 for a chemical fire extinguisher. (Act of March 2, 1905.)

Appropriates for 1905 and 1906, \$8,000 from interest of 1862 land-grant fund and \$42,000 from the contingent university fund. (Act of March 15, 1905.)

Provides that on and after January 1, 1907, the board of regents shall consist of five members; those who are elected for the term of four years to be known as "long-term regents," and those elected for the term of two years to be known as "short-term regents," and to hold their offices for the several periods for which they are elected and until their successors are elected and qualified. At the general election in 1906 there shall be elected two long-term regents, who shall hold their office for four years, and two short-term regents, who shall hold their office for two years. Thereafter at each general election there shall be elected two regents for the long term and one regent for the short term. In case of vacancy, the governor shall fill the same by appointment until the next general election, when such vacancy shall be filled by election. (Act of March 16, 1905.)

Appropriates \$2,000 for the completion of any unfinished building or buildings, and provides for an annual tax levy not to exceed one-eighth of a cent on each \$100 to pay interest on the bonds issued for the purpose and to create a sinking fund for their retirement. (Act of March 15, 1905.)

New Hampshire College of Agriculture and Mechanic Arts.—Appropriates \$10,000 annually for two years to be expended for the two-year course in agriculture, and general expenses; \$5,500 for purchase of president's residence; \$25,000 for the erection and equipment of a building for military drill. (Act of March 10, 1905.)

Rutgers Scientific School (New Jersey).—Requires the establishment of a department which shall provide short courses in agriculture, equipped and designed for the practical education of students in both general and specific lines of farming. Said department shall offer special instruction to students on soils, crops, fertilizers, manures, drainage, farm machinery, farm buildings, breeds of live stock, stock judging, animal diseases and remedies, production and handling of milk and cream, manufacture of butter and cheese, growth of fruits, berries, management of orchards, market garden and vegetable crops, insects injurious to the various plants, diseases of plants, animal nutrition, including the use of forage crops, cereal grains, fine feeds, and all other matters pertaining to general and specific lines of farm practice. The act requires suitable buildings to be provided and equipped for giving the specific instruction and the employment of competent instructors. It provides for an appropriation of \$24,000 for the organization, equipment, and maintenance of said department for the current year, and for an annual appropriation thereafter of \$6,500. (Act of March 25, 1905.)

Amends sections 57, 59, and 60 of the general statutes of New Jersey of 1895 and provides for as many scholarships each year from each county in the State as there are members of the assembly to which each county is entitled. The act provides for the payment to the college out of the general revenues of the State \$120 for each student in the college on such scholarship, the aggregate amount to be so paid in any one year not to exceed \$15,000. (Act of March 31, 1905.)

Appropriates \$80,000 for balance due for services rendered in the instruction of students holding free State scholarships from September 1, 1890, to July 1, 1902. (Act of April 29, 1905.)

Appropriates for personal expenses of board of visitors, \$50; instruction in clay working and ceramics, \$2,500. (Act of June 26, 1905.)

New Mexico College of Agriculture and Mechanic Arts.—Appropriates \$12,000 annually for two years for support and maintenance. (Act of March 16, 1905.)

Authorizes the expenditure of the funds derived from the sale and lease of lands for buildings, equipment, and other permanent improvements. (Act of March 14, 1905.)

Authorizes and directs the commissioner of public lands to sell for cash 10,000 acres of land, at not less than \$10 per acre, the proceeds to be used for the construction of permanent improvements. (Act of March 16, 1905.)

Prohibits the establishment of a saloon within 1 mile of the established boundaries of the college. (Act of March 16, 1905.)

Cornell University (New York).—Appropriates \$25,000 for State veterinary college and \$40,000 for the promotion of agricultural knowledge throughout the State. (Act of June 3, 1905, chap. 699.)

Appropriates \$10,000 to aid in extending the reading courses and the free winter courses for farmers' sons and daughters in the college of agriculture. (Act of June 3, 1905, chap. 700.)

Amends chapter 238 of the laws of 1896 and makes the commissioner of education an ex officio member of the board of trustees, in place of the superintendent of public instruction. (Act of March 24, 1905, chap. 97.)

North Carolina College of Agriculture and Mechanic Arts.—Repeals the provision of the act of March 9, 1903, providing for an annual appropriation by the board of agriculture out of the fertilizer tax. (Act of March 1, 1905.)

Appropriates annually \$25,000 for support and maintenance; appropriates \$5,000 for textile machinery. (Act of March 6, 1905.)

Appropriates \$1,000 for fire protection. (Act of March 6, 1905.)

Conveys to trustees a lot containing about three and one-half acres. (Act of March 6, 1905.)

Agricultural and Mechanical College for the Colored Race (North Carolina).—Appropriates annually \$7,500 for support and maintenance; appropriates also \$7,500 for a dormitory. (Act of March 6, 1905.)

Appropriates \$300 for fire protection. (Act of March 6, 1905.)

North Dakota Agricultural College.—Appropriates \$50,000 for the building and equipping of a chemical laboratory and of a greenhouse. (Act of March 15, 1905.)

Appropriates \$30,400 to pay indebtedness caused by a decision of the supreme court of the State that certain bonds authorized by the legislature of the State are null and void. (Act of March 14, 1905.)

Oklahoma Agricultural and Mechanical College.—Appropriates \$92,500 for a building for the departments of agriculture, horticulture, and administration, to be known as Morrill Hall, a building to provide additional shops and recitation rooms for the departments of civil, electrical, and mechanical engineering, and a gymnasium, and for the purchase of furniture, machinery, and necessary appliances to equip such buildings. (Act of March 4, 1905.)

Appropriates \$8,000 for procuring title to a section of land and in improving, stocking, equipping, and developing said land. Provides for a tax levy to raise the sum of \$17,500 per annum. (Act of March 11, 1905.)

Colored Agricultural and Normal University (Oklahoma).—Appropriates \$20,000 for a dormitory for girls, for the enlargement of other buildings, and for the equipment of the same. (Act of March 15, 1905.)

Appropriates \$5,000 for system of waterworks and sewerage. Provides for a tax levy to raise \$17,500 per annum. (Act of March 11, 1905.)

Oregon Agricultural College.—Appropriates \$2,500 annually for farmers' institutes. (Act of February 6, 1905.)

Requires all funds derived from the income or rents of property or from the sale and disposition of surplus products, useless and condemned property to be turned into the State treasury. This does not apply to tuition, matriculation, or other fees charged students. (Act of February 21, 1905.)

Requires the chemist of the agricultural college to analyze any and all substances sent him by the dairy and food commissioner. (Act of February 22, 1905.)

Appropriates for the two years ending December 31, 1906: Salaries of officers and employees and maintenance and general and contingent expenses of conducting the experiment station, \$15,000; constructing, finishing, and furnishing new dormitory and drill shed and for general repairs and improvements, \$65,000. (Act of February 22, 1905.)

Pennsylvania State College.—In addition to the present elective members of the board of trustees of the Pennsylvania State College the said board shall consist of the following members, to wit: Two members to be elected each year for a term of three years each, by the alumni of said college; two members to be appointed each year for a term of three years each, by the governor of the Commonwealth and confirmed by the senate; and the following members, to serve *ex officio* during their respective terms of office: the governor of the Commonwealth, the president of the college, the State superintendent of public instruction, the president of the State agricultural society, and the secretary of the State board of agriculture.

The term of office of such additional members as are herein provided for and of all other elective members shall begin on the 1st day of July in the year in which they are respectively elected or appointed, and the said board of trustees is hereby authorized and empowered to make and alter from time to time such rules and regulations for the election of all alumni members thereof as it shall deem necessary and expedient for carrying out the purpose of this act.

The officers of the board shall be chosen annually, to serve for a period of one year each, and shall be a president, a vice-president, a secretary, a treasurer, and an executive committee of not less than three or more than seven members, whose duty it shall be, under the direction and subject to the approval of the board of trustees, to transact such necessary business as may arise in the intervals between regular meetings of the board. No member of the board shall receive compensation for his services, but shall be paid necessary traveling and hotel expenses actually incurred in the performance of duty as such member. The treasurer shall not be a member of the board, and shall give such bonds for the faithful performance of his duties and receive such compensation as the board may from time to time direct. (Act of March 24, 1905.)

Appropriates for the two years beginning June 1, 1905: Furnishings of class rooms and laboratories, \$500; fuel, heating, lighting, and power, \$34,000; repairs and main-

tenance of buildings, \$8,000; electric light and water supply, \$5,000; steam plant, \$2,000; insurance, \$6,420.33; maintenance of departments: Chemistry, \$3,000; mining engineering, \$15,000; electrical engineering, \$15,000; mechanical engineering, \$15,000; civil, hydraulic, and sanitary engineering, \$5,000; biology, \$2,000; botanical and horticultural laboratories, \$2,000; military department, \$1,000; library and reading room, \$5,000; engineering machinery and equipment, \$2,500; fire escapes, \$536; deficiency in fuel account, \$6,000; department of physics, \$1,000; power house, \$1,000; electrical distribution system, \$2,500. (Act of May 11, 1905.)

Appropriates for agricultural building, \$75,000; maintenance of department of agriculture, including a course in forestry, the short courses, dairy courses, correspondence courses, and other extension work, \$15,000 for each of the years ending May 31, 1906, and May 31, 1907; maintenance of agricultural experiment station, \$10,000; implement shed and tool house and poultry houses, \$2,500. (Act of May 11, 1905.)

Rhode Island College of Agriculture and Mechanic Arts.—Appropriates \$15,000 for support and maintenance for 1905. (Act of March 8, 1905.)

Clemson Agricultural College (South Carolina).—Establishes 124 beneficiary scholarships of the value of \$100 each per annum to be divided among the several counties in the same manner as the members of the house of representatives are apportioned. The scholarships must be paid from the regular income of the college and are to continue for the term of four years or for such length of time as the beneficiary shall be able to maintain himself. (Act of February 25, 1904.)

Colored Normal, Industrial, Agricultural and Mechanical College (South Carolina).—Appropriates \$5,000 for maintenance and \$2,500 for roofing and completion of agricultural building. (Act of February 18, 1905.)

South Dakota Agricultural College.—Requires an exhibit to be made every year at the State fair of South Dakota of the live stock, agricultural, and horticultural products produced or owned at the college. The expenses of freight and drayage of the exhibit shall be paid out of the general fund of the State. Requires the attendance of professors to explain to the people the care, cultivation, and growth of the exhibits. (Act of March 1, 1905.)

Appropriates \$13,000 per annum for 1905 and 1906 for salaries of president and teachers; \$18,200 for 1905 and \$17,700 for 1906 for maintenance, library, and repairs; \$3,000 per annum for 1905 and 1906 for farm expenses and purchase of stock; \$1,200 per annum for 1905 and 1906 for Highmore substation; \$800 for 1905 for furnishing horticultural and engineering building. (Act of March 4, 1905.)

Appropriates \$16,000 for the purchase of a farm of 160 acres. (Act of March 6, 1905.)

Requires all funds received or collected, whether from fees or board, or from any other source whatever, except moneys received from the United States under the acts of March 2, 1887, and August 30, 1890, to be paid into the State treasury within ten days after the close of each month. Appropriates all such funds for the use and benefit of the college, to be paid out upon warrants of the State auditor issued upon vouchers approved by the governing board of the institution. (Act of March 8, 1905.)

Constitutes the entomologist of the State experiment station the State entomologist and charges him with the execution of an act entitled "An act to prevent the introduction and spread of injurious insects and dangerous plant diseases in the State of South Dakota." (Act of March 6, 1905.)

Requires all counties in the State in which farmers' institutes are held annually under certain described organizations to pay the expenses of such institutes in a sum not exceeding \$200 annually for each county. (Act of March 3, 1905.)

University of Tennessee.—Appropriates \$25,000 toward establishing schools of technology provided that \$1,250 of that amount or so much thereof as may be necessary be used each year for the transportation of pupils to and from the university. (Act of April 17, 1905.)

Agricultural and Mechanical College of Texas.—Appropriates for each of the years ending August 31, 1906, and August 31, 1907: For maintenance, \$40,000; steam plant, \$5,000; agriculture, \$600; mechanical engineering, \$900; horticulture, \$600; veterinary, \$500; animal husbandry, \$750; physics, \$900; botany, \$235; entomology, \$750; for treating foul brood in bees, \$800; civil engineering, \$500; care of grounds and roads, \$1,000; fuel, \$2,000; drawing, \$300; president's funds (including postage, telegrams, telephone, publishing catalogues, circulars, etc.), \$4,000; publishing bulletins, \$2,000; student labor fund, \$5,000; support and maintenance of Beeville experimental station, \$3,000; Troupe experimental station, \$3,000; textile school, \$750; board's expenses, \$500; repairs, \$5,000. Also for agricultural and engineering shop and laboratory equipment, \$11,000 for 1906 and \$10,000 for 1907; warehouse, \$5,000 for 1906; hack and team, \$400 for 1906. (Act of May 23, 1905.)

Prairie View State Normal and Industrial College (Texas).—Appropriates for each of the years ending August 31, 1906, and August 31, 1907: Maintenance of State students,

\$17,500 (each appointee to pay one-half of the cost of maintenance); agricultural and mechanical department, \$2,500; female industrial department, \$800; college course, \$1,500; library, \$250; stationery, postage, and printing, \$300; grounds and roads, \$150; repairs and painting, \$1,000; two mule teams, \$500; mechanical department, \$800. Also for 1906: Furniture, \$500; water supply, \$2,500. (Act of May 23, 1905.)

Agricultural College of Utah.—Provides for a commission of nine members to investigate the duplication of work in the Agricultural College of Utah and the University of Utah; to ascertain the cost of such duplication and to consider the advisability of submitting to the electors of the State an amendment to the constitution of the State providing for the consolidation of the Agricultural College and the University of Utah. Appropriates \$1,000 for the expenses of the commission. (Act of March 9, 1905.)

Appropriates \$15,500 for experimental farms on arid lands. (Act of March 17, 1905.)

Amends section 2087 of the Revised Statutes to read as follows: "The courses of instruction in the Agricultural College, until otherwise provided for by law, shall comprise agriculture, horticulture, forestry, animal industry, veterinary science, domestic science and arts, elementary commerce, elementary surveying, instruction in irrigation as applied to the measurement, distribution, and application of water for agricultural purposes, military science and tactics, history, language, and the various branches of mathematical, physical and natural science, and mechanic arts, with special reference to the liberal and practical education of the industrial classes. But the Agricultural College shall not offer courses in engineering, liberal arts, pedagogy, or the profession of law or medicine." (Act of March 20, 1905.)

Appropriates \$5,288 for electric light equipment; \$130,000 for maintenance, equipment, printing, insurance, and new buildings, and \$10,500 for repairs and improvements for two years ending June 30, 1907. (Act of March 20, 1905.)

Makes the director of the agricultural experiment station a member of the State board of horticulture. (Act of March 9, 1905.)

Requires the agricultural experiment station to conduct experiments on the proper use of irrigation water and the reclamation of alkali and water-logged lands in cooperation with the National Government and appropriates \$10,000 for the purpose. (Act of February 21, 1905.)

Provides for the establishment of the Central Utah Experiment Station in Davis County as a branch of the State experiment station and appropriates for the years 1905 and 1906 the sum of \$8,000, and for the southern Utah experimental farm, \$6,000. (Act of March 18, 1905.)

Washington Agricultural College and School of Science.—Creates "the current fund of the Agricultural College and School of Science" into which shall be paid (1) all moneys heretofore collected or hereafter to be collected from the lease or rental of lands set apart for the college; (2) all interest or income arising from the proceeds of the sale of any of said lands; (3) all moneys received or collected as interest on deferred payments on contracts for the sale of such lands. (Act of February 27, 1905.)

Requires the chemist of the agricultural experiment station to assist without additional compensation in the execution of the act prohibiting the sale of adulterated milk or other food product. (Act of March 2, 1905.)

Changes the name of the college to "State College of Washington," and continues to it all the rights, privileges, immunities, and obligations of the institution. (Act of March 2, 1905.)

Requires the chemist of the agricultural experiment station to assist without additional compensation in the enforcement of an act to provide against the adulteration of ground food for live stock. (Act of March 9, 1905.)

Appropriates for the two years ending March 31, 1907, from the general fund: For maintenance, \$150,000; buildings, \$5,000; tools and machinery for mechanical building, \$5,000. From the agricultural college fund, \$5,000 for maintenance. (Act of March 11, 1905.)

West Virginia University.—Appropriates for each of the years ending September 30, 1905, and September 30, 1906: Salaries, \$55,000; school of music, \$3,000; school of fine arts, \$2,500; college of agriculture, \$5,000; school of medicine, \$4,000; regents' expenses, \$1,200; cadet books, \$2,000; advertising, \$1,000; printing, \$2,500; repairs, \$2,500; fire protection, \$300; janitors, \$4,000; night watchmen, \$1,400; gardeners, \$1,000; library, \$2,500; law library, \$1,000; gymnasium, \$1,500; current and contingent expenses, \$4,500; apparatus, \$1,500; blackboards, desks, etc., \$500; stone wall, \$1,500; furniture, \$1,000; improving grounds, \$2,000; heat, water, and light, \$3,000; furniture for president's house and executive office, \$1,500; heating repairs, \$1,000; engineering equipment, \$12,000; land, \$4,087.50; library building, \$5,000; armory, \$1,500; mechanical hall, \$1,250; fencing, \$250; athletics, \$1,000. Appropriates also \$3,500 for cadet supplies. (Act of March 2, 1905.)

West Virginia Colored Institute.—Appropriates for each of the years ending September 30, 1905, and September 30, 1906: Current expenses, \$1,800; regents' expenses,

\$750; janitors, \$500; fuel, \$1,600; teachers' salaries, \$12,000; grading grounds, \$250; engineer, \$600; repairs, \$600; kitchen and dining room equipment, \$150; night watchman, \$400; agriculture, \$500; domestic science, \$500; cadet books and stationery, \$500; printing department, \$250; library, \$200; mechanical department, \$250; carpets, \$300; domestic science building, \$5,000; fences, \$100; band instructor, \$250; sewer, \$125; student labor, \$500; changing heating system, \$150. Appropriates for 1905: Furniture, \$700; cadet uniforms, \$900; pump, \$250; electric lights, \$200; fuel deficiency, \$1,508.41. For 1906: Furniture, \$650; electric lights, \$250; river landing, \$500. (Act of March 2, 1905.)

University of Wisconsin.—Amends section 390 of the statutes of 1898 as amended by laws of 1899, 1901, and 1903 to read as follows: "SECTION 390. There shall be levied and collected annually a State tax of two-sevenths of one mill for each dollar of the assessed valuation of the taxable general property of the State, as ascertained and fixed by the State board of assessment for apportionment of the State tax to the several counties, which amount, when so levied and collected, is * * * appropriated to the university fund income to be used * * * for current and administration expenditures and for the increase and improvement of the facilities of the university; * * * provided, that upon any apportionment of funds in the treasury under section 1069a of the statutes of 1898, such fund shall be applied to the tax hereinbefore levied. The commissioners of public lands may direct the State treasurer, from time to time, to set apart such sums by way of loan to the fund known as the university fund income for the university uses from uninvested moneys in the trust funds for the period when so uninvested, * * * as in their judgment shall be prudent, such loans to be repaid to the trust funds from the tax hereinbefore appropriated * * * with interest at the rate then required upon loans to school districts."

Appropriates annually for the period of three years the sum of \$200,000 from the general fund of the State for the construction and equipment of additional buildings and works and the enlargement and repairs of buildings and works, for fire protection, furniture, and equipment of existing buildings, and for apparatus and additions to the library. The plans for and erection of buildings must be approved by the governor.

Provides that no new school or college shall be established unless authorized by the legislature. (Chapter 320, approved June 8, 1905.)

Authorizes the regents to have done experimental work in agriculture at such points within the State as may in their judgment be advisable. (Chapter 53, approved March 29, 1905.)

Requires the university to expend a sum not less than \$1,500 per annum for a period of three years for experimental purposes in breeding, growing, curing, fermenting, and handling tobacco. (Chapter 384, approved June 17, 1905.)

Makes the president of the university a member of the State board of forestry, and authorizes the State forester upon invitation of the board of regents of the university to supervise such courses of forestry as may hereafter be provided for at the university. (Chapter 264, approved May 25, 1905.)

Continues the State hygienic laboratory authorized in 1903 for the period of two years and requires the regents of the university to appropriate from the university fund income the sum of \$2,000 per annum for a period of two years. (Chapter 471, approved June 20, 1905.)

Provides for an investigation tending to advance the cranberry industry of the State and requires the regents to expend annually for three years not less than \$2,000 out of the university fund income. (Chapter 438, approved June 19, 1905.)

University of Wyoming.—Provides for a tax of three-eighths of a mill on each and every dollar of the assessed valuation of all taxable property to be levied in each year. (Act of February 20, 1905.)

Appropriates \$2,000 for farmers' institutes and short courses in stock judging, agronomy, and general farming; \$440 for live stock slaughtered by order of State veterinarian. (Act of February 21, 1905.)

Repeals an act approved January 10, 1891, establishing an agricultural college. (Act of February 7, 1905.)

ADDITIONS TO AND CHANGES IN COURSES OF STUDY.

I. AGRICULTURE.

University of Arkansas.—Established short courses of four weeks each in dairying, agriculture, and horticulture. No entrance examination is required for these courses, and all expenses of attending the courses, including board and lodging, need not exceed \$25.

The course in dairying comprises theory and practice of dairying, receiving and separating milk, milk testing, butter making and marketing, cheese making and curing, and care of dairy animals.

The course in agriculture includes farm crops, soil culture and rotation of crops, grasses and clovers, uses and application of fertilizers, breeds, breeding and feeding, stock and grain judging.

The course in horticulture comprises propagation of plants, pruning, grafting, etc., planting and care of orchards, insect and plant diseases, and spraying.

Iowa College of Agriculture and Mechanic Arts.—The degree of bachelor of agricultural engineering (B. A. E.) will be given to students who have completed a four-year course in agriculture, or civil, mechanical, or electrical engineering, followed by one year of prescribed work in agricultural engineering and the related sciences.

Kansas State Agricultural College.—Added a four-year course in veterinary science.

Louisiana State University and Agricultural and Mechanical College.—A short winter course in agriculture has been added. It begins on the first Monday in January and continues ten weeks. The course includes soils and farm crops (recitations, two hours per week; laboratory, two hours per week); veterinary science (three hours per week); feeds and feeding (three hours per week); also any four of the following: Horticulture (two hours per week; laboratory, four hours per week); economic entomology (two hours per week; laboratory, two hours per week); plant diseases (two hours per week; laboratory, two hours per week); forestry (two hours per week); breeds, breeding, and dairying (three hours per week; laboratory, two hours per week). No examinations are required for entrance, but applicants must be at least 18 years of age.

Mississippi Agricultural and Mechanical College.—Established a department of agronomy and added a special man to the horticultural department for forestry and plant breeding.

Montana College of Agriculture and Mechanic Arts.—Established departments of dairying and agronomy.

University of Tennessee.—Added a two-year course in agriculture, the requirements for admission being the same as for the four-year course.

State College of Washington.—Established professorships of agronomy and animal husbandry and consolidated the horticultural department with the agricultural department.

2. ENGINEERING.

Alabama Polytechnic Institute.—The course in electrical and mechanical engineering has been separated into two independent courses and additional assistance in instruction has been supplied.

University of Florida.—Established full four-year courses in civil and electrical engineering.

Kansas State Agricultural College.—The apprentice courses have been discontinued. Added a four-year course in architecture.

Oklahoma Agricultural and Mechanical College.—Established a course in civil engineering.

University of Wisconsin.—Arranged five and six year combination courses in the college of letters and science with engineering.

3. OTHER COURSES.

Alabama Polytechnic Institute.—A three-year special course in pharmacy has been established, leading to the degree of Pharmaceutical Chemist.

University of Florida.—Abolished the preparatory department and raised the entrance requirements.

Louisiana State University and Agricultural and Mechanical College.—Established a pre-medical course of four years leading to the B. S. degree. It consists largely of the sciences underlying medicine and is designed for students who intend to enter medical colleges.

Virginia Agricultural and Mechanical College and Polytechnic Institute.—Added a four-year course in applied geology.

State College of Washington.—Added a four-year course in pharmacy; established a department of domestic economy.

West Virginia Colored Institute.—Added a two-year post-graduate normal course.

NEW BUILDINGS.

1. AGRICULTURE.

Purdue University (Indiana).—The new dairy barn, cost \$10,000, accommodates 20 animals. The judging pavilion connected with the barn is 50 feet in diameter.

Iowa College of Agriculture and Mechanic Arts.—Horticulture barn, cost \$5,500, is a three-story frame building covered with brick veneer and slate roof.

Mississippi Agricultural and Mechanical College.—New barns, cost \$10,000; greenhouse, cost \$3,000.

University of Missouri.—A cattle barn, cost \$7,500, is in process of construction.

Cornell University (New York).—The new agricultural college buildings provided for by the legislature in 1904 are in course of construction. The central building of the group rises to a height of 4 floors above the basement, and covers an area of 145 by 102 feet. It contains on the first floor the executive and business offices of the college, the main auditorium, and the college library, and on the other 3 floors lecture rooms, general and research laboratories, the museum, photographic room, and a room for domestic science. In the basement are the mailing department, the agronomy and horticultural cellars, a horticultural workroom, and the boilers.

To the west of the main building is the agronomy building, 52 by 109 feet, 2 floors and an attic above the basement. The special features are the farm-mechanics laboratory and agricultural-machinery room in the basement, soil laboratory on the first floor, and the experiment-station laboratory and elementary-agronomy laboratory on the second floor.

The dairy building to the east of the main building is two stories high, 51 by 101 feet, to which is connected in the form of an L a one-story structure, 60 by 163 feet. The main work of the dairy department will be conducted in the latter portion of the building which contains the churn, separator, starter, cheese, and market milk rooms, besides refrigerator rooms and rooms for fancy cheese and butter making. In the dairy building proper are the department offices, class rooms, reading room, advanced laboratory, and a Babcock laboratory. The locker rooms and a room for dairy mechanics are located in the basement.

North Carolina College of Agriculture and Mechanic Arts.—A site for an agricultural building has been purchased, and a new agricultural building has been erected and equipped at a cost of about \$80,000. It is a three-story buff press-brick building with granite trimmings, and is 208 by 74 feet. The lower or basement floor contains the class rooms and laboratories for work in the department of animal husbandry and dairying, including butter making, stock judging, farm butchering, and cold-storage accommodations for the products. The second floor contains the offices of the department, class rooms for animal husbandry and agronomy, and laboratories for soil physics and agricultural machinery. On the top floor are the rooms devoted to botany and vegetable pathology, zoology, physiology, and veterinary medicine.

North Dakota Agricultural College.—The new plant house consists of an entry way, 8 by 16 feet, a central plant house, 24 by 24 feet, and two wings, 17 by 17 feet each; cost, \$3,000. A new pig barn and a poultry house, cost \$2,950.

Oklahoma Agricultural and Mechanical College.—A dairy building, brick and stone, 2 stories, 30 by 60 feet, cost \$4,013. Greenhouse, brick and glass, 1 story, in three parts, 20 by 30 feet, 40 by 50 feet, 28 by 30 feet; cost, \$3,062.

Clemson Agricultural College (South Carolina).—The experiment station dairy barn is 110 by 38 feet with four 50-ton silos. The second floor has a capacity of 50 tons of loose hay.

Virginia Agricultural and Mechanical College and Polytechnic Institute.—Frame barn for experiment station, cost \$1,741; frame stock-feeding barn, cost \$1,506; two farm cottages, cost \$600.

Colored Agricultural and Normal University (Oklahoma).—Erected a new barn, cost \$3,100.

2. ENGINEERING.

Alabama Polytechnic Institute.—A brick and stone two-story laboratory for the joint use of the electrical and mechanical departments. The upper story is devoted to wood-turning work; the lower story is occupied by the engines, dynamos, etc., of the college power plant. It is 40 by 70 feet, and cost \$6,000.

Kansas State Agricultural College.—Addition to the shops, cost \$5,000.

University of Minnesota.—Addition to the mechanic arts building, cost \$11,000.

Mississippi Agricultural and Mechanical College.—The engineering building, cost \$30,000, is built of pressed brick, finished with stone, and covered with slate. The main part is 60 by 122 feet, 3 stories; north wing, 75 by 92 feet, one and a half stories; east wing, 60 by 54 feet, 1 story; main south wing, 74 by 102 feet, two stories; smaller south wing, 60 by 92 feet, one story.

Nevada State University.—New mining and metallurgical laboratory, cost \$7,000; equipment, \$9,000.

Ohio State University.—Mining and ceramics building, brick, cost \$85,000.

Clemson Agricultural College (South Carolina).—The dynamo laboratory is a single story brick structure, 37 by 80 feet, with basement for supply rooms. The main floor

is divided into a class room, 25 by 35 feet, and a dynamo laboratory room, 53 by 35 feet.

Virginia Agricultural and Mechanical College and Polytechnic Institute.—Two additional wings of brick to machinery hall, cost \$6,400.

State College of Washington.—An additional story has been added to the mechanical building, at a cost of \$5,000.

3. GENERAL.

Delaware College.—A new gymnasium and drill hall to cost \$15,000. In the basement are shower baths, plunge baths, and a large swimming pool, with lockers. The main floor serves as a drill hall and gymnasium, and contains a running track suspended from the roof truss.

University of the State of Florida.—A new modern fire-proof brick dormitory, capacity 48, cost \$12,500.

Georgia State College of Agriculture and Mechanic Arts.—Le Conte Hall, a two-story and basement brick and granite building, is used as a biological laboratory. It contains one lecture room, six laboratories, five other rooms, and cost \$17,000.

Louisiana State University and Agricultural and Mechanical College.—The Alumni Memorial Hall, cost \$40,000, is built of pressed brick and stone. The first floor contains the administrative offices and reception rooms, and the second floor contains two society halls and an assembly hall with a seating capacity of about 300.

University of Missouri.—A gymnasium, cost \$65,000, is in process of construction.

New Hampshire College of Agriculture and Mechanic Arts.—Erected a residence for the president at a cost of \$9,401.

North Dakota Agricultural College.—The chemical laboratory, cost \$47,000, is built of pressed brick. The main part is three stories, 76 by 50 feet, with two wings, each 50 by 30 feet, and two stories in height.

The new library building is 56 by 68 feet, with 11-foot basement of red sandstone and 17-foot story of pressed brick. The capacity is about 25,000 volumes. Cost, \$20,000.

Ohio State University.—Chemical building, brick, cost \$100,000.

Pennsylvania State College.—A brick dormitory and dining hall, costing about \$100,000. The dining room will seat nearly 900 at one time, and the three upper floors will house comfortably 140 students.

Virginia Agricultural and Mechanical College and Polytechnic Institute.—Auditorium, stone, cost \$22,689; four-story brick dormitory, 60 rooms, cost \$16,441; large brick addition to dining hall, cost \$12,925; two brick residences for professors, cost \$11,000.

University of Wisconsin.—The chemical building was erected at a cost of \$150,000. The central part is 80 by 188 feet, with two wings, each 51 by 61 feet, all three stories in height. The building contains an auditorium seating 500 persons, 4 smaller lecture and seminary rooms, and a library. Besides these there are large laboratories for organic, inorganic, analytical, physical, and pharmaceutical chemistry, with special laboratories for advanced work in each of these branches.

Alcorn Agricultural and Mechanical College (Mississippi).—Erected a two-story frame building for dining hall, cost \$8,000.

Lincoln Institute (Missouri).—Dormitory for girls, cost \$25,000.

Agricultural and Mechanical College for the Colored Race (North Carolina).—Three-story brick dormitory, cost \$7,500.

COURSES OF STUDY.

The purpose for which the "agricultural colleges" or "agricultural and mechanical colleges," as they are ordinarily called, were established, seems at this late date, over thirty years since the passage of the act for their establishment, to be misunderstood by large numbers of the people in this country. This is evidenced by occasional newspaper articles and discussions in legislatures and educational meetings, where the plea is made that the "agricultural colleges" are not fulfilling the mission for which they were established, this mission being described generally as the education of people for farm life.

The late Senator Morrill, who is frequently designated as the "father" of these land-grant colleges, stated before the house committee on education of the legislature of Vermont on October 24, 1890, that the title "agricultural colleges" was given to the institutions established under the act of July 2, 1862, by the index maker of the Congressional Globe, and that it has seemed to stick by them ever since; that the object of

the act of 1862 "was to give a chance to the industrial classes of the country to obtain a *liberal* education, something more than what was bestowed by our universities and colleges in general, which seemed to be more based on the English plan of giving education only to what might be called the professional classes, in law, medicine, and theology." The remarks were called forth by an attempt to establish in Vermont under the act of August 30, 1890, "something that will amount to nothing more than an agricultural school for our State." "I should regard that," said Senator Morrill, "as a revolution and subversive of the whole idea of the land-grant act of 1862, which was of a much broader kind. It included, to be sure, the idea that agriculture and the mechanic arts were to have a leading or first position, but it included much more. It was for the industrial classes, to promote their instruction generally, and it was not to exclude even the classics. Therefore, I should regard any change from the original act as a diversion of the fund, and a revolution of the whole practical idea."

On the passage of the act of July 2, 1862, the aid granted thereby was in some States given to existing State universities or to other established institutions, thereby rendering unnecessary a duplication of buildings or other material equipment which would suffice for instruction in certain branches of study. In some cases where such combinations were effected very little provision was made for instruction in agriculture, owing probably to a lack of application for such work on the part of students or to the difficulty of obtaining well-equipped instructors. Whatever the cause, it is a fact that the number of students enrolled in regular agricultural courses remained very small until after the enactments of Congress in aid of agricultural experiment stations and for the more complete endowment and support of the colleges of agriculture and mechanic arts. The sums received under these acts by each of the several States and Territories rendered possible a large amount of experimentation and research in agriculture, as well as an increase in the teaching force of the several institutions. As a result, the course of study in agriculture has been improved and systematized and definite form given to it. While fifteen or twenty years ago all instruction in agriculture offered by any one institution was given by one or two instructors, some of the colleges now have as many as twenty instructors, who give all of their time to such instruction.

The number of students taking regular four-year courses of study in agriculture has increased largely in recent years, but a still greater number are enrolled in the short courses, which are less scientific in character and are devoted very largely to practical work, furnishing excellent training to persons of mature age who are engaged in agricultural pursuits, or to persons preparing themselves for such work and for work in the manufacture of dairy products.

Prior to the passage of the act of July 2, 1862, there were very few institutions in this country offering instruction in engineering. The first institution offering such instruction was the Rensselaer Polytechnic Institute at Troy, N. Y., which was opened in 1825 with a course of study in civil engineering. The school of civil engineering of Union College, Schenectady, N. Y., was founded in 1845, followed shortly afterwards by the establishment of engineering courses in Harvard, Yale, Dartmouth, and the University of Pennsylvania. The act of 1862 gave a great impetus to the establishment of engineering courses, so that at the present time there is at least one institution endowed by the General Government in each State and Territory offering instruction in engineering. The establishment of the courses by these institutions and the great demand that arose for the instruction offered thereby stimulated other institutions to similar action, so that now degree courses in civil engineering are offered by 114 institutions, mechanical engineering by 94, electrical engineering by 91, mining engineering by 51, chemical engineering by 35, metallurgical engineering by 10, irrigation engineering by 4, textile engineering by 5, and railway engineering by 7.

On the following pages are given the courses of study offered by the several institutions endowed by the acts of July 2, 1862, and August 30, 1890, which show that while

liberal provision is made for instruction in agriculture and the mechanic arts, opportunity is afforded in nearly all cases for a liberal education, thus fulfilling the spirit and intent of the original act providing for the establishment of these institutions.

ALABAMA POLYTECHNIC INSTITUTE.

Undergraduate courses of four years (B. S.).—Chemistry and agriculture; civil engineering; electrical engineering; mechanical engineering; mining engineering; general course; pharmacy; chemistry and metallurgy.

Short course.—Agriculture (1 year); agriculture (2 years); mechanic arts (2 years); pharmacy (2 years); pharmacy (3 years, Ph. C.).

Other courses.—Graduate.

AGRICULTURAL AND MECHANICAL COLLEGE FOR NEGROES (ALABAMA).

English primary course (3 years); preparatory (3 years); normal (4 years); agriculture (B. A. S., 4 years); mechanical (B. M. S., 4 years); scientific-literary (B. S., 4 years).

Industrial courses.—Carpentry (3 years); agriculture (3 years); ironworking (3 years); shoemaking (3 years); broom making (1 year); chair bottoming (1 year); tailoring (2 years); nurse training (2 years); sewing (3 years); millinery (1 year); cooking (2 years); laundry (2 years); printing (3 years); machine shop (4 years); shorthand (1 year).

UNIVERSITY OF ARIZONA.

Undergraduate courses of four years.—Literary (Ph. B.); scientific (B. S.); civil engineering (B. S.); mechanical engineering (B. S.); mining (B. S.); agriculture (B. S.); chemistry (B. S.).

Short course.—Assaying (2 years).

Other courses.—Graduate; preparatory (4 years).

UNIVERSITY OF ARKANSAS.

Undergraduate courses of four years.—Liberal culture courses (A. B. or B. S.); mechanical engineering (B. M. E.); civil engineering (B. C. E.); electrical engineering (B. E. E.); mining engineering (B. Mi. E.); chemical engineering (B. Ch. E.); agriculture (B. S. A.); horticulture (B. S.); chemistry (B. S. C.).

Short courses.—Mechanic arts (2 or 3 years); electrical engineering (2 years); dairying (4 weeks); agriculture (4 weeks); horticulture (4 weeks).

Other courses.—Normal (4 years, L. I.); graduate; preparatory (2 years); music; art; law; medicine.

BRANCH NORMAL COLLEGE (ARKANSAS).

Preparatory course (3 years); normal (4 years, L. I.); classical (6 years, A. B.); mechanic arts (4 years); manual training (4 years); sewing; typewriting and stenography.

UNIVERSITY OF CALIFORNIA.

Undergraduate courses of four years.—Letters (A. B.); social science (B. L.); natural sciences (B. S.); commerce (B. S.); agriculture (general course, B. S.); agriculture (technical course, B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); mining engineering (B. S.); railroad engineering (B. S.); sanitary engineering (B. S.); irrigation engineering (B. S.); chemistry (B. S.); sugar technology (B. S.); architecture (B. S.).

Short courses.—Agriculture (2 years); dairying (8 weeks); fruit growing (2 weeks); irrigation (1 week); animal industry (4 weeks); dairying (4 weeks); general agriculture (4 weeks); nutrition (3 weeks); entomology (4 weeks); viticulture (4 weeks).

Other courses.—Pharmacy (2 years, Ph. C.); graduate; law; medicine; postgraduate medicine; dental; Lick astronomical department; Mark Hopkins Institute of Art.

COLORADO AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; horticulture and botany; mechanical engineering; civil and irrigation engineering; electrical engineering; general and domestic science; architecture; veterinary science.

Short course.—Agriculture (2 years); agriculture (12 weeks); farmers' short course (2 weeks); domestic science and agriculture (2 years); normal domestic science (2 years).

Other courses.—Subfreshman (2 years).

CONNECTICUT AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; general science; domestic science.

Four-year courses (secondary).—Agriculture; domestic science.

Short courses.—Agriculture (2 years for graduates of high schools); agriculture (2 years for men 17 years of age or over who have not had a high school education); rural school teaching (2 years); mechanic arts, surveying, or drafting (2 years); domestic science (2 years); business (2 years); general science (2 years); farm dairy (12 weeks); creamery (12 weeks); pomology (12 weeks); poultry (6 weeks); forestry (12 weeks); business (12 weeks); also 33 ten-day courses arranged in groups, beginning in January and ending in March.

DELAWARE COLLEGE.

Undergraduate courses of four years.—Classical (A. B.); Latin-scientific (A. B.); agriculture (B. S.); general science (B. S.); civil engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.).

Short courses.—Agriculture (1 or 2 years); agriculture (10 weeks, winter).

Other courses.—Graduate.

STATE COLLEGE FOR COLORED STUDENTS (DELAWARE).

Undergraduate courses of four years.—Classical (A. B.); scientific (B. S.); agriculture (B. Agr.); engineering (B. E.).

Industrial courses (2 years).—Woodworking; ironworking; blacksmithing; masonry; printing; cooking; sewing; dressmaking.

Other courses.—Normal (3 years); preparatory (2 years).

UNIVERSITY OF THE STATE OF FLORIDA.

Undergraduate courses of four years.—Literary (A. B.); mathematical (B. S.); natural history (B. S.); agriculture (B. S.); horticulture (B. S.); chemical (B. S.); civil engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.).

Short courses.—Mechanic arts (2 years); agriculture (2 years).

FLORIDA STATE NORMAL AND INDUSTRIAL SCHOOL FOR COLORED STUDENTS.

Preparatory (2 years); normal (4 years); music.

Industrial courses.—Agriculture; dairying; sewing; cooking; laundry; millinery; nursing; printing; carpentry; painting; blacksmithing and wheelwrighting; tailoring.

GEORGIA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years (B. S.).—General science; agriculture; civil engineering; electrical engineering.

Short courses.—Agriculture (1 year); agriculture (12 weeks).

Other courses.—Graduate.

GEORGIA STATE INDUSTRIAL COLLEGE FOR COLORED YOUTHS.

Preparatory (3 years); normal (3 years); collegiate (4 years, A. B.).

Industrial courses (three years each).—Agriculture; carpentry; blacksmithing; wheelwrighting; masonry; painting; tailoring; shoemaking; sewing.

Short course.—Dairying (2 months).

UNIVERSITY OF IDAHO.

Undergraduate courses of four years.—Classical (A. B.); scientific (B. S.); agriculture and horticulture (B. S.); mechanical and electrical engineering (B. E. E.); civil engineering (B. C. E.); mining engineering (B. E. M.).

Short courses.—Agriculture and horticulture (2 years); farm dairying and horticulture (4 to 6 weeks, winter).

Other courses.—Preparatory (3 years); music (4 years, B. M.).

UNIVERSITY OF ILLINOIS.

Undergraduate courses of four years.—General courses allowing a wide range of electives (A. B.); commerce and industry (A. B.); architecture (B. S.); architectural engineering (B. S.); civil engineering (B. S.); electrical engineering (B. S.); mechanical engineering (B. S.); railway engineering (B. S.); municipal and sanitary engineering (B. S.); chemistry (B. S.); chemical engineering (B. S.); physics (B. S.); general science (B. S.); household science (B. S.); mathematics (B. S.); pre-medical (B. S.); agriculture (B. S.); library science (B. L. S.).

Other courses.—Preparatory; graduate; music; law; medicine; dentistry; pharmacy.

PURDUE UNIVERSITY (INDIANA).

Undergraduate courses of four years (B. S.).—Mechanical engineering; civil engineering; sanitary engineering; electrical engineering; telephone engineering; agriculture; general science; biology; chemistry; physics; industrial art; pharmacy.

Short courses.—Agriculture (2 years); agriculture (10 weeks); horticulture (10 weeks); dairying (10 weeks); animal husbandry (10 weeks); pharmacy (2 years of 37 and 27 weeks, Ph. G.).

Other courses.—Graduate.

IOWA COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years.—Agronomy (B. S. A.); dairying (B. S. A.); animal husbandry (B. S. A.); horticulture (B. S. A.); science and agriculture (B. S. A.); mechanical engineering (B. M. E.); civil engineering (B. C. E.); electrical engineering (B. S.); mining engineering (B. S.); science as related to industries (B. S.); general and domestic science (B. S.); domestic science (B. D. S.); agricultural engineering (B. A. E.).

Short courses.—Dairying (1 year); dairying (16 weeks, January); dairying (2 weeks, January); corn and grain judging (2 weeks, January); stock judging (2 weeks, January); mining engineering (2 years); ceramics (2 years); good roads school (5 days, summer).

Other courses.—Graduate; veterinary medicine (4 years, D. V. M.).

KANSAS STATE AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—General science; agriculture; domestic science; mechanical engineering; electrical engineering; architecture; veterinary science.

Short courses.—Farm dairying (12 weeks, winter); dairying (12 weeks, winter); farmers' short course (2 years of 12 weeks each, winter); domestic science (2 terms of 12 weeks each).

Other courses.—Graduate; preparatory.

AGRICULTURAL AND MECHANICAL COLLEGE OF KENTUCKY.

Undergraduate courses of four years.—Letters (A. B.); science (B. S.); pedagogy (B. Ped.); mechanical and electrical engineering (B. M. E.); mining engineering (B. E. M.); civil engineering (B. C. E.); agriculture (B. Agr.).

Short courses.—Agriculture (2 years); agriculture (10 weeks, winter).

Other courses.—Graduate; preparatory (2 years).

KENTUCKY NORMAL AND INDUSTRIAL INSTITUTE FOR COLORED PERSONS.

Normal (3 years); normal (4 years of 2 terms each); preparatory (3 years); business (1 year); agriculture (3 years); mechanical (3 years); printing (3 years); domestic science (3 years); sewing (3 years).

LOUISIANA STATE UNIVERSITY.

Undergraduate courses of four years.—Agriculture (B. S.); mechanical engineering (B. S.); civil engineering (B. S.); electrical engineering (B. S.); general science (B. S.); pre-medical; commerce (A. B.); Latin-scientific (A. B.); literary (A. B.).

Short courses.—Agriculture (2 years); agriculture (10 weeks, winter).

Other courses.—Sugar engineering (5 years, B. S.); preparatory (1 year); graduate.

SOUTHERN UNIVERSITY (LOUISIANA).

Classical (4 years); scientific (4 years); normal (3 years); high school (4 years); grammar school (3 years); agriculture (4 years); manual training (3 years); tinsmithing (3 years); printing (4 years); bookkeeping (2 years); typewriting (1 year); sewing (4 years); music (5 years).

UNIVERSITY OF MAINE.

Undergraduate courses of four years.—Classical (A. B.); scientific (B. S.); chemical (B. S.); agriculture (B. S.); horticulture (B. S.); forestry (B. S.); civil engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); mining engineering (B. S.); pharmacy (B. S.).

Short courses.—Agriculture (1 year); agriculture (2 years); agriculture, dairying, and horticulture (8 weeks, winter); horticulture (3 weeks, spring); poultry management (3 weeks); pharmacy (2 years, Ph. C.).

Other courses.—Graduate; law.

MARYLAND AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; civil engineering; mechanical engineering; scientific.

Short courses.—Agriculture (10 weeks, winter); agriculture (2 years); creamery.

Other course.—Preparatory.

MASSACHUSETTS AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; horticulture; biology; chemistry; mathematics; landscape gardening.

Short courses.—Dairy farming (10 weeks); horticulture (10 weeks); bee culture (2 weeks); agriculture for women (2 years).

Other courses.—Graduate.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY.

Undergraduate courses of four years (B. S.).—Civil engineering; mechanical engineering; mining engineering and metallurgy; architecture; architectural engineering; landscape architecture; general science; chemistry; electrical engineering; biology; physics; electro-chemistry; chemical engineering; sanitary engineering; geology; naval architecture.

Other courses.—Graduate.

MICHIGAN AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; mechanical engineering; forestry; women's course.

Short courses.—Cheese making (4 weeks); creamery management (8 weeks); general farming and live stock (8 weeks); fruit culture (8 weeks).

Other courses.—Graduate.

UNIVERSITY OF MINNESOTA.

Undergraduate courses of four years.—General culture courses (A. B.); chemistry (B. S.); civil engineering (C. E.); municipal engineering (C. E.); mechanical engineering (M. E.); electrical engineering (E. E.); science and technology (B. S., and at end of fifth year professional degree); mining engineering (E. M.); metallurgy (Met. E.); agriculture (B. S.); forestry (B. S.); home economics (B. S.).

Short courses.—Agriculture (secondary, 3 years); agriculture (8 weeks); dairying (4 weeks, winter).

Other courses.—Graduate; law; medicine and surgery; homeopathic medicine and surgery; dentistry; pharmacy.

MISSISSIPPI AGRICULTURAL AND MECHANICAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; horticulture; dairy husbandry; veterinary science; mechanical and electrical engineering; civil engineering; geology and mining engineering; textile; industrial pedagogy.

Short courses.—Agriculture (10 weeks, winter); practical working boys' course in agriculture (1 year); cotton manufacturing course (2 years); textile chemistry and dyeing (2 years); industrial pedagogy (6 weeks).

Other courses.—Preparatory; graduate.

ALCORN AGRICULTURAL AND MECHANICAL COLLEGE (MISSISSIPPI).

Undergraduate course of four years (B. S.).—Scientific.

Industrial courses.—Shoemaking (3 years); agriculture (7 years); agriculture (2 years); carpentry (3 years); blacksmithing (4 years); painting (3 years); nursing (3 years); sewing (4 years); domestic science (4 years); laundering.

Other courses.—Preparatory (2 years); graded course (3 years).

UNIVERSITY OF MISSOURI.^a

Undergraduate courses of four years.—General culture courses (A. B.); education (B. S.); agriculture (B. S.); civil engineering (B. S.); electrical engineering (B. S.); mechanical engineering (B. S.); sanitary engineering (B. S.); chemical engineering, (B. S.); hydraulic engineering (B. S.).

Short courses.—Plant production (12 weeks, winter); dairying (12 weeks, winter); animal husbandry (12 weeks, winter); agriculture and horticulture (summer).

Other courses.—Graduate; law; medicine; pedagogy, elementary and advanced courses.

MISSOURI SCHOOL OF MINES AND METALLURGY.

Undergraduate courses of four years (B. S.).—Mining engineering; civil engineering; chemistry and metallurgy; general science.

Short courses.—Chemistry and assaying (2 years); mining (2 years); electricity (2 years); surveying (1 year and 1 term).

LINCOLN INSTITUTE (MISSOURI).

College course (4 years, A. B.); normal (4 years); subnormal (3 years); model and training department.

Industrial courses.—Carpentry (3 years); blacksmithing (3 years); machinery (3 years); sewing (3 years); cooking (1 year); laundry (1 year); printing; typewriting; agriculture.

MONTANA COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years.—General science (B. S.); agriculture (B. S. A.); domestic science (B. S.); mechanical engineering (B. M. E.); electrical engineering (B. E. E.); civil engineering (B. C. E.).

Short courses.—Secondary course (3 years) in agriculture or domestic science; domestic science (1 year); agriculture (2 years of 18 weeks each, winter); engineering (2 years of 18 weeks each, winter).

Other courses.—Graduate; preparatory (3 years); business (1 year); music; art.

UNIVERSITY OF NEBRASKA.

Undergraduate courses of four years.—General culture (A. B.); general science (B. S.); pre-medical (B. S.); general agriculture (B. S.); forestry (B. S.); agriculture and chemistry (B. S.); botany and agriculture (B. S.); botany and zoology (B. S.); chemistry and physics (B. S.); horticulture and botany (B. S.); mathematics and physics (B. S.); zoology and philosophy (B. S.); chemistry and domestic science (B. S.); technical agriculture or horticulture (B. S.); civil engineering (B. S.); electrical engineering (B. S.); mechanical engineering (B. S.); chemical engineering (B. S.); mining engineering (B. S.).

Short courses.—Agriculture (secondary course, 3 years of 24 weeks each); agriculture (9 weeks, winter); dairying (9 weeks, winter); stock and grain judging (1 week); domestic science (2 years); mechanic arts (2 years); physical education (2 years).

Other courses.—Graduate; preparatory; law; medicine; music; art.

NEVADA STATE UNIVERSITY.

Undergraduate courses of four years.—Agriculture (B. S.); liberal arts (A. B.); general science (B. S.); mining engineering (B. S.); civil engineering (B. S.); mechanical engineering (B. S.).

^a Not including Missouri School of Mines and Metallurgy.

Short courses.—(January and February).—Agriculture; dairying; domestic arts and science.

Other courses.—Preparatory (3 years); commercial (3 years); normal; graduate; domestic arts and science.

NEW HAMPSHIRE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years (B. S.).—Agriculture; agriculture (biological division); agriculture (chemical division); mechanical engineering; electrical engineering; technical chemistry; general course.

Short courses.—Agriculture (2 years); agriculture (10 weeks, winter); dairying (10 weeks, winter).

Other courses.—Graduate.

RUTGERS SCIENTIFIC SCHOOL (NEW JERSEY).

Undergraduate courses of four years (B. S.).—Agriculture; civil engineering and mechanics; chemistry; electricity; biology; clay working and ceramics.

Short course.—Clay working and ceramics (2 years).

NEW MEXICO COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years (B. S.).—General course; agriculture; mechanical engineering; domestic science.

Short courses.—Agriculture (2 years); agriculture and horticulture (12 weeks given in each term of the college year); practical mechanics (2 years).

Other courses.—Graduate; preparatory (5 years); stenography and typewriting (1 year).

CORNELL UNIVERSITY (NEW YORK).

Undergraduate courses of four years.—General culture courses (A. B.); agriculture (B. S. A.); architecture (B. Arch.); civil engineering (C. E.); mechanical engineering (M. E.); electrical engineering (M. E.); naval architecture (M. E.); marine engineering (M. E.); railway mechanical engineering (M. E.).

Short courses.—Agriculture (2 years); agriculture (11 weeks, winter); dairying (11 weeks, winter); poultry (11 weeks, winter); nature study (2 years); architecture (2 years).

Other courses.—Graduate; law; medicine; veterinary.

NORTH CAROLINA COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years.—Agriculture (B. Agr.); civil engineering (B. E.); mechanical engineering (B. E.); electrical engineering (B. E.); mining engineering (B. E.); industrial chemistry (B. S.); textile industry (B. E.); dyeing (B. S.).

Short courses.—Agriculture (2 years); agriculture and dairying (10 weeks, winter); mechanic arts (2 years); applied electricity (2 years); textile industry (2 years); courses for rural teachers (2 years; 1 year; summer); courses for city teachers (2 years; 1 year; summer).

Other courses.—Graduate.

AGRICULTURAL AND MECHANICAL COLLEGE FOR THE COLORED RACE (NORTH CAROLINA).

Undergraduate courses of four years.—Agriculture (B. Agr.); trades (B. S.).

Short course.—Dairying (6 weeks, winter).

NORTH DAKOTA AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—General science; agriculture; mechanical engineering; pharmaceutical chemistry.

Short courses.—Agriculture (3 years of 5 months each); agriculture (two courses of 12 weeks each); steam engineering (2 years); pharmacy (2 years); domestic science (2 years); domestic science (12 weeks); teachers' nature study (2 years).

Other courses.—Preparatory; graduate; music.

OHIO STATE UNIVERSITY.

Undergraduate courses of four years.—Agriculture (B. S.); horticulture and forestry (B. S.); domestic science (B. S.); general culture (A. B.); civil engineering (C. E.); mining engineering (E. M.); mechanical engineering (M. E.); electrical engineering (M. E.); ceramics (E. M.); manual training (B. S.); industrial arts (B. S.); chemical engineering (B. S.); architecture (C. E.); pharmacy (B. S.).

Short courses.—Agriculture (2 years); dairying (12 weeks, winter); domestic science (2 years); mining (2 years); clay working and ceramics (2 years); industrial arts (2 years); pharmacy (2 years).

Other courses.—Graduate; law; veterinary.

OKLAHOMA AGRICULTURAL AND MECHANICAL COLLEGE.

Undergraduate courses of five years (B. S.).—General science; agriculture; civil engineering; mechanical engineering.

Short courses.—Agriculture or domestic economy (2 years of 20 weeks each); agriculture, horticulture, and mechanic arts (8 weeks, winter); dairying (8 weeks, winter); stock and grain judging (1 week); printing.

Other course.—Business (1 year).

COLORADO AGRICULTURAL AND NORMAL UNIVERSITY (OKLAHOMA).

Undergraduate courses of four years.—Classical (A. B.); scientific (B. S.); normal (B. S. D.); architecture (M. E.); electrical and mechanical engineering (M. E.); agriculture (B. S. A.).

Other courses.—Elementary (6 years); preparatory (3 years); music (3 years); blacksmithing (3 years); carpentry (3 years); machinist (3 years); commercial (3 years); sewing (5 years); millinery (1 year).

OREGON STATE AGRICULTURAL COLLEGE.

Undergraduate courses of four years (B. S.).—Agriculture; household science; mechanical engineering; electrical engineering; pharmacy; mining engineering; literary commerce.

Short courses.—Mining (2 years); agriculture (10 days, winter); dairying (8 weeks, winter); pharmacy (2 years).

Other courses.—Preparatory (1 year); music; graduate.

PENNSYLVANIA STATE COLLEGE.

Undergraduate courses of four years.—General science (B. S.); classical (A. B.); Latin-scientific (B. S.); philosophy (B. S.); modern languages and literature (B. L.); agriculture (B. S.); biology (B. S.); chemistry (B. S.); industrial chemistry (B. S.); civil engineering (B. S.); electrical engineering (B. S.); mathematics (B. S.); mechanical engineering (B. S.); mining engineering (B. S.); metallurgical engineering (B. S.); physics (B. S.).

Short courses.—Agriculture (12 weeks, winter); creamery (8 weeks, winter); chemistry (2 years); mechanic arts (2 years); mining (2 years).

Other courses.—Preparatory (1 year); graduate; correspondence courses in agriculture.

RHODE ISLAND COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

Undergraduate courses of four years (B. S.).—General science; agriculture; mechanical engineering; electrical engineering; highway engineering; chemistry; biology.

Short courses.—Agricultural high school (2 years); farm mechanics (12 weeks, winter); farm practice (6 weeks); poultry (6 weeks). Industrial courses of 2 years: Carpentry; drafting; machine shop; steam engineering.

Other course.—Preparatory (2 years).

CLEMSON AGRICULTURAL COLLEGE (SOUTH CAROLINA).

Undergraduate courses of four years (B. S.).—Agriculture; agriculture and animal industry; mechanical and electrical engineering; civil engineering; metallurgy and geology; textile industry.

Short course.—Textile (2 years).

Other course.—Preparatory (1 year).

COLORADO NORMAL, INDUSTRIAL, AGRICULTURAL, AND MECHANICAL COLLEGE (SOUTH CAROLINA).

Undergraduate courses of four years.—General college course (A. B.); agriculture (B. Agr.); mechanical (B. S.).

Industrial courses.—Sewing; cooking; carpentry and woodwork; bricklaying and plastering; architecture; mechanical drawing and painting; ironworking and machin-

ery; housekeeping; farming; upholstering and cabinetmaking; saddlery; harness making and shoemaking; sawmilling and manufacture of hard and soft lumber; typewriting; tailoring.

Other courses.—Preparatory and normal (5 years); model school (5 grades); art; music.

SOUTH DAKOTA AGRICULTURAL COLLEGE.

Undergraduate courses of four years.—Scientific agriculture (B. Agr.); horticulture (B. S.); domestic science (B. S.); general science (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); civil and agricultural engineering (B. S.); pharmacy (B. S.).

Short courses.—Agriculture (2 years); agriculture (6 weeks, winter); butter making (12 weeks, winter); domestic dairying (12 weeks, fall); cheese making (12 weeks, spring); horticulture (12 weeks, winter); steam engineering (24 weeks); domestic science (12 weeks, winter); pharmacy (2 years, Ph. G.); teachers' course (3 years).

Other courses.—Preparatory; music; art; business (1 year); amanuensis (1 year).

UNIVERSITY OF TENNESSEE.

Undergraduate courses of four years.—Agriculture (B. S. A.); civil engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); mining engineering (B. S.); chemical engineering (B. S.); pharmacy (B. S.); literary (A. B.); scientific (B. S.).

Short courses.—Agriculture (2 years); agriculture, animal husbandry, dairying, and horticulture (10 weeks, winter); pharmacy (2 years, Ph. C.); preliminary medical (2 years).

Industrial department for colored students.—Agriculture; carpentry; printing; sewing; cooking; electricity; brickmaking; baking; mechanical; blacksmithing; wheelwrighting.

Other courses.—Graduate; law; medicine; dentistry.

AGRICULTURAL AND MECHANICAL COLLEGE OF TEXAS.

Undergraduate courses of four years (B. S.).—Agriculture (farm husbandry); agriculture (plant husbandry); agriculture (animal husbandry and dairy husbandry); mechanical engineering; civil engineering; textile engineering; electrical engineering; architectural engineering.

Short courses.—Agriculture (10 weeks, winter); manual training (8 weeks).

Other courses.—Graduate.

PRAIRIE VIEW STATE NORMAL AND INDUSTRIAL COLLEGE (TEXAS).

College course (6 years, A. B.) with instruction in practical industries: Agriculture; dairy husbandry; horticulture; broom making; mattress making; butchering; wood-working; ironwork; shoemaking; tailoring; sewing; millinery; cooking; laundry; music.

AGRICULTURAL COLLEGE OF UTAH.

Undergraduate courses of four years (B. S.).—Agriculture; mechanical engineering; civil engineering; domestic science; commerce; general science.

Short courses.—Agriculture (3 years); domestic science (3 years); commerce (3 years); agriculture (4 weeks, winter); domestic arts (12 weeks, winter); mechanic arts (12 weeks).

Other courses.—Preparatory (2 years); manual training in domestic arts (4 years); manual training in mechanic arts (4 years); engineering preparatory (2 years).

UNIVERSITY OF VERMONT AND STATE AGRICULTURAL COLLEGE.

Undergraduate courses of four years.—Classical (A. B.); literary-scientific (Ph. B.); civil engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); chemistry (B. S.); agriculture (B. S.); commerce and economics (B. S.).

Short courses.—Agriculture (1 or 2 years); dairying (winter).

Other course.—Medicine.

VIRGINIA AGRICULTURAL AND MECHANICAL COLLEGE AND POLYTECHNIC INSTITUTE.

Undergraduate courses of four years (B. S.).—Agriculture; horticulture; applied chemistry; preparatory medicine and veterinary science; applied geology; general science; civil engineering; mechanical engineering; electrical engineering.

Short courses.—Practical agriculture (2 years); practical mechanics (2 years).

Other courses.—Graduate.

HAMPTON NORMAL AND AGRICULTURAL INSTITUTE (VIRGINIA).

Academic course (4 years); agriculture (3 years).

Trade courses (three years).—Carpentry; painting; bricklaying and plastering; house building; wheelwrighting; blacksmithing; machinist; steam engineering; harness making and carriage trimming; shoemaking; tailoring; cabinetmaking; tin-smithing; printing; upholstering.

Graduate courses.—Agriculture (3 years); business (1 year); domestic science (2 years); library methods; matrons' course (1 or 2 years); public school teaching.

WASHINGTON AGRICULTURAL COLLEGE AND SCHOOL OF SCIENCE.

Undergraduate courses of four years.—Mathematics and civil engineering; chemistry; botany; zoology; agriculture; English language and literature; economic science and history; mechanical engineering; electrical engineering; modern languages; mining engineering; geology; domestic economy; pharmacy.

Short courses.—Agriculture (3 years, secondary); winter school for farmers (8 weeks); summer science school (6 weeks); dairying (8 weeks); artisans (1 year).

Other courses.—Pharmacy (2 years, Ph. G.); veterinary (3 years, D. V. S.); business (2 years); stenography and typewriting (2 years); telegraphy (1 year); preparatory (3 years); music; art.

WEST VIRGINIA UNIVERSITY.

Undergraduate courses of four years.—General culture (A. B. or B. S.); pharmacy (B. S.); civil and mining engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); agriculture (B. S. A.).

Short courses.—Agriculture (2 years); agriculture (1 year); agriculture (12 weeks, winter); animal industry (12 weeks, winter); horticulture (12 weeks, winter); poultry industry (12 weeks); dairying (12 weeks); manual training; mechanic arts.

Other courses.—Graduate; law; medicine; fine arts; music; business (2 years); preparatory (4 years).

WEST VIRGINIA COLORED INSTITUTE.

Preparatory (1 year); normal (4 years); agriculture (4 years).

Industrial courses.—Carpentry (4 years); machinery woodworking (4 years); blacksmithing (4 years); brickmasonry and plastering (3 years); wheelwrighting (4 years); steamfitting and plumbing; sewing (3 years); dressmaking (2 years); millinery (2 years); cooking (3 years); printing (4 years); music.

UNIVERSITY OF WISCONSIN.

Undergraduate courses of four years.—General culture courses (A. B.); pre-medical (A. B.); commerce (A. B.); pharmacy (B. S.); home economics (A. B.); civil engineering (B. S.); sanitary engineering (B. S.); mechanical engineering (B. S.); electrical engineering (B. S.); applied electro-chemistry (B. S.); general engineering (B. S.); pre-mining engineering (B. S.); agriculture (B. S.).

Short courses.—Agriculture (2 years of 14 weeks each, winter); dairying (12 weeks, winter); dairying (summer); farmers' course (2 weeks); pharmacy (2 or 3 years, Ph. G.); philosophical course for normal school graduates (2 years, Ph. B.).

Other courses.—Graduate; law; music.

UNIVERSITY OF WYOMING.

Undergraduate courses of four years.—Liberal arts (A. B. or B. S.); agriculture (B. S.); mechanical engineering (B. S.); mining engineering (B. S.); irrigation engineering (B. S.); normal (A. B.).

Short courses.—Agriculture (2 years); agriculture (1 year); mining (6 weeks); normal (2 years, B. Ped.).

Other courses.—Preparatory (3 years); graduate; business (2 years); stenography (2 years); music.

TABLE 1.—Statistics of colleges of agriculture and the mechanic arts endowed by acts of Congress approved July 2, 1862, and August 30, 1890.

	Institution.	President.	Date of opening of institution.	Acres of land allotted to State under act of July 2, 1862.		Acres in farm and grounds.	Acres under cultivation.	Acres used for experiments.	Library.	
				4	5	6	7	8	Volumes.	Pamphlets.

CHAPTER XXII.

PROFESSIONAL SCHOOLS.

INCLUDING LEGAL REQUIREMENTS FOR THE PRACTICE OF MEDICINE AND DENTISTRY IN THE DIFFERENT STATES OF THE UNION.

In the 156 theological schools and departments in 1904-5 there were enrolled 7,411 men as students, an increase of 206 over the number in 1903-4. The number of students having a literary degree was 2,528, a little more than one-third. The number completing theological courses was 1,518.

In the 96 schools of law there were enrolled 14,714 students, an increase of 408 over the number the previous year. The number of law students reported as having a literary degree was 3,220, less than 22 per cent; but the proportion was probably larger. The number of graduates in law was 3,435.

The number of medical schools was 148, or 4 less than in 1903-4. The whole number of medical students was 25,835, or 1,114 less than in the previous year. The number graduating was 5,444.

The 54 dental schools enrolled 7,149 students, 176 less than in 1903-4, and it will be remembered that in 1903-4 there was a decrease of nearly 1,000 from the previous year, a decrease supposed to be due to the adoption of a four-year course, which was discarded after one year's trial.

In the 67 schools of pharmacy there were 4,944 students, an increase of 487; and in the 12 veterinary schools there were 1,269 students, an increase of 474.

In regard to the total value of grounds and buildings of professional schools, and as to endowments, nothing definite has been ascertained, inasmuch as many of these schools are departments of universities and can not be separately valued. Therefore the figures given for the aggregates of these items are smaller than they would be if all the schools were reported. The total value of grounds and buildings of theological schools reported was over 15 millions of dollars, of medical schools over 13½ millions, of law schools over 2½ millions, of dental and pharmaceutical schools about 1 million each.

The endowment funds of theological schools aggregate over 23 millions of dollars, of law and medical schools about 1½ millions each, and of dental and pharmaceutical schools practically nothing.

Benefactions of nearly 2 millions of dollars were bestowed upon theological schools, and some valuable gifts were bestowed upon medical schools, but not all of the latter were officially reported.

By an examination of Table 2, showing the number of students in the different professions at different periods, it will be seen that the number of theological students has been stationary for many years, sometimes even decreasing. On the contrary, the number of students in medicine has increased very largely, rising from

about 12,000 in 1880 to over 25,000 in 1900. One would infer from this that the number of clergymen was not keeping up with the growth in population, but that the number of physicians was increasing more rapidly than the general population. Upon examination of the reports of the United States Census Office for 1900 on Population (Vol. 1, p. XIX) and Occupations (p. I) it will be seen that this inference is by no means correct. It will be found by computation that the number of clergymen increased at a greater rate than the population during the period from 1880 to 1900. In 1880 there was one clergyman to every 775 of population in continental United States (that is, including Indian Territory, but excluding Hawaii and Alaska), while in 1900 the number of clergymen had increased so that there was one clergyman to every 681 of the population. Of physicians and surgeons, there was one in 1880 for every 585 of the general population, and in 1900, although the number of students had doubled in the meantime, there was still only one physician to every 576 of population. Although the number of law students was quadrupled during the twenty years from 1880 to 1900, rising from 3,000 to over 12,000, the number of lawyers did not increase so fast, there being one lawyer to every 782 of population in 1880 and one to every 665 in 1900.

The question, then, arises, Why is it that while the number of theological students remains stationary for years, the proportion of clergymen increases, but on the contrary while the number of medical students largely increases, the proportion of physicians (and to some extent of lawyers) remains nearly stationary? Probably this question would be answered differently by different persons. One thought suggested is that a larger number of physicians and of lawyers drop out into other pursuits than among clergymen. Again, it should be remembered that many young men, especially in the South, are added to the number of clergymen and of lawyers without having undergone a regular professional training.

In dentistry, however, no such apparent inconsistency arises, for here we have a large increase in both the number of students and in the ratio of dentists to population. In 1880 there was one dentist to every 4,073 persons in the United States; in 1900 there was one to every 2,565 of population.

REQUIREMENTS FOR THE PRACTICE OF MEDICINE.

The laws of the various States establish certain requirements in order to practice medicine, and in some of the States the medical examining boards are authorized to make additional regulations, and especially to determine what medical schools shall be recognized as reputable. The regulations given below have been ascertained mainly from the published statutes of the various States, and are brought down to as late a date as possible, some of them having been enacted during the year 1907. On account of the frequent changes made in the requirements, the name of the secretary of a medical board in each State has been given, to whom application for information may be made by persons desiring medical licenses. Mention has not been made of the general requirements that the applicant shall be 21 years of age and of good moral character.

The States have been distributed in certain general groups, according to the severity of the requirements for medical practice. It is not claimed, however, that all in any given group are on the same footing; on the contrary, it is probably the case that the examination is much more rigorous in some States than in others, and again, that some medical boards make much greater demands of medical colleges in order to secure recognition than do other boards. Some boards recognize any medical school having a course of four years, while another board insists that a medical college seeking recognition shall admit as students none but graduates of recognized high schools having courses of four years (or having an equivalent education), that the medical course shall consist of four years of nine months each, that the number of hours of instruction given in the four terms shall not be less than 3,600, that the college shall possess adequate laboratory and teaching equipment and ample hospital facilities, and that the salaries of the professors shall not be dependent upon the graduation of students.

The general classification is as follows:

A.—CLASSIFICATION.

I. Examination, diploma of a recognized medical college, and a certain amount of general education are required in Colorado, Delaware, Louisiana, Maryland, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, South Carolina, Vermont, and Wisconsin—13.

II. Examination and diploma of a recognized medical college are required in California, District of Columbia, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kentucky,^a Maine, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Oklahoma, the Philippines, Porto Rico, South Dakota, Utah, Washington, and Wyoming—22.

III. Examination and medical diploma are required in Arizona,^b Connecticut, Rhode Island, and Virginia—4.

IV. Examination only is required in Alabama,^c Arkansas, Hawaii, Kansas,^d Massachusetts, Minnesota,^d Mississippi, Missouri, Oregon, Tennessee, Texas, and West Virginia—12.

V. Examination or a diploma of a recognized medical college is required in Indian Territory and Nevada—2.

^a But students of Kentucky medical colleges graduating prior to September 1, 1907, and making application prior to January, 1908, shall be licensed without examination.

^b Applicant must be a resident of Arizona.

^c If the examination is before a county board, a diploma of a medical college will also be required.

^d Applicants must have studied medicine four periods of six months each.

B.—SYNOPSIS.

Alabama.—An examination is required before the State board of examiners or an examination and a recognized diploma before one of the county boards (fee \$10). Dr. W. H. Sanders, Montgomery.

Alaska.—No requirement except payment of a license fee by itinerant physicians.

Arizona.—The requirements are (1) a medical diploma, (2) an examination, and (3) residence in Arizona. No provision for accepting licenses of other States. Fee \$10, in addition to \$2 at time of making application. Dr. Ancil Martin, Phoenix.

Arkansas.—An examination only is required (fee \$10). No provision for recognizing certificates of other States. (Acts of February 17 and March 24, 1903.) Dr. Fred T. Murphy, Brinkley.

California.—An examination is required and the applicant must have graduated from a medical college having requirements equal to those prescribed by the Association of American Medical Colleges (fee \$20). Certificates of other States with equal standards may be accepted. (Act of February 27, 1901.) Dr. Charles L. Tisdale, San Francisco.

Colorado.—All applicants for a license must pass an examination or must possess such educational qualifications as the State board of medical examiners may deem necessary, but not less than "four full courses of instruction in four separate years in a reputable medical school" shall be required. The board requires that all applicants exempted from examination shall be graduates of medical colleges which require for matriculation graduation from a high school having a four-year course, or equivalent preliminary attainments, and which have not less than 3,600 hours of instruction in the four medical terms, and which possess ample laboratory and hospital facilities, and in addition the applicant must have been licensed in some other State. Each applicant must pay a fee of \$25, two-fifths of which is returned if the license is not granted. (Act approved April 20, 1905.) Dr. S. D. Van Meter, 1723 Tremont street, Denver.

Connecticut.—An examination and a medical diploma are required (fee \$15). Certificates of other States may be accepted. (General Statutes, revision of 1902, and act of 1903.) Dr. C. A. Tuttle, New Haven.

Delaware.—An applicant for a license must have a competent common school education and a diploma from a medical college; must have studied medicine four years and taken three regular courses of lectures prior to graduation, and must pass an examination (fee \$10, which shall be returned in case of failure to pass the examination). Certificates of other States with equal standards may be accepted (the fee in such case being \$50). (Acts of April 18, 1895, and March 16, 1899.) Dr. P. W. Tomlinson, Wilmington.

District of Columbia.—The requirements are an examination and a medical diploma after study of medicine three years if the diploma was granted prior to June 30, 1898, or four years if granted after that date (fee \$10). Certificates of other States may be accepted under certain conditions. (Act of Congress, June 3, 1896.) Dr. G. C. Ober, Washington.

Florida.—Examination and diploma of a recognized medical college (fee \$15). No provision for accepting certificates of other States. (Acts of May 17, 1895, May 4, 1899, and May 15, 1905.) Dr. J. D. Fernandez, Jacksonville.

Georgia.—Examination and graduation from a medical school requiring not less than three courses of six months each (fee \$10). Certificates of other States may be accepted. (Acts of December 12, 1894, and August 13, 1904.) Dr. E. R. Anthony, Griffin.

Hawaii.—An examination is required (fee \$10). No provision for accepting certificates of other examining boards. (Revised Laws, 1905.) Dr. L. E. Pinkham, Honolulu.

Idaho.—An examination and a diploma of a medical college in good standing (fee \$25). (Act of March 3, 1899.) Dr. J. L. Conant, jr., Genesee.

Illinois.—Diploma of a recognized medical college and an examination (fee \$10, and \$5 additional for the certificate, if issued). Certificates of other States may be accepted. (Revised Statutes, 1899.) Dr. J. A. Egan, Springfield.

Indian Territory.—An examination is required (fee \$10) or a diploma of a recognized medical college (fee \$1). No provision for reciprocity of licensure. (Act of Congress approved April 23, 1904.) Secretary of the central district, Dr. J. B. Smith, Durant.

Indiana.—Diploma of a reputable medical college and an examination (fee \$25). Certificates of other States may be accepted. Dr. W. T. Gott, Indianapolis.

Iowa.—Examination and a diploma of a recognized medical college (fee \$10). Certificates of other States may be accepted (fee \$25.) (Annotated supplement to the Code, 1902, chapter 17; and amendments of March 15, 1904, and March 30, 1906.) Dr. Louis A. Thomas, Des Moines.

Kansas.—Applicants who have studied medicine four periods of six months each are licensed after an examination (fee \$15), or they may, in the discretion of the board, be licensed on a diploma of a reputable medical college (fee \$10). Certificates of other States may be accepted. (Act of March 22, 1901.) Under date of March 20, 1903, the State board announced that "No registration will be made on diplomas or certificates from other State boards." Dr. F. P. Hatfield, Grenola.

Kentucky.—Diploma of a reputable medical college and an examination (fee \$10), but "all students who are matriculated in any medical or osteopathic college in this Commonwealth on or before February 1, 1904, and shall have graduated prior to September 1, 1907, and make application to the board prior to January, 1908, shall receive certificates without examination." (Carroll's statutes, 1903, chap. 85, art. 1, and amendment of 1904.) Dr. J. N. McCormack, Bowling Green.

Louisiana.—The requirements are (1) "a fair primary education," (2) a diploma of a recognized medical college, and (3) an examination. The fee for examination is \$10, one-half to be returned if no certificate is granted, and there is an additional fee of \$1 for a certificate. No provision for recognizing licenses of other States. (Act approved July 4, 1894.) Dr. F. A. Larue, 624 Gravier street, New Orleans.

Maine.—Diploma of a recognized medical college and an examination (fee \$10). Certificates of other States may be accepted. (Rev. Stat., 1903.) Dr. Wm. J. Maybury, Saco.

Maryland.—The requirements are (1) "a competent common school education;" (2) a diploma from a medical college requiring a four-years' course, or a diploma or license conferring full right to practice in some foreign country, and (3) an examination (fee \$20). Certificates of other States may be accepted. (Act approved April 11, 1902.) Dr. J. M. Scott, Hagerstown.

Massachusetts.—An examination is required (fee \$20). No provision for recognizing certificates of other States. (Revised laws, January 1, 1902.) Dr. E. B. Harvey, State House, Boston.

Michigan.—The applicant for a certificate shall (1) have "a diploma from a recognized and reputable high school, academy, college, or university having a classical course," or shall pass a preliminary examination; and (2) he shall be a graduate of a recognized medical college having at least a four years' course of seven months each; and (3) he shall pass an examination. The fee is \$25, except to graduates of an approved medical school in Michigan, who pay \$10 only.^a Certificates of other States may be accepted. (Act approved June 9, 1903.) Dr. B. D. Harison, Detroit.

Minnesota.—The requirements are attendance at a recognized medical college during four full courses of twenty-six weeks each, no two courses in the same year,

^a Students registered in approved medical colleges of Michigan on January 1, 1905, shall not be required to stand the examination.—Amendment of June, 1905.

and an examination (fee \$10). Provision for recognition of other State licenses. (Acts of April 22, 1895, and April 18, 1905.) Dr. W. S. Fullerton, St. Paul.

Mississippi.—An examination is required (fee \$10.25). (Chapter 104, Annotated Code of 1892.) Dr. J. F. Hunter, Jackson.

Missouri.—Satisfactory preliminary qualifications and an examination (fee \$15). Provision for recognizing the certificates of other States. But students matriculated prior to March 12, 1901, shall be granted a license on presentation of a diploma of any medical college of Missouri (fee \$15). (Law as amended April 10, 1905.) Dr. J. B. Adcock, Warrensburg.

Montana.—The requirements are an examination (fee \$15) and a diploma of a recognized medical college, and if graduated since July 1, 1898, attendance upon four courses of at least six months each. Certificates of other States may be accepted. (Act of February 23, 1903.) Dr. Wm. C. Riddell, Helena.

Nebraska.—An examination and diploma of a medical school in good standing and which requires a preliminary examination for admission and attendance on four courses of six months each, but the requirement of four years shall not apply to those who graduated prior to August, 1898. Fee for a license to graduates of medical colleges in Nebraska, \$10; to all others, \$25. Certificates of other States may be accepted. (Cobbey's Annotated Statutes, 1903, secs. 9416-9433.) Dr. George H. Brash, Beatrice.

Nevada.—Certificates are granted to graduates of recognized medical colleges; also to graduates of other medical colleges who pass a satisfactory examination. Fee for certificate, \$25. Certificates of other States may be accepted. (Act of March 4, 1905.) Dr. S. L. Lee, Carson City.

New Hampshire.—The requirements are a high school education, attendance on four courses of at least six months each in a registered medical school, graduation from a registered medical school or a license to practice in some foreign country, and an examination (fee \$10). Certificates of other States having equal standards may be accepted. (Act of 1897 as amended April 2, 1903.) Holders of diplomas of Dartmouth Medical College issued between the enactment of the medical law in March, 1897, and January 1, 1903, may receive a license on presentation of the diploma. Dr. Henry C. Morrison, Concord.

New Jersey.—The requirements are (1) graduation from a high school having a course of four years, or an equivalent academic education; (2) graduation from a medical college recognized by the board, or a license to practice in some foreign country; (3) attendance upon four courses of at least seven months each prior to receiving the medical degree, and (4) an examination (fee \$25). Applicants examined and licensed by, or who have been members of, examining boards of other States may be licensed without examination upon payment of a fee of \$50; (Acts of 1894 and 1903.) Dr. John W. Bennett, Long Branch.

New Mexico.—Graduates of a recognized medical school are licensed after examination or after two years' practice; graduates of other medical colleges who have served an internship in a good hospital or who have taken a six months' postgraduate course or who have practiced three years are licensed after examination (fee \$25). Certificates of other States may be accepted. (Act of 1907.) Dr. D. B. Black, Las Vegas.

New York.—The applicant for a license must (1) have the general education required; (2) have attended four courses of at least six months each; (3) have graduated from a registered medical college or hold a license to practice in some foreign country, and (4) must pass an examination (fee \$25). Certificates of other States may be accepted. (Chap. 661, laws of 1893 as amended in 1901 and 1902.) C. F. Wheelock, education department, Albany.

North Carolina.—An applicant for a license must (1) present a diploma of an approved medical college or a license to practice in some other State, and (2) pass an examination (fee \$10). (Act of 1899.) Dr. G. T. Sikes, Grissom.

North Dakotā.—Attendance on four courses of eight months each, diploma of a recognized medical college, and an examination (fee \$20). Certificates of other States may be accepted. Dr. H. M. Wheeler, Grand Forks.

Ohio.—High school education, graduation from a recognized medical college, or license to practice in some foreign country, and an examination (fee \$25). Certificates of other States may be accepted. (Act of March 19, 1906.) Dr. George H. Matson, Columbus.

Oklahoma.—Graduation from a reputable medical college and an examination (fee \$5). (Act of March 12, 1903.) Dr. J. W. Baker, Enid.

Oregon.—An examination is required (fee \$10), but applicants who have been licensed in other States after examination may be excused from examination. (Act approved February 17, 1903.) Dr. Byron E. Miller, Portland.

Pennsylvania.—The requirements are (1) a competent common school education; (2) medical diploma (if granted after July 1, 1895, holder must have studied medicine four years and attended three courses of lectures) or license to practice in some foreign country, and (3) an examination (fee \$25). Certificates of other States with equal standards may be accepted (fee \$15). (Act of May 18, 1893.) Dr. Joseph E. Willets, Pittsburg.

Philippines.—Diploma of a recognized medical college and an examination (fee \$15). (Act of December 4, 1901.) Dr. R. E. L. Newberne, Manila.

Porto Rico.—Diploma of a recognized medical college and an examination (fee \$25). Certificates granted by State boards after examination may be accepted. Dr. Wm. F. Smith, San Juan.

Rhode Island.—A certificate may be granted "to any reputable physician" who passes a satisfactory examination (fee for the examination, \$10, "and not more than \$2 shall be charged for a certificate"). (Law as amended November, 1901.) Dr. G. T. Swarts, Providence.

South Carolina.—An examination is required and to be eligible to examination the applicant must have a preliminary education equivalent to the possession of a teacher's first-grade certificate and, unless graduated prior to March 4, 1905, must have attended four courses of at least twenty-six weeks each before graduation. Certificates of other States with equal standards may be accepted. Fee for examination \$10, one-half of which shall be returned if a certificate is not granted. (Act of March 4, 1905.) Dr. W. M. Lester, Columbia.

South Dakota.—An applicant must present a diploma from a recognized medical college which requires attendance on four full courses of six months each and must pass an examination (fee \$20). Certificates of other States may be accepted. (Act approved Mar. 5, 1903.) Dr. H. E. McNutt, Aberdeen.

Tennessee.—An examination is required (fee \$10, and \$5 additional for the certificate, if granted). Certificates of other States not accepted. (Act approved April 22, 1901.) Dr. T. J. Happell, Trenton.

Texas.—An examination is required (fee \$15). Certificates of other States with equal standards may be accepted. (Act approved February 22, 1901.) Dr. Thomas T. Jackson, San Antonio.

Utah.—A diploma of a recognized medical college and an examination are required (fee \$15). Certificates of other States not accepted. (Act of 1894.) Dr. R. W. Fisher, Salt Lake City.

Vermont.—High school education or equivalent, diploma of a medical college recognized by the board, and an examination are required (fee \$15), but certificates of other States with equal requirements may be accepted without examination (fee \$20). (Act approved Dec. 10, 1906.) Dr. W. Scott Nay, Underhill.

Virginia.—An examination and a medical diploma are required (fee \$10). The board may, in its discretion, accept a medical diploma and a certificate granted, after

examination, by another State board. (Pollard's Annotated Code, 1904, sec. 1747.) Dr. R. S. Martin, Stuart.

Washington.—An applicant must pass an examination (fee \$25), and must have graduated from a medical college having at least a four years' course. Certificates of other States not accepted. (Act of February 18, 1901, amended in 1905.) C. W. Sharpless, Seattle.

West Virginia.—An examination is required and applicant must be a graduate of a recognized medical college (fee \$10). Certificates of other States may be accepted. (Law as amended in 1907.) Dr. Hugh A. Barbee, Point Pleasant.

Wisconsin.—To secure a license the applicant must pass an examination and must be a graduate of a reputable medical college requiring at least four courses of seven months each in separate calendar years and "a preliminary education equivalent to that necessary for entrance to the junior class of an accredited high school, including a one year's course in Latin, and that shall after the year 1906 require for admission to such school a preliminary education equivalent to graduation from an accredited high school of this State." The examination fee shall not exceed \$15, with \$5 additional for a license issued. Any person licensed by another State board requiring an equal standard and holding a diploma from a reputable medical college may be licensed without examination on payment of a fee not exceeding \$25. (Act approved May 22, 1903.) Dr. J. V. Stevens, Jefferson.

Wyoming.—Every applicant for a certificate must be a graduate of a regularly chartered medical college recognized by the State board of health or the State board of medical examiners of the State in which it is located, and he shall pass an examination (fee \$25). Certificates of other States with equal standards may be accepted. (Act approved February 15, 1905.) Dr. S. B. Miller, Laramie.

REQUIREMENTS FOR THE PRACTICE OF DENTISTRY IN THE UNITED STATES.

A.—CLASSIFICATION.

I. An examination, a diploma of a recognized dental school, and a high school education are required in New Jersey, New York, and Pennsylvania—3.

II. An examination and a diploma of a recognized dental school are required in Arizona, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Illinois,^a Indiana, Iowa, Louisiana, Minnesota, Missouri, Montana,^b Nebraska,^b Nevada, New Mexico, Oregon, Utah, Washington, Wisconsin, and Wyoming—23.

III. An examination and a dental diploma are required in Idaho,^c Kentucky, Maryland, North Dakota,^c Ohio, South Dakota,^c and the Philippines—7.

IV. An examination only is required in Alabama, District of Columbia, Maine, Massachusetts, Mississippi,^d New Hampshire, North Carolina, Oklahoma, Rhode Island, South Carolina, Texas, Vermont, Virginia, and West Virginia—14.

V. An examination or a recognized diploma is required in Arkansas, Kansas, Michigan, Porto Rico, and Tennessee—5.

B.—BRIEF SYNOPSIS.

Alabama.—An examination is required (fee \$10). Certificates of other States not accepted. (Act of March 4, 1901.) Secretary, Dr. T. P. Whitby, Selma.

^a If applicant is not a graduate of a recognized dental school, he must have graduated from a reputable medical school, or have practiced dentistry five years.

^b If applicant is not a dental graduate, he must have studied or practiced dentistry five years.

^c If applicant is not a dental graduate, he must have had three years' experience in a dental office.

^d A high school education is also required.

Alaska.—No regulation.

Arizona.—An examination is required (fee \$25).

"SECTION 6. No person shall be eligible for examination by the Territorial board of examiners who shall not—

"First. Furnish satisfactory evidence of having graduated from a reputable dental college of the United States of America, which must be a member of the National Association of Dental College Faculties.

"Second. Or who shall have graduated from a high school or similar institution of learning in this Territory or some other State or Territory of the United States requiring a four years' course of study, and who can furnish to the board of dental examiners an affidavit containing his or her name, the name of his or her preceptor, and the names of at least two reputable witnesses, certified to before a notary public, showing that he or she has completed an apprenticeship of three years of twelve months each with a licensed practitioner of dentistry; or

"Third. Can furnish to said board of dental examiners a certificate from the State board of dental examiners, or similar body of some other State or Territory in the United States, showing that he or she has been a licensed practitioner of dentistry in that State or Territory for at least five (5) years." (Act of March 17, 1903.) Dr. W. P. Sims, Bisbee.

Arkansas.—An examination is required (fee \$15), but if a diploma of a reputable dental college is presented to the board it may, in its discretion, excuse the applicant from an examination. The board, however, requires an examination from all applicants. No provision for recognizing licenses of other States. (Act of May 23, 1901, as amended May 6, 1905.) Dr. A. T. McMillen, Little Rock.

California.—The applicant for a license must pass an examination (fee \$25). "No person shall be eligible for examination by the State board of dental examiners who shall not furnish satisfactory evidence of having graduated from a reputable dental college, which must have been indorsed by the board of dental examiners of California; or who shall not have graduated from a high school or similar institution of learning in this or some other State of the United States, requiring a three years' course of study, and who can not furnish to the board of dental examiners an affidavit containing his or her name, the name of his or her preceptor, and the names of at least two reputable witnesses, certified to in the State of California before a notary public, showing that he or she has completed an apprenticeship of four years of twelve months each with a licensed practitioner of dentistry in the State of California, or can not furnish to said board of examiners a certificate from the State board of dental examiners, or similar body of some other State in the United States, showing that he or she has been a licensed practitioner of dentistry in that State for at least five years." (Acts approved March 23, 1901, and March 20, 1903.) Dr. C. A. Herrick, Jackson, Amador County.

Colorado.—The requirements are a diploma from some reputable dental college and an examination (fee \$10). No provision for accepting certificates of other States. (Act of April 17, 1897.) Dr. M. S. Fraser, 407 Mack Building, Denver.

Connecticut.—"Every applicant for a license must be examined" (fee \$25), and "no license shall issue to any person unless he shall have received a diploma or other sufficient certificate of graduation from some reputable dental college or medical college conferring a dental degree, having a department of dentistry, and recognized by the National Association of Dental Examiners, or unless he shall have spent five years under the instruction of a licensed or registered dentist, or unless he shall have had at least three years' continuous practice as a legally qualified dentist."

Certificates of other States may be accepted under certain conditions. (Act approved June 15, 1905.) G. M. Griswold, Hartford.

Delaware.—An examination is required (fee \$10, and \$1 for a certificate, if granted). The by-laws of the board of examiners require the applicant to be a graduate of a recognized dental college. (Acts of March 31, 1885, and March 23, 1899.) Dr. C. R. Jefferis, Wilmington.

District of Columbia.—An examination is required (fee \$10, and \$1 for a certificate). The certificate of another dental board may be accepted after the holder has been engaged in the practice of dentistry for five years. (Acts of June 6, 1892, and February 5, 1904.) Wm. B. Daley, 1311 Rhode Island avenue NW., Washington.

Florida.—A diploma of a reputable dental college and an examination are required (fee \$10). Certificates of other States not accepted. (Rev. Stat., 1892, sec. 829.) Dr. W. G. Mason, Tampa.

Georgia.—The requirements for a license are (1) an examination and (2) a diploma from a dental school having a curriculum equal to those of the majority of dental schools in the United States, or a license from some other State board (fee \$10). (Supplement to the code, 1901.) Dr. D. D. Atkinson, Brunswick.

Hawaii.—A certificate is granted to any graduate of a reputable dental college who passes an examination (fee \$20). (Act approved April 25, 1903.) Dr. M. E. Grossman, Honolulu.

Idaho.—An examination is required (fee \$25), and in addition the applicant must have a dental diploma or a certificate from some other State board, or must have three years' experience in a dental office. (Act of February 16, 1899.) Dr. C. E. M. Loux, Pocatello.

Illinois.—An examination is required of all applicants, and in addition the applicant must be a graduate of a recognized dental college or of a reputable medical school, or must have been engaged in the actual lawful practice of dentistry in some other State or country for five consecutive years immediately prior to the application, and must have the necessary qualifications prescribed by the board. The fee for the examination is \$20, and for the license \$5 additional. (Act of 1905.) Dr. J. G. Reid, 1204 Trude Building, Chicago.

Indian Territory.—No information of any regulation in this Territory.

Indiana.—The requirements are (1) an examination (fee \$20) and (2) a diploma of a dental college recognized by the National Association of Dental Faculties, or affidavits "that the applicant has been an assistant in the dental office of a reputable licensed dentist or dentists of this State for a period of time not less than five years." Certificates of other States may be accepted. (Acts of 1899 and 1903.) Dr. F. R. Henshaw, Middletown.

Iowa.—Diploma from a recognized dental college and an examination (fee \$20). (Act of April 16, 1900.) Dr. E. D. Brower, Lemars.

Kansas.—An examination is required (fee \$10) or a diploma of a reputable dental college recognized by the board (fee \$5). "Residents of this State only shall be eligible for registration." No provision for recognizing certificates of other States. (Act approved February 24, 1903.) Dr. M. I. Hults, Hutchinson.

Kentucky.—An examination and a dental diploma are required (fee \$20). Certificates of other States not recognized. (Act approved March 17, 1904.) Dr. C. R. Shacklette, Louisville.

Louisiana.—The applicant for a certificate to practice dentistry, according to the board's "Rules for conducting dental examinations," must be a graduate of a recognized dental school and must pass an examination (fee \$25). (Act 88 of 1900.) Dr. L. A. Hubert, 137 Carondelet street, New Orleans.

Maine.—An examination is required (fee \$20). No provision for recognition of certificates of other States. (Rev. Stat., 1903.) Dr. D. W. Fellows, Portland.

Maryland.—Any graduate of a dental school in the United States may be examined, and if found qualified shall be given a certificate; but any graduate of a regular dental school may be registered without examination in the discretion of the board. It is

understood, however, that the board requires all applicants to be examined. A fee of \$10 shall be paid by every applicant for examination and registration. (Act approved April 4, 1896.) Dr. F. F. Drew, 701 North Howard street, Baltimore.

Massachusetts.—An examination is required (fee \$20). No provision for recognizing certificates of boards of other States. (Revised laws of Massachusetts, 1902, chap. 76.) Dr. G. E. Mitchell, Haverhill.

Michigan.—A certificate is granted after examination (fee \$10), or to anyone holding a diploma from a reputable dental college having a course of instruction and practice equal to that of the college of dentistry of the University of Michigan (fee \$3). Certificates of other States may be accepted. Dr. Albert L. Le Gro, Three Rivers.

Minnesota.—An examination and a diploma of an approved dental college (fee \$10). No provision for recognition of certificates of other State boards. (Revised laws, 1905.) Dr. Geo. S. Todd, Lake City.

Mississippi.—A high school education and an examination are required (fee \$10). (Act of March 16, 1904.) Dr. P. P. Walker, Brandon.

Missouri.—Any person who has been licensed by the dental board of another State, or who has received a diploma from a reputable dental school recognized by the State dental board, and which has a course of instruction of not less than three terms of thirty weeks each in separate academic years, shall have the right to apply for examination (fee \$10), and if successful in the examination shall be licensed. (Act approved April 12, 1905.) Dr. S. C. A. Rubey, Clinton.

Montana.—An examination is required (fee \$25). "To be eligible for such examination the applicant shall give satisfactory evidence of having practiced dentistry five years, or having been a bona fide student five years, under immediate supervision of a licensed dentist, or shall present a diploma from some reputable dental college." (Act approved February 25, 1901.) Dr. D. J. Wait, Helena.

Nebraska.—An examination is required (fee \$25, but to graduates of Nebraska dental colleges the fee shall be \$10). No person shall be eligible for examination who shall not have graduated from a dental school recognized by the State board of health and which in the opinion of the dental secretaries "fully meets the requirements of the National Association of Dental Examiners," or who shall not have graduated from a high school or similar institution of learning and have furnished to the dental secretaries an affidavit that he or she has completed an apprenticeship of five years with a licensed practitioner of dentistry in Nebraska, or who shall not have a certificate from another State board of dental examiners. (Act approved February 28, 1905.) Dr. C. F. Ladd, Lincoln.

Nevada.—An examination is required (fee \$25, not returnable), and no one shall be eligible for examination unless he shall have graduated at a dental school recognized by the board, or shall have graduated at a high school having a three years' course of study and have completed an apprenticeship of four years of twelve months each with a licensed dentist in the State of Nevada, or unless he has been a licensed dentist in another State for at least five years. (Act approved March 16, 1905.) Dr. C. A. Coffin, Reno.

New Hampshire.—An examination is required (fee \$10). (Public Statutes, 1901, chap. 134.) Dr. A. J. Sawyer, Manchester.

New Jersey.—An examination is required (fee \$25). No person shall be examined by said board unless he has received a high school education and a diploma from a dental school recognized by the board, or shall present the written recommendation of at least five licensed dentists of this State of five years' standing, certifying that he is qualified for such examination, or shall hold a diploma or license to practice in some foreign country and granted by some authority recognized by the board. Certificates of other States with equal standards may be accepted. (Acts of March 17, 1898, and March 22, 1901.) Dr. Charles A. Meeker, Newark.

New Mexico.—An examination is required of each person applying for a certificate, "and such person shall present at the time of his examination either his diploma from a reputable dental college, or the affidavit of three reputable dentists within the Territory, of three years' standing, certifying that such applicant is qualified to take such examination." Examination fee, \$5. (Act of February 23, 1893, as amended March 9, 1905.) Dr. C. N. Lord, Santa Fe.

New York.—An examination is required (fee \$25), the prerequisites being (1) an education equivalent to that of a four-year high school course, and (2) a diploma from a registered dental school or a license to practice in some foreign country. Certificates of other States with equal requirements may be accepted. (Dental law of March 28, 1901, as amended March 25, 1902.) Charles F. Wheelock, Albany.

North Carolina.—An examination is required (fee \$10). (Act of 1887, as amended March 3, 1891.) Dr. R. H. Jones, Winston-Salem.

North Dakota.—A license is granted to anyone passing a satisfactory examination who has been practicing or studying dentistry under a licensed dentist for three years immediately preceding. While the board is authorized by law to grant a license to any graduate of a reputable dental college without examination, it requires an examination of all applicants. Fee for examination \$10, and a further sum of \$5 for a certificate. (Revised Code of North Dakota, 1895.) Dr. H. L. Starling, Fargo.

Ohio.—A dental diploma and an examination are required (fee \$20). Upon unanimous vote of the board, applicants holding a license from another State requiring a diploma and an examination may be excused from examination. (Acts of April 29 and May 10, 1902.) Dr. H. C. Brown, 185 East State street, Columbus.

Oklahoma.—An examination is required (fee \$25). Certificates of other boards of dental examiners may be accepted. (Revised Statutes, 1903.) Dr. A. C. Hixon, Guthrie.

Oregon.—A diploma from some reputable dental college and an examination are required (fee \$10). "All dental colleges which are members of the National Association of Dental Faculties shall be deemed reputable and in good standing." (Act approved February 20, 1899.) Dr. O. D. Ireland, Dekum Building, Portland.

Pennsylvania.—The requirements for a dental license are (1) a competent common school education, (2) a diploma of a recognized dental school or a license to practice in some foreign country, and (3) an examination (fee \$15). Applicants examined and licensed by other State examining boards having substantially the same standard of requirements may be licensed without an examination on payment of \$10. (Act of July 9, 1897.) N. C. Schaeffer, Harrisburg.

Philippine Islands.—The requirements are a dental diploma and an examination (fee \$10). (Law of January 10, 1903.) Dr. W. G. Skidmore, Manila.

Porto Rico.—A diploma from a reputable dental college or an examination (fee \$25). A certificate of any State having a satisfactory standard may be accepted. (Act of March 9, 1905.) Dr. Manuel V. de Valle, San Juan, Bayamon.

Rhode Island.—An examination is required (fee \$20). (Acts of 1897 and 1901.) Dr. W. S. Kenyon, Providence.

South Carolina.—An examination is required (fee \$15). (Code of South Carolina, 1902.) Dr. B. Rutledge, Florence.

South Dakota.—An applicant for a license must (1) have pursued the study of dentistry for three years under a regular practicing dentist or must have practiced dentistry three years and (2) must pass an examination. A graduate of a reputable dental college may be licensed without examination, in the discretion of the board, according to the law, but the board requires all to pass an examination. The fee for the examination is \$10 and for the license the further sum of \$5. (Acts of March 7, 1901, and March 11, 1903.) Dr. G. W. Collins, Vermilion.

Tennessee.—An examination or a diploma of a recognized dental school is required. Fee for each certificate issued, \$5. (Code of 1896.) Dr. F. A. Shotwell, Rogersville.

Texas.—An examination is required (fee \$25). (Laws of 1905, chap. 97.) Dr. C. C. Weaver, Hillsboro.

Utah.—An examination is required. To be eligible for examination the applicant must have studied dentistry three years under a licensed dentist, or practiced dentistry two years, or have a diploma from a reputable dental college recognized by the National Association of Dental Examiners. Fee for examination, \$25, of which \$20 shall be returned in case of failure to pass the examination. Certificates of other States may be accepted after the holder has been in legal practice for five years or more. (Acts approved March 12, 1903, and March 9, 1905.) Dr. H. W. Davis, 513 McCormick Block, Salt Lake City.

Vermont.—An examination is required (fee \$25). "The board of dental examiners may, without examination, issue a license to practice to any dentist who shall have been in legal practice in some other State or Territory for a period of at least five years upon the certificate of the board of dental examiners or a like board of the State or Territory in which such dentist was a practitioner, certifying his competency and that he is of good moral character, and upon the payment of twenty-five dollars." (Act approved November 29, 1904.) Dr. G. F. Cheney, St. Johnsbury.

Virginia.—Certificates are granted after examination (fee \$10). No provision for recognizing certificates of other State boards. (Act approved March 12, 1906.) Dr. R. H. Walker, Norfolk.

Washington.—An applicant must be a graduate of a recognized dental college and must pass an examination (fee \$25). (Act of March 18, 1901.) Dr. C. S. Irwin, Vancouver.

West Virginia.—An examination is required (fee \$10). No provision for recognizing certificates of other States. (Act of February 20, 1897.) Dr. H. M. Van Voorhis, Morgantown.

Wisconsin.—Licenses are granted after examination, but an applicant for examination must have graduated from a reputable dental college, or must have served as an apprentice to a reputable dentist for five years, or must have practiced dentistry for four years immediately preceding. The State board may, in its discretion, license without examination any graduate of a reputable dental college recognized by the board and which requires four full courses of lectures of at least seven months each, and which requires for admission thereto a preliminary education equivalent to that required for entrance to the junior class of an accredited high school. Fee for each license granted, on examination or not, \$10. (Act approved May 21, 1903.) Dr. J. J. Wright, 1218 Wells Building, Milwaukee.

Wyoming.—The requirements are an examination and "a diploma of graduation of some reputable dental college recognized by the National Association of Dental Faculties." Examination fee \$25, in no case to be refunded. Certificates of other States and Territories with equal standards may be accepted. (Act approved February 21, 1905.) Dr. Peter Appe, jr., Cheyenne.

TABLE 1.—General summary of statistics of professional schools for 1904-5.

CHAPTER XXIII.

STATISTICS OF NORMAL SCHOOLS.

For the scholastic year ending June, 1905, there were 93,640 students enrolled in training courses for teachers in the several classes of institutions. This was an increase of 6,401 over the number reported for the preceding year, although there was a decrease of 15 in the number of institutions reporting. In all public institutions there were 68,035 normal students, 54,521 of these being in public normal schools. In all private institutions there were 25,605 normal students, 10,779 of these being in private normal schools. Private normal schools alone show a decrease in the enrollment of normal students from the preceding year. The following table shows the number and classes of institutions offering professional instruction to teachers and the number of normal students in each class for the last four years:

Normal students reported for four years.

Classes of institutions.	1901-2.		1902-3.		1903-4.		1904-5.	
	Institutions.	Students.	Institutions.	Students.	Institutions.	Students.	Institutions.	Students.
Public normal schools.....	173	49,403	177	49,175	178	51,635	179	54,521
Private normal schools.....	109	15,665	109	14,939	91	11,992	89	10,779
Public universities and colleges.....	39	3,003	37	2,997	34	2,765	38	3,038
Private universities and colleges.....	195	7,687	204	8,340	196	7,396	213	8,649
Public high schools.....	368	10,483	458	6,665	449	7,488	390	10,476
Private high schools.....	357	7,892	279	5,887	272	5,963	296	6,177
Grand total.....	1,241	94,133	1,264	88,003	1,220	87,239	1,205	93,640
In all public institutions.....	580	62,889	672	58,837	661	61,888	607	68,035
In all private institutions.....	661	31,244	592	29,166	559	25,351	598	25,605

Tables 19 and 20 show the distribution of normal students, by States, according to the classification in the above table, for the scholastic year 1904-5. Table 21 gives a list of the universities and colleges offering normal instruction to teachers.

The number of public and private normal schools reporting to this Bureau in 1905 was 268, and this chapter is devoted more particularly to the statistics of these schools. For the year there were enrolled in the regular training courses for teachers in these schools 65,300 students, as compared with 63,627 the preceding year. There were 10,360 graduates, as compared with 10,848 the preceding year. The public normal schools showed an increase of 44, the private normal schools a decrease of 532 in the number of graduates.

Since 1890 there has been a constant growth in public normal schools, while the private normal schools have shown great fluctuations in their progress in the same period. The statistics of 1890 and 1905 are compared in the following table:

	1899-00.				1904-5.			
	Schools.	Instructors.	Normal students.	Normal graduates.	Schools.	Instructors.	Normal students.	Normal graduates.
Public normal schools.....	135	1,182	26,917	4,413	179	2,957	54,521	9,274
Private normal schools.....	43	274	7,897	824	89	694	10,779	1,086
Total.....	178	1,456	34,814	5,237	268	3,651	65,300	10,360

The 10,360 graduates from public and private normal schools in 1905 comprised 15.86 per cent of the total enrollment of 65,300 normal students in these institutions. If the 28,340 normal students in other institutions had a proportionate number of graduates, the total number of normal graduates for the year must have been about 14,855. This comparatively small number of well-equipped teachers is insufficient to fill the vacancies caused by death and resignation from the great body of 580,000 teachers in the United States. This vast army is increasing at the rate of nearly 10,000 a year. Thousands of places must be filled by half-trained and untrained teachers.

PUBLIC NORMAL SCHOOLS.

All the States and Territories have public normal schools supported from State funds, excepting Delaware, Nevada, and Wyoming. In these three provision is made for the education of teachers in the State colleges.

The steady growth of public normal schools is best illustrated by the record of increase in public appropriations for their support from year to year. The aggregate of such appropriations for the year 1904-5 was \$5,816,395. Of this sum \$4,131,606 was for running expenses and \$1,684,789 for building and permanent improvements. These sums are larger than ever before reported, and the aggregate of public appropriations for the year is larger than ever recorded in the history of normal schools in this country. The following table gives a synopsis of appropriations for public normal schools year by year since 1890:

Public appropriations to normal schools for sixteen years.

Year.	For support.	For buildings.	Year.	For support.	For buildings.
1889-90.....	\$1,312,419	\$900,533	1897-98.....	\$2,566,132	\$417,866
1890-91.....	1,285,700	409,916	1898-99.....	2,510,934	560,896
1891-92.....	1,567,082	394,635	1899-1900.....	2,769,003	718,507
1892-93.....	1,452,914	816,826	1900-1901.....	3,068,485	709,217
1893-94.....	1,996,271	1,583,399	1901-2.....	3,228,090	906,301
1894-95.....	1,917,375	1,003,933	1902-3.....	3,582,168	1,268,742
1895-96.....	2,187,875	1,124,834	1903-4.....	3,927,808	915,443
1896-97.....	2,426,185	743,333	1904-5.....	4,131,606	1,684,789

The summarized statistics of the 179 public normal schools will be found in Tables 1 to 11, while Tables 22 and 23 give in detail the information concerning these schools.

The teachers in these schools instructing normal students numbered 2,957, the number of men being 1,166 and women 1,791. There were 879 teachers wholly in other departments, making the total number of instructors in these public institutions 3,836.

Table 2 shows that there were 54,521 students in the normal departments—11,443 men and 43,078 women. There were 657 students in business courses and 4,664 in other courses of secondary grade. In the elementary grades there were 35,795 pupils. The aggregate enrollment was 95,637, as shown in Table 3. The same table shows that there were 1,720 negro normal students, most of them receiving instruction in public normal schools provided for the colored race in the South. Table 3 also shows that there were 46,893 children in the model schools connected with the public normal schools.

For the year ending June, 1905, there were 9,274 graduates from the public normal schools—1,267 men and 8,007 women—as shown in Table 4. There were 136 graduates from business courses and 460 graduates from other courses.

Complete financial statistics could not be obtained from 30 of the 179 public normal schools. Table 5 shows that 149 of these schools received for the year \$4,131,606 from public appropriations for support, 129 received \$631,426 from tuition and other fees, 16 received \$111,393 from productive funds, and 33 received \$362,653 from sources not specified. The aggregate income of 151 schools was \$5,237,078.

Table 6 shows that the aggregate value of property possessed by 153 public normal schools was \$30,784,704. The number of volumes in the libraries of 164 schools was 956,445. The amount of money appropriated for buildings and improvements for 52 schools was \$1,684,789. Five schools received bequests to the amount of \$179,714 for permanent endowment.

In Table 7 will be found a review of the annual appropriations for the support of public normal schools for the past six years. Table 8 shows for the same period appropriations for buildings and improvements.

BRANCHES OF INSTRUCTION.

Tables 9, 10, and 11 give the number of students in each of the 9 leading subjects embraced in the courses offered by most of the public normal schools. A synopsis of these tables is given below, showing the number and per cent of the 54,521 students in each branch.

Number and per cent of public normal students pursuing certain studies.

PRIVATE NORMAL SCHOOLS.

Statistics of the 89 private normal schools will be found summarized in Tables 12 to 17, inclusive. These tables may be compared with Tables 1 to 6, which summarize similar items for public normal schools. Certain items for public and private normal schools are compared in Table 18. In public normal schools less than 21 per cent of the students are men, while they comprise nearly 42 per cent in private normal schools. In the former the graduates were 17 per cent of the enrollment, as compared with 10 per cent in the private normal school enrollment.

Of a total enrollment of 95,637 in public normal schools, 54,521 were pursuing professional courses for teachers. This was 57 per cent of the whole. In the private normal schools, where the total enrollment was 35,748, the number in normal courses was 10,779, or 30 per cent of the total.

The statistics of the 89 private normal schools are given in detail in Table 24.

TABLE 1.—Summary of statistics of public normal schools in 1904-5.

CHAPTER XXIV.

STATISTICS OF SECONDARY SCHOOLS.

Before the close of the scholastic year, June, 1905, the enrollment of students of high school grade in the United States had reached 876,050, an increase of 53,815 over the preceding year. Public high schools and the preparatory departments of public colleges and the nonprofessional departments of public normal schools had 695,989 of the secondary students, while private high schools and academies and the preparatory departments of private colleges, private manual training schools, and the nonprofessional departments of private normal schools had the remaining 180,061 secondary students.

In most of the State school systems the public schools are divided according to a well-devised scheme of studies into twelve grades. The first eight are known as the elementary grades, and the grades from nine to twelve, inclusive, are the secondary or high school grades. In a few States all above the sixth are known as secondary grades, but generally the secondary school is the high school. The grades in private schools correspond very closely to the grades of the same number in public schools. The scheme of studies recommended by the committee of ten on secondary school studies to the National Educational Association in 1893 has become the model for all secondary, or high schools, public and private.

The 876,050 secondary students reported for 1905 were distributed among the eight above-mentioned classes of institutions as shown in the last three columns of the following table:

Institutions.	1903-4.			1904-5.		
	Male.	Female.	Total.	Male.	Female.	Total.
Public high schools.....	266,039	369,769	635,808	288,391	391,311	679,702
Public normal schools.....	2,150	3,243	5,393	1,863	2,801	4,664
Public universities and colleges.....	8,835	2,768	11,603	8,967	2,656	11,623
Private high schools.....	51,599	51,808	103,407	51,778	55,429	107,207
Private normal schools.....	4,193	3,618	7,816	6,607	4,653	11,260
Private universities and colleges.....	30,073	14,555	44,628	32,043	14,792	46,835
Private colleges for women.....	4,800	4,800	5,627	5,627
Manual training schools.....	5,641	3,139	8,780	5,651	3,481	9,132
Total.....	368,535	453,700	822,235	395,300	480,750	876,050

From the above table it will be seen that there was a gain in the enrollment in public high schools of 43,894, and in private high schools and academies of 3,800. The only decrease shown was a falling off of 729 in the number of secondary students in public normal schools. The net increase in secondary enrollment was over 6½ per cent. The percentage of increase in the number of public secondary students was 6.62, and in that of private secondary students 6.27. The enrollment of secondary students in

public and private institutions is given by geographical divisions for 1903-4 and 1904-5 in the following table, the percentage of increase being indicated:

Students receiving secondary instruction in public and private high schools and academies and in preparatory departments of colleges and other institutions.

	1903-4.			1904-5.			Per cent of increase.		
	Public.	Private.	Total.	Public.	Private.	Total.	Public.	Private.	Total.
United States.....	652,804	169,431	822,235	695,989	180,061	876,050	6.62	6.27	6.54
North Atlantic Division....	211,304	51,477	262,781	226,834	52,702	279,536	6.88	2.38	6.38
South Atlantic Division....	36,039	23,970	60,009	38,140	25,403	63,543	5.83	5.98	5.89
South Central Division....	52,152	29,731	81,883	53,545	30,897	84,442	2.67	3.92	3.13
North Central Division....	304,439	51,751	356,190	323,979	58,262	382,241	6.42	12.58	7.31
Western Division.....	48,870	12,502	61,372	53,491	12,797	66,288	9.46	2.36	8.01

For fifteen years the rate of increase in the number of secondary students from year to year has been greater than the rate of increase in population. The number of secondary students in both public and private institutions in 1890 was 367,003, or about 5,900 to the million of population; in 1895 the number had increased to 539,712, or 7,900 to the million; in 1900 the number was 719,241, or 9,500 to the million, while for the year 1905 the number of secondary students aggregated 876,050, or about 10,600 to the million population, or over 1 per cent. The enrollment of secondary students in private institutions has scarcely kept pace with the increase in population, while the enrollment in public institutions has increased more rapidly. In 1890 public secondary students constituted 0.36 of 1 per cent of the population, while in 1905 the proportion was 0.84 of 1 per cent. These facts are shown in the following table:

Secondary students and per cent of population.

Year.	In public institutions.		In private institutions.		In both classes.

1904-5.....	695,989	.84	180,061	.22	876,050	1.06

The remainder of this chapter is devoted to a presentation of the statistics of the 9,203 public and private high schools and academies reporting to this Bureau for the year 1904-5. It has been found impracticable to collect complete statistics of the preparatory departments of colleges and other institutions, but the number of secondary students is reported. While the collection of statistics in detail from 9,203 public and private high schools presents many difficulties, the results are measurably

satisfactory. The following table shows the progress of public and private high schools since 1890:

Public and private high schools since 1889-90.

The remarkable growth of public high schools in fifteen years will be seen at once from the table. In 1890 there were 2,526 public high schools, with 202,963 students, while in 1905 the number of schools had increased to 7,576, with 679,702 students. This was an increase of 200 per cent in the number of schools and 235 per cent in the number of public high school students. There was an increase in the number of private high schools and in their enrollment up to 1895, when the number of schools reporting was 2,180, with 118,347 students. After that date there was a decrease in the number of schools until 1904, when the number was only 1,606. In 1905 the number increased to 1,627. For the last ten years the annual enrollment has stood somewhat above the 100,000 mark, notwithstanding the closing of several hundred of the weaker schools. The enrollment has now been on the increase for two years. The relative number of public and private high schools, teachers, and students since 1890 may be learned from the following table:

Relative number of public and private high schools, teachers, and students in fifteen years.

Year reported.	Per cent of number of schools.		Per cent of number of teachers.		Per cent of number of students.	
	Public.	Private.	Public.	Private.	Public.	Private.
1889-90.....	60.75	39.25	55.85	44.15	68.13	31.87

1904-5.....	82.32	17.68	74.29	25.71	86.38	13.62

In 1890 about 68 per cent of the high school students were in public high schools, and in 1905 over 82 per cent.

PUBLIC HIGH SCHOOLS.

Tables 1 to 15 summarize the more important items relating to the public high schools of the country, while Table 43 gives in detail the statistics of the 7,576 schools reporting.

As shown in Table 1, the number of teachers instructing secondary students in the public high schools in 1904-5 was 28,461. This teaching force included 13,440 men and 15,021 women, an increase of 615 men and 1,086 women teachers over the preceding year. The 679,702 secondary students included 288,391 boys and 391,311 girls. There was an increase over the preceding year of 22,352 in the number of boys enrolled and 21,542 in the number of girls. In elementary grades connected with many high schools there were 159,969 pupils, an increase of 16,547. The number of negro high school students reported was 11,082.

Table 2 shows that there were 34,982 secondary students preparing for the college classical course and 29,317 preparing for college scientific courses. The number of graduates for the year ending June, 1905, was 79,597, an increase of 4,121 over the preceding year. Of the total number of graduates, 28,296 were college preparatory students, an increase of 2,495. Of the total number of secondary students, 9,519 had military drill.

The number of students in each State in each of the leading high school studies is shown in Tables 3 to 11, inclusive. A synopsis of these tables is given below, preceded by items relating to the number of students preparing for college and the number of graduates.

Students in certain courses and studies in public high schools.

Courses, studies, etc.	Number of students.	Per cent of total number.	Male students.	Per cent of total number of male students.	Female students.	Per cent of total number of female students.
Students preparing for college:

History (other than United States).....	277,864	40.88	115,456	40.03	162,408	41.50
Civics.....	122,186	17.97	51,843	17.98	70,343	17.97

a Per cent of total number of graduates.

There was an increase of 3,692 in the number preparing for college, the number being 64,299, but the percentage was somewhat less, being 9.46 as compared with 9.82 the year preceding. The total number of graduates was 79,597, or 11.71 per cent of the total enrollment. Of the graduates 28,296, or nearly 36 per cent, had been preparing for college.

According to careful estimates, based upon a limited number of reports, 43 per cent of the aggregate high school enrollment will be found in the first year studies, 26 per cent in the second year, 18 per cent in the third year, and 13 per cent in the fourth year studies. If the 679,702 public high school students were divided thus, there would be 292,272 in the first year, 176,723 in the second, 122,346 in the third, and 88,361 in the fourth year.

It is shown in the synopsis given above that 341,248, or more than half the students, were studying Latin. Only 10,002 were studying Greek, as against 11,158 the preceding year. More than 57 per cent studied algebra.

The per cent of students in each of the leading high school studies reported annually for the past eleven years is given in the table which follows.

Per cent of total number of secondary students in public high schools in certain courses and studies, etc.

Students and studies.	1894-95	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-1901	1901-2	1902-3	1903-4	1904-5

^a Per cent of total number of graduates.

Tables 12, 13, and 14 compare the statistics of public high schools in cities of 8,000 population and over with those of public high schools outside of such cities. In the 594 cities of the class indicated there were 790 public high schools, with 10,928 instructors and 311,145 secondary students. Outside of these cities there were 6,786 public high schools, with 17,533 instructors and 368,557 secondary students. In the cities the high schools had an average of 394 students to a school, and 28 students to a teacher. Outside of the cities there was an average of 54 students to a school and 21 students to a teacher, as shown in Table 14.

Table 14 also shows that of the 7,576 public high schools, 1,312 were departments of city or village systems, 4,992 were district high schools, 944 township, and 328 independent high schools.

Table 15 is an exhibit of the equipment and income of the public high schools, summarized for each State, so far as the items could be obtained. Of the 7,576 high schools,

7,031 reported libraries aggregating 4,268,386 volumes, and 7,059 had grounds, buildings, scientific apparatus, etc., valued at \$173,891,552. The statement of income could be obtained from only 2,265 public high schools. These received for the year ending June, 1905, an aggregate of \$9,813,952. In most cases the accounts of high schools are not separated from the accounts of public school systems, and for this reason no satisfactory aggregate can be obtained or estimated as to the income or cost of all the public high schools.

PRIVATE HIGH SCHOOLS AND ACADEMIES.

Statistical summaries of private high schools, academies, and seminaries are given in Tables 16 to 29. Tables 16 to 26 are similar to Tables 1 to 11 relating to public high schools, and the two series may be compared. Table 27 is also similar to 15. Table 30 is a comparison of certain averages computed for public and private high schools.

For the year 1904-5 there were 1,627 private secondary schools reporting to this Bureau, an increase of 21 over the preceding year. These schools had 9,850 instructors of secondary students, an increase of 284. The number of secondary students was 107,207, an increase of 3,800. The number of boys was 51,778, an increase of only 179, while the number of girls was 55,429, an increase of 3,621. There was an actual decrease in the number of boys in these schools in the Western Division and in the two southern divisions. In the elementary grades of these schools there were 127,674 pupils, an increase of 10,291. Of the secondary students, 20,361 were preparing for college. There were 12,869 graduates for the year, an increase of 621. There were 8,919 students in military drill, a decrease of 834.

The number of students in each of the leading high school studies in each State will be found by consulting Tables 18 to 23. The percentages of students in each course and study are given in Tables 24 to 26. The following table is a synopsis of the number and per cent of students, by sex, in college preparatory courses, the number and per cent of graduates, and the number and per cent in each of the high school studies in private secondary schools for the scholastic year ending June, 1905:

Students in certain courses and studies in private high schools and academies.

Courses, studies, etc.	Number of students.	Per cent of total number.	Male students.	Per cent of total number of male students.	Female students.	Per cent of total number of female students.

a Per cent of total number of graduates.

As shown in the above table, nearly 19 per cent of the students in private secondary schools were preparing for college. Less than 10 per cent of public high school students were making such preparation. The per cent studying Latin was nearly 47, as compared with 50 per cent in the public high schools, while the percentage in Greek was 6.67, as compared with 1.47 in the public high schools. The per cent in algebra was 49.62, as compared with 57.51 in the public high schools.

The following table indicates in general increased percentages in the number of students in the private high schools pursuing the different studies in the last 11 years:

Per cent of total number secondary students in private high schools and academies in certain courses and studies.

Students and studies.	1894-95	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-1901	1901-2	1902-3	1903-4	1904-5

^a Per cent of total number of graduates.

Table 27 exhibits the value of equipment, income, endowments, etc., of private high schools, academies, and seminaries, by States. The number of volumes in the libraries of 1,381 schools was 2,359,855. The value of property reported by 1,226 schools was \$71,653,827. Tuition fees aggregating \$7,330,075 were received by 951 schools, and 177 schools received \$270,683 from public funds. The amount of \$1,847,067 was received by 261 schools from productive funds, while 416 schools received \$1,810,403 from sources not specified. The aggregate income of 990 schools was \$11,258,228. Benefactions aggregating \$1,906,967 were received by 172 schools during the year. The total money value of endowment reported by 236 schools was \$39,239,721.

Tables 28 and 29 show that 744 private secondary schools were nonsectarian, while 883 were under the control of religious denominations. The following synopsis is made from these tables:

Denominational control of private secondary schools.

Religious denomination and nonsectarian.	Schools.	Instruct- ors.	Students.
Nonsectarian.....	744	4,539	47,951
Roman Catholic.....	389	2,125	20,150

Other denominations.....	50	416	6,575
Total.....	1,627	9,850	107,207

COMBINED STATISTICS OF PUBLIC AND PRIVATE SECONDARY SCHOOLS.

The statistics of public and private secondary schools are combined in Tables 31 to 38. Certain items are compared in Table 30. In the public high schools there were 90 secondary students to a school and 24 students to a teacher, while in the private schools there were 66 secondary students to a school and 11 to a teacher. The latter figure would indicate that teachers in private secondary schools must devote a large portion of their time to the instruction of elementary pupils.

The number of public and private secondary schools reporting to this Bureau for the year 1904-5 was 9,203, with 38,311 teachers and 786,909 secondary students, as shown in Table 31. Of the aggregate enrollment, 446,740, or 56.77 per cent, were girls, and 340,169, or 43.23 per cent, boys. The number of students reported as preparing for college was 84,660, or nearly 11 per cent of the total number of secondary students. The graduates for 1905 numbered 92,466, something less than 12 per cent of the enrollment for the year. The number of graduates who had prepared for college was 33,702, or nearly 37 per cent of the total number of graduates.

The number and per cent of students in each of the leading high school studies in the public and private secondary schools in each State for 1904-5 are given in Tables 33 to 38. From these tables is condensed the following synopsis for the United States:

Students in certain courses and studies in public and private high schools and academies.

Courses, studies, etc.	Number of students.	Per cent of total number of sec- ondary students.	Male stu- dents.	Per cent of total number of male students.	Female students.	Per cent of total number of female students.
Students preparing for college:

In 1889-90 there were 100,152 students in public and private secondary schools studying Latin. This was 33.62 per cent of the total enrollment of secondary students in these schools for that year. In 1904-5 the number had increased to 391,067, or almost 50 per cent of the total number of high school students. Since 1890 the per cent of secondary students in algebra has increased from 42.77 per cent to 56.43 per cent in 1905. Percentages for these and others studies for eleven years are shown in the following table:

Per cent of the total number of secondary students in public and private high schools and academies in certain courses and studies, etc.

Students and studies.	1894-95	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-1901	1901-2	1902-3	1903-4	1904-5

^a Per cent of total number of graduates.

Tables 39 and 40 show by States and divisions the distribution of the 876,050 secondary students in the eight classes of institutions mentioned on the first page of this chapter. Table 41 compares the number of students in secondary education with the total population. The number in 1904-5 was 10.61 to the 1,000.

Of the public high schools of the country there were 40 for boys only and 29 for girls only, all the others being coeducational. Of the private high schools there were 327 for boys only, 508 for girls only, and 792 coeducational. These comparisons are made by States in Table 42. Tables 43 and 44 give in detail the statistics of public and private secondary schools.

Based upon an examination of the enrollment of secondary students by grades in the high schools of a number of cities the following estimate is made:^a

Secondary students in 1904-5.....	876,050
43 per cent in first year.....	376,702
26 per cent in second year.....	227,773
18 per cent in third year.....	157,689
13 per cent in fourth year.....	113,886

In the table which follows is given in condensed form the four courses of study for high schools recommended by the committee of ten on secondary school studies at the meeting of the National Educational Association in 1893. The figure 1 indicates that the study is to be pursued a whole year, and the one-half limits the study to half a year. The notes explain the provisions for optional studies.

Secondary school studies recommended by the committee of ten (1893), showing time devoted to each study.

^a It is worthy of remark that the number of students in any given year is about one-third less than the number in the year preceding. If the fraction were exactly one-third the approximate percentages for the four years would be 41.5, 27.7, 18.5, and 12.3, respectively.

CHAPTER XXV.

MANUAL AND INDUSTRIAL TRAINING.

References to recent Reports of the United States Commissioner of Education in which this subject has been treated or statistics published: Annual Report for 1888-89, pages 411-428, 1362-1367; 1889-1890, pages 1148, 1209-1212, 1351-1356; 1891-92, page 1197; 1892-93, pages 186, 188, 560-575; 1893-94, pages 877-949, 2093-2109; 1894-95, page 2170; 1895-96, pages 989-992, 1001-1152, 1321-1329, 1510-1521 (column 8); 1896-97, pages 193-197, 699-703, 2211-2222 (column 8), 2279-2294; 1897-98, pages 141, 194, 723, 2370-2382 (column 8), 2419-2440; 1898-99, pages 26, 83, 179-189, 208-209, 853-863, 1355-1361, 1442, 1448, 1525-1536 (column 8), 2139-2162; 1899-1900, pages 329, 875, 1811-1821 (column 8), 2437-2467, 2505; 1900-1901, pages 216, 217, 1510, 1961, 2231-2268, 2342-2372; 1901-2, pages 1294-1311 (column 9), 1959-2002; 1902-3, pages 1019-1046, 1427-1445 (column 9), 2139-2190; 1903-4, pages 1343-1361 (column 9), 2057-2108.

In 420 of the 1,214 city and village school systems of the United States in 1904-5, manual training was taught in some of the grades. The greater part of this work was in the schools of the 594 cities of 8,000 population and over. It is only within the last three years that considerable progress has been made in manual training in a few of the systems in cities and villages between 4,000 and 8,000 population.

In 1890 only 37 city school systems included manual training in the course of instruction. In 1894 the number had increased to 95, in 1896 to 121, in 1898 to 146, in 1900 to 169, in 1901 to 232, in 1902 to 270, and in 1903 to 322. Including a number of village systems in 1904 the number increased to 411, and in 1905 reached 420.

This Bureau received reports from 15 manual training schools in 1894. These schools had 3,362 students in manual training, 2,403 males and 959 females, all of secondary or high school grade. The next year, with the same number of schools reporting, there were 4,892 students, 3,621 males and 1,271 females. In 1897 the number of schools had increased to 40, with 13,890 students, 9,224 males and 4,666 females. Industrial training schools, or schools in which certain trades were taught, were included with the manual training schools proper, and since 1897 the statistics given are for "manual and industrial training." In 1898 there were 58 manual and industrial training schools, with 18,977 students, 12,975 males and 6,002 females. All these were reported as students of secondary or high school grade. Those not actually pursuing such secondary studies had been required to master certain secondary branches before entering. In 1899 the number of schools had increased to 66, with 20,701 students, 13,903 males and 6,798 females. In 1900 there were 69 schools, with 24,716 students, 15,819 males and 8,897 females. In 1901 the number of schools reporting was 78, with 28,981 students, 18,928 males and 10,053 females. In 1902 the number had increased to 85 schools, with 29,507 students, 18,771 males and 10,736 females. In 1903 there were 95 schools, with 33,062 students, 20,170 males and 12,892 females, and in 1904 there were 98 schools, with 36,680 students, 20,701 males and 15,979 females. The number increased to 106 in 1905, these schools reporting 43,197 students, 25,571 males and 17,626 females. In these reports Indian schools were not included.

In this chapter Tables 1 and 2 relate to manual training in city school systems, the first showing the number of cities in which such training has been given for a number of years, and the second indicating the grades in which manual training was taught in the 420 systems in 1904-5.

Tables 3, 4, 5, and 6 give the statistics of manual training schools reporting to this office since 1894, excluding from the tables the enumeration of all pupils below the secondary or high school grades.

In 1905 reports were received from 209 individual schools giving manual or industrial training. These included the 106 of high school grade mentioned above, 44 of elementary grade and 59 industrial schools for Indians.

Table 7 gives a summary of the statistics of the 209 schools. These schools had 73,942 pupils in manual and industrial training, 29,596 in elementary grades, and 44,346 in secondary or high school grades. Of those in secondary grades 17,369 were not receiving literary instruction, but were regarded as students of high school grade before admission. The actual number receiving literary instruction of secondary school grade in these 209 schools was 26,977. It may be noted also that of the elementary pupils in industrial training 4,745 were not receiving literary instruction. The actual number receiving such instruction of elementary grade was 24,851. Table 7 also shows that the 209 schools had 1,491 teachers of elementary and secondary studies and 2,216 instructors in manual and industrial training. Table 8 gives, by sex, the number of teachers and students already shown by totals in Table 7. The statistics of the 59 Indian schools are included in these two tables. Ten of the Indian schools had 1,149 students of high school grade and the 43 had 10,479 in the elementary grades in industrial training.

Table 9 is a financial summary, so far as the requisite data could be obtained from manual and industrial training schools, not including the schools for Indians. The aggregate value of buildings, machinery, tools, and other equipment for the schools reporting was \$10,537,115. These schools had a total expenditure for the scholastic year of \$1,553,049. Of this amount \$1,004,253 was for pay of teachers, \$207,064 for materials, \$95,713 for new tools and repairs, and \$246,019 for incidentals and for purposes not classified.

Table 10 gives in detail the number of students and teachers in the 150 manual and industrial training schools, exclusive of Indian schools. Table 11 is a statistical showing for the 59 schools for Indian children. Tables 12 and 13 show the number of pupils in each branch of industrial or manual training in each school from which this information could be obtained. Industrial training is offered in most of the negro schools, reform schools, and schools for defectives, statistics of which will be found in the chapters devoted to these classes of institutions.

SPECIAL AND UNCLASSIFIED SCHOOLS.

In the detailed statistical tables of this chapter many institutions are mentioned whose work is so diversified that it can not be adequately tabulated. Many schools extend their work beyond the domain of manual and industrial training and include much scientific and engineering work. Such schools are included in the following list:

- Cogswell Polytechnic College, San Francisco, Cal.
- Bradley Polytechnic Institute, Peoria, Ill.
- Lewis Institute, Chicago, Ill.
- Lowell Textile School, Lowell, Mass.
- Pratt Institute, Brooklyn, N. Y.
- Ethical Culture schools, New York, N. Y.
- Hebrew Technical Institute, New York, N. Y.
- School of Industrial Art and Technical Design for Women, New York, N. Y.
- Ohio Mechanics' Institute, Cincinnati, Ohio.
- School of Industrial Art of the Pennsylvania Museum, Philadelphia, Pa.
- Drexel Institute of Art, Science, and Industry, Philadelphia, Pa.
- Girard College for Orphans, Philadelphia, Pa.
- New Bedford Textile School, New Bedford, Mass.
- Girls' Industrial College, Denton, Tex.
- Virginia Mechanics' Institute of Technology, Richmond, Va.
- Maryland Institute for the Promotion of the Mechanic Arts, Baltimore, Md.

In New York City, Brooklyn, and Boston the Young Women's Christian Associations maintain industrial schools.

The schools mentioned below are not included in the statistical tabulation. Several of these institutions are not properly industrial training schools, and many of them fail to give statistical information desired.

Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

New York Trade School, New York, N. Y.

Rochester Athenæum and Mechanics' Institute, Rochester, N. Y.

Pittsburg School of Design for Women, Pittsburg, Pa.

Rhode Island School of Design, Providence, R. I.

Cooper Union, New York, N. Y.

New York School of Art, New York, N. Y.

Illinois College of Photography, Effingham, Ill.

Wells Memorial Institute, Boston, Mass.

Bliss Electrical School, Washington, D. C.

Washington Linotype School, Washington, D. C.

School of Messrs. R. Hoe & Co., New York, N. Y.—This school is maintained by this well-known company of manufacturers of printing presses and other machinery. In order to better equip the employees a night school was opened. The course of instruction includes English, mathematics, geometry, free-hand and mechanical drawing. The membership of the school is restricted to the apprentices of the company.

Waltham Horological School, Waltham, Mass.; Omaha Watch Repairing, Engraving, and Optical Institute, Omaha, Nebr.; St. Louis Watchmaking School, St. Louis, Mo.—These are schools for teaching the practical work of watchmaking, repairing clocks, jewelry repairing, engraving, and optics. The course of instruction also embraces etching, chasing, metal work, card-plate and steel-die work.

The Industrial Chemical Institute, Milwaukee, Wis.; Wahl-Henius Institute of Fermentology, Chicago, Ill.; National Brewers Academy, New York, N. Y.; United States Brewers Academy, New York, N. Y.—These schools offer courses in the analytical study of all materials used by modern brewers, with particular reference to all new devices for cooling, aerating, fermenting, filtering, carbonating, racking, and pasteurizing.

CHAPTER XXVI.

COMMERCIAL AND BUSINESS SCHOOLS.

Reports to this Bureau from 4,936 different institutions show that for the scholastic year 1904-5 there were enrolled 262,798 students in business or commercial studies. This was an increase of 12,567 over the preceding year. The regular business schools had an enrollment of 146,086, the public high schools had 90,309 in business studies, the private high schools and academies had 13,394, the normal schools 2,632, and the universities 10,377 students in commercial branches.

The following summary shows the fluctuations in enrollment of business students each year since 1890:

Students pursuing commercial studies.

Scholastic year.	In institutions not distinctly business schools.					In commercial and business schools.	Aggregate of students in commercial studies.
	Universities and colleges.	Normal schools.	Private high schools and academies.	Public high schools.	Total.

1902-3.....	8,179	2,701	15,455	79,207	105,542	137,979	243,521
1903-4.....	9,821	3,255	13,479	85,313	111,868	138,363	250,231
1904-5.....	10,377	2,632	13,394	90,309	116,712	146,086	262,798

The commercial and business schools had an increase of only 7,723 in enrollment over 1903-4, the public high schools had an increase of 4,996 students in business or commercial studies, the private high schools a decrease of 85, the normal schools a decrease of 623, and the universities and colleges an increase of 556.

The distribution of business students by sex among the five different classes of institutions giving business instruction is shown in the following summary for the past two years:

Classes of institutions.	1903-4.				1904-5.			
	Number of schools.	Male students.	Female students.	Total.	Number of schools.	Male students.	Female students.	Total.
Universities and colleges.....	166	7,056	2,765	9,821	191	7,909	2,468	10,377

CHAPTER XXVII.

SCHOOLS FOR NURSES.

The number of nurse training schools in 1904-5 was 862, or 138 more than in 1903-4. The number of nurse pupils was 19,824, an increase of 2,111. In addition to these there were 456 nurse pupils in schools having short courses of three or four months in hospitals established for special purposes, such as obstetrics, contagious diseases, etc. (See p. 1288.) These pupils in special hospitals were not included in the summaries, as their instruction was usually only supplementary to that given in regular hospitals. If these 456 pupils be added to the others the whole number of nurse pupils would be 20,280.

In the Report of 1904 nine States were mentioned as having established boards of examiners for the registration of nurses, viz, North Carolina (March 3, 1903), New Jersey (April 7, 1903), New York (April 24, 1903), Virginia (May 1, 1903), Maryland (March 25, 1904), Indiana (February 27, 1905), California (March 21, 1905), Colorado (April 12, 1905), Connecticut (June 6, 1905). In 1907 registration laws were passed in the District of Columbia, Iowa, New Hampshire, Minnesota, West Virginia, and Illinois.

In the hospitals exclusive of those for the insane, epileptic, and feeble-minded, there were accommodations for 72,637 patients, and their value was estimated at over \$87,000,000. As the value of many hospitals was not reported, it is probable that a full valuation would be over \$100,000,000.

In the inquiries sent out to nurse schools for 1904-5, some questions out of the usual order were added, viz, whether pupils engage in nursing outside of the hospital, for private patients, and also whether pupils receive free of cost board, laundering, uniforms, and text-books. In regard to the latter items it will be seen that the pupils are quite generally given their board and laundry. As to whether pupils do any out-patient nursing the answers grade almost imperceptibly from no to yes. Some say yes; others say, after first year, in latter part of course, in third year, occasionally, very seldom, only in emergencies. As these variations could not well be shown in the table, all of the schools answering affirmatively at all were marked yes, but this explanation shows that the answer often needs to be much qualified.

TABLE 1.—*Comparative statistics of nurse training schools.*

Year.	Schools.	Capacity of hospitals (beds). ^a	Nurse pupils.	Graduates.
1905.....	862	145,506	19,824	5,795

1895.....	131	3,985	1,498
1890.....	35	1,552	471
1885.....	34	793	218
1880.....	15	323	157

^aIn hospitals for the insane, epileptic, and feeble-minded the number of inmates is used.

Subjects of State examination in New York.—Training schools for nurses registered by the regents shall provide both practical and theoretic instruction in the following

branches of nursing: (1) Medical nursing (including materia medica), (2) surgical nursing, with operative technic, including gynecological, (3) obstetrical nursing (each pupil to have had the care of not less than six cases), (4) nursing of sick children, (5) diet cooking for the sick, including (a) 12 lessons in cooking in a good technical school, or with a competent diet teacher, (b) food values, and feeding in special cases, to be taught in classes (not by lectures), (6) a thorough course of theoretical instruction in contagious nursing, where practical experience is impossible.

Training schools for male nurses shall provide instruction in genito-urinary branches, in place of gynecological and obstetrical nursing.

Exchange of nurses by different schools.^a—The movement of nurses from one hospital to another in order to supplement the imperfect training to be had in any single institution is one which must be greeted with joy by anyone who sees the obvious need of the different hospitals for each other. There are now 17 schools, or about one-third of all the Massachusetts schools, which send their nurses to other schools or which receive them from other schools as a portion of their training. It is greatly to be hoped that this movement will increase rapidly within the next ten years. It is only in this way that the fifty-odd training schools contained within the limits of Massachusetts can justify their separate existence. Whenever a school allows its pupils to take a part of their training in another school, the two schools lose to that extent their separate existence, which is exactly what is needed. It is only in the large schools that a nurse can get a sufficient variety of experience with the diseases which she will be called upon after graduation to nurse. It is (so far) only in the smaller schools that a nurse learns to devote all her time profitably to one patient, as she must do in private nursing. Both these disciplines—that of the large and that of the small hospital—are necessary for the equipment of a well-trained private nurse. Neither has a monopoly of advantages. In so far as they can be combined by the exchange of pupils, a great good will be gained for the nurses and for the community.

DEVELOPMENT OF THE NURSE TRAINING SCHOOL.

George P. Ludlam, superintendent of the New York Hospital, writes as follows (New York Medical Journal, April 28, 1906):

The rise and development of the training school for nurses is one of the most interesting features of the modern hospital. Many who are still active in hospital work recall its beginning, have watched its growth, and have become familiar with the dominant position it has attained in the hospital scheme.

They recall the primitive conditions which prevailed in its earlier years and comparatively insignificant position it then occupied. They have witnessed the expansion of the idea, the enlargement of the scope of the institution, until they have seen it pervade the entire hospital, touching its interests at every point and exercising a controlling influence in its business and routine. They have seen the accommodations provided for the pupils, originally meager and uninviting, give place to large and commodious homes, some of them almost palatial in their design, and luxurious in their furnishing, and equipped with every possible convenience in the way of lecture rooms, libraries, laboratories, and diet kitchens. They have seen the curriculum develop from the simple instruction intended to acquaint the pupil with her duties toward the patients in her contact with them in the wards, into an educational scheme which opens up branches of study and investigation second only to that furnished in a well-equipped medical school. They have seen the simple nurse transformed into a professional woman, and the calling of the trained nurses exalted into a profession. They have witnessed the recognition of the trained nurses by State legislatures in the enactment of laws which confer upon the privileged ones the right to inscribe a title after their names, and which exclude others from the ranks. They have seen the guild uniting in local organizations which have expanded into national and even international associations. They have become familiar with a literature which, growing, like the institution it befriends, has expanded into periodicals, magazines, and volumes without number; and these dealing not merely with the practical matters of nursing but with the larger, broader, deeper questions of the professional care of patients, the management of hospitals, and their architectural construction. And all this marvelous growth and expansion in a period but little more than a quarter of a century has occurred without any crusade, without any struggle for existence, without any noisy or boisterous demand for recognition, but with a quiet, persistent, unintermittent development of the possibilities inherent in the institution, until the present degree of maturity and completeness has been attained.

^a Dr. R. C. Cabot, in Amer. Jour. of Nursing, Apr. 1906.

CHAPTER XXVIII.

SCHOOLS FOR THE COLORED RACE.

References to preceding publications of the United States Bureau of Education in which this subject has been treated: Annual Reports—1870, pp. 61, 337-339; 1871, pp. 6, 7, 61-70; 1872, pp. xvii, xviii; 1873, p. lxvi; 1875, p. xxiii; 1876, p. xvi; 1877, pp. xxxiii-xxxviii; 1878, pp. xxviii-xxxiv; 1879, pp. xxxix-xlv; 1880, p. lviii; 1881, p. lxxxii; 1882-83, pp. xlviii-lvi, 85; 1883-84, p. liv; 1884-85, p. lxvii; 1885-86, pp. 596, 650-656; 1886-87, pp. 790, 874-881; 1887-88, pp. 20, 21, 167, 169, 988-998; 1888-89, pp. 768, 1412-1439; 1889-90 pp. 620, 621, 624, 634, 1073-1102, 1388-1392, 1395-1485; 1890-91, pp. 620, 624, 792, 808, 915, 961-980, 1469; 1891-92, pp. 8, 686, 688, 713, 861-867, 1002, 1234-1237; 1892-93, pp. 15, 442, 1551-1572, 1976; 1893-94, pp. 1019-1061; 1894-95, pp. 1331-1424; 1895-96, pp. 2081-2115; 1896-97, pp. 2295-2333; 1897-98, pp. 2479-2507; 1898-99, pp. 2201-2225, lxxxviii-xcii; 1899-1900, pp. 2501-2531; 1900-1901, pp. 2299-2331; 1901-2, pp. 191-224, 285-307, 2063-2095; 1902-3, pp. 2253-2285; 1903-4, pp. 2175-2207.

Separate schools for negroes are maintained in all the former sixteen slave States and the District of Columbia. For the year 1904-5 the sum of \$46,401,832 was expended for the support of the common schools for whites and negroes. In most of the Southern States separate accounts are not kept of school expenditures, but at the present time, according to careful estimates, about 20 per cent of the public school funds in these States is for the support of schools for the negroes. The table which follows shows the common school enrollment in the South, separate as to race, each year since 1877. The annual expenditure for the schools for both races since 1870 is shown in the same table. The public school expenditure for the entire South since 1870 has aggregated \$818,242,553. It is estimated that at least \$149,000,000 of this sum has been expended to support common schools for the colored race.

^a Subject to correction.

Comparative statistics of the common schools for both races for the year ending June, 1905, are exhibited in Table 2. The totals for the South are compared with like totals for 1890 and for 1900.

Tables 3 to 6 give the summarized statistics of public high schools for negroes. There were 146 of these schools, as compared with 131 the preceding year. Those in the Southern States are also included in the returns for common schools. There were 7,250 high school students, as compared with 7,092 the preceding year.

Statistics of institutions devoted to the secondary and higher education of the negro race (excluding public high schools) will be found summarized in Tables 7 to 12. Tables 14 and 15 give in detail information concerning these schools. Many of these institutions are partly supported from public funds.

CHAPTER XXIX.

STATISTICS OF REFORM SCHOOLS.

The list of reform schools given in this chapter includes State reformatories proper, and other institutions known as State industrial schools for juveniles. In nearly all cases the inmates have been committed in pursuance of State laws. Not all of those committed have been guilty of criminal acts. Thousands of children have been taken from criminal environment and placed in these schools for protection.

There were 99 of these industrial and reform schools reported to this Office for the year 1904-5. These schools had 38,066 inmates, 36,580 of these being taught the common branches for some part of the year and 30,378 having some industrial training at the same time. There were 771 teachers and 2,013 assistants caring for the inmates.

Tables 1 and 2 on the following pages give by States the summarized statistics of industrial and reform schools. The commitments for the year numbered 14,733 and the discharges 14,479. Of the inmates, there were 30,881 white and 4,681 colored, so far as reported. So far as known, 16,161 were children of native parents and 8,880 children of foreign-born parents. Of the inmates committed, 3,765 could only read and 2,086 could neither read nor write. So far as reported, the value of grounds and buildings occupied by these institutions aggregated \$26,624,812. Of expenditures for the year, the sum of \$1,343,424 was for buildings and improvements and \$4,350,317 for support.

There were 33 of the 99 schools in the North Atlantic Division. These schools had 365 teachers and 14,698 pupils. There were 15,208 inmates, 13,345 males and 1,863 females, 12,558 of the total number receiving industrial training. The value of grounds and buildings was \$13,844,637, or over one-half the value of all the property occupied by reformatories in the United States. The expenditure for buildings and improvements was \$746,952, and for support \$1,595,765.

The South Atlantic Division had 18 reformatories, with only 70 teachers. There were 191 assistants caring for inmates, and these assistants must have done some part of the teaching. In these schools 2,834 of the 3,195 inmates were learning useful trades. So far as reported, 1,926 of the inmates belonged to white schools and 1,269 to negro schools. The value of grounds and buildings was \$2,030,500. Expenditures on buildings amounted to \$47,888, while \$334,148 was expended for support.

The South Central Division reported only 5 reform schools, with 41 teachers and 2,281 pupils. The institutions had 2,328 inmates, 1,531 being taught useful trades. In white reformatories there were 1,851 inmates and in negro schools 377. The value of grounds and buildings was \$456,854. There was an expenditure of \$186,876 for support.

In the North Central Division there were 34 reformatories, with 262 teachers and 14,908 pupils. There were 15,750 inmates, 11,936 males and 3,814 females. Of the inmates, 12,315 were receiving training in useful trades. The 34 schools occupied property valued at \$9,402,409, upon which \$502,790 had been expended during the year. The expenditure for support was \$1,919,314.

The Western Division had 9 reform schools, with 33 teachers and 1,585 pupils. There were 1,585 inmates, 1,411 males and 174 females. The number taught useful trades was 1,140. The institutions occupied property valued at \$890,412. Buildings and improvements cost \$45,794, while \$314,214 was expended for the support of these institutions.

CHAPTER XXX.

SCHOOLS FOR THE DEFECTIVE CLASSES.

In the tables on the following pages are given statistics of schools for the blind, schools for the deaf, and schools for the feeble-minded.

Industrial homes for the blind are not included in the list, as they are not properly schools. In many of these institutions the inmates are instructed in certain industrial branches and become partially self-supporting. As a rule these inmates are beyond the school age. Examples of this class of institutions may be mentioned as follows: The Blind Girls' Home, St. Louis, Mo.; Pennsylvania Industrial Home for Blind Women, Philadelphia; The Industrial Home for the Blind (men only), 512 Gates avenue, Brooklyn, N. Y.; The Home for the Blind, 550 Washington avenue, Brooklyn, N. Y. The blind are also cared for in the New York City Home for the Aged and Infirm. In Boston there is a nursery for blind babies.

Following the introduction of manual training into the schools for the blind has been the establishment of workshops for the blind in several large cities. These are not schools, although the workers are first given instruction in the kind of employment they are to engage in as a means of support. The pioneer institution was that at Hartford, Conn., which has been very successful in providing work for the adult blind. A similar enterprise has been attempted in the city of Washington, and at the present time the Columbia Polytechnic Institute is conducting a successful printing office. Workshops for the blind are now in operation in New York City, Brooklyn, Boston, Chicago, Milwaukee, Portland, Me., and Saginaw, Mich.

In the Congressional Library at Washington there is set apart a large reading room for the blind. About 1,000 volumes in raised letters, or line, and the several point systems are on the shelves accessible to blind readers. Several periodicals in point and line may be found upon the tables. Books are delivered to any part of the city to blind readers. Three afternoons in the week there are public readings and piano recitals for the blind in this reading room. Nearly 200 blind people in the city of Washington take advantage of the opportunities thus offered for their recreation and improvement.

The Census Office published, in 1906, a special report giving revised statistics of the blind and deaf in 1900. The total number of blind in the United States as reported was 64,763. The enumerators at first reported over 100,000 blind, but by correspondence only 64,763 cases were verified. It is believed, however, that a large proportion of the nearly 20,000 persons who failed to return the personal schedules should be included in the total. Of the 64,763, there were 35,645 totally blind and 29,118 partially blind; 37,054 were males and 27,709 females. Of the totally blind, 20,144 were males and 15,501 females; of the partially blind, 16,910 were males and 12,208 females. The number of white persons returned as blind was 56,535, of whom 30,359 were totally blind and 26,176 partially blind. The number of colored blind was 8,228, the totally blind numbering 5,286 and the partially blind 2,942. The colored blind included 7,646 negroes, 568 Indians, and 14 Chinese and Japanese. Of the 64,763 blind, only 4,730 were born blind, while 3,436 became blind before reaching two years of age. The total number of persons who were blind before the age of 20 was 19,814;

between the ages of 20 and 40 years 10,970 became blind; between 40 and 60 years of age 12,491 became blind; from 60 years of age and over 16,804 persons became blind. These numbers do not include several thousand indefinitely reported. The Census report gives tables showing the number of blind by degree and cause of blindness, the marital condition of the blind, the blind by consanguinity of parents, etc. Of the 64,763 blind, 24,556 had at some time attended school, 29,026 had never attended school, while 11,181 were not reported as to school training. Of 62,456 blind over 10 years of age, 12,506 were reported as engaged in remunerative employment. Of the 12,506 employed, 5,273 were in agricultural pursuits, 1,404 in professional service, 1,783 in domestic and personal service, 1,671 in trade and transportation, and 2,375 in manufacturing and mechanical pursuits.

In the special Census report mentioned above the number of deaf mutes in the United States in 1900 was given as 89,287. Of this number, 50,296 were deaf before the age of 20. The report, which was prepared by Alexander Graham Bell, is very elaborate, giving statistics in detail. The causes of deafness are discussed, means of communication explained, school attendance shown, and the numbers in gainful occupations tabulated. Of the 89,287 deaf, 65,717 had at some time attended school, 13,557 had never attended school, and 10,913 did not answer the question as to education. Of the 83,388 deaf over 10 years of age, 32,142 were gainfully employed. This was nearly 39 per cent, as compared with 20 per cent of the blind similarly employed. Of the general population of the United States about one-half are in gainful occupations.

Schools for the blind.—The 40 schools reporting to the Bureau of Education in 1905 employed 505 teachers—175 men and 330 women. There were 166 teachers of music and 150 instructors in industrial departments. In the 40 institutions there were 4,441 pupils—2,401 males and 2,040 females. The number studying vocal music was 2,211; instrumental music, 2,354. There were 447 children in the kindergarten and 3,201 in the industrial departments. The schools had 170 graduates in 1905. The libraries had 125,581 volumes, the value of scientific apparatus was \$115,911, and the value of grounds and buildings \$7,069,993, on which the sum of \$596,898 was expended during the year. For salaries and other expenditures the aggregate was \$1,101,595. These items are given by States in Tables 1, 2, and 3 of this chapter, while the statistics of the schools will be found in detail in Table 4.

Schools for the deaf.—This chapter gives statistics of 136 schools for the deaf—56 State institutions, 64 public day schools, and 16 private day schools—with an aggregate enrollment of 11,952 pupils.

The 56 State institutions report 1,202 teachers—416 men and 786 women—instructing 10,321 pupils—5,662 boys and 4,659 girls. These statistics are given by States in Tables 5 and 6. The number of pupils taught by the purely oral method was 4,320, by the manual method 2,212, and by the combined system 6,489. There were 618 pupils in the kindergartens, and the institutions had 193 graduates. Table 7 shows that the school libraries had 120,527 volumes. The value of scientific apparatus was \$16,230, and the value of grounds and buildings, \$12,658,026. Expenditures on grounds and buildings amounted to \$409,816, the aggregate for salaries and other expenses being \$2,429,120.

In the 64 public day schools for the deaf there were 140 teachers and an enrollment of 1,093 pupils—578 boys and 515 girls. The 16 private day schools had 83 teachers and 538 pupils—256 boys and 282 girls. The statistics of these public and private day schools will be found summarized in Table 8.

Table 9 gives in detail the statistics of State schools for the deaf. Tables 10 and 11 give similar information concerning public and private day schools for the deaf. Table 12 indicates the branches of manual and industrial training taught in the State schools for the deaf.

Schools for the feeble-minded.—Table 13 summarizes the statistics of the 25 State schools and the 15 private schools for the feeble-minded. In the State institutions there were 15,530 pupils—8,266 boys and 7,264 girls—taught by 301 instructors. There were 1,208 assistants caring for the inmates. In the private institutions the enrollment was 710 pupils—417 boys and 293 girls, taught by 78 instructors. The State institutions cost \$2,173,617 for maintenance for the year. Tables 14 and 15 give in detail the statistics of the institutions for the feeble-minded. Table 16 shows the branches of manual and industrial training in the public institutions.

The following paragraphs are from the special report printed in 1906 by the Bureau of the Census on the "Insane and feeble-minded in hospitals and institutions, 1904:"

The primary object of all previous enumerations of the feeble-minded has been to ascertain their numbers in the United States. In the present inquiry this object had to be abandoned, for the act of Congress of March 6, 1902, governing the work of the Bureau of the Census, expressly provided that enumerations of the so-called "special classes," which include the feeble-minded, must be restricted to inmates of institutions. In the case of the insane, and to a considerable extent in the case of paupers this restriction does not wholly prevent an approximate quantitative measurement of the extent to which insanity and pauperism prevail in the country, because a large proportion of each class is found in institutions. But of the feeble-minded relatively few are cared for in institutions of any kind. Of the 95,609 reported as feeble-minded at the census of 1890 only 5,254 were found in special institutions, and but 2,469 in asylums for the insane. The number of feeble-minded in almshouses was not ascertained.

Recent estimates made by competent authorities place the number of feeble-minded in the United States—that is, of persons so pronouncedly feeble-minded as to stand in need of institutional treatment—at not less than 150,000. Yet, on December 31, 1903, the entire population of special public and private institutions for the feeble-minded numbered only 14,347. There were, in addition, 16,551 supposedly feeble-minded persons among the inmates of almshouses.

INDEX.

A.

- A. and M. colleges. *See* Agricultural and mechanical colleges.
- Academies, in China, support of, 264; early, of New York, 145; the New York, 145; number of, in New York, 143; rise of the, 144; statistics of, in New York, 146; uniform organization of French, 59. *See* High schools, private; *also* Secondary schools, private.
- Academy, comparison of, with high school, 147.
- Academy of Inscriptions and Belles-Lettres, 138.
- Act, creating an interior department in Liberia, 119; creating the office of commissioner of education in Liberia, 121; providing for a superintendent of schools in Liberia, 123; providing for common schools in Liberia, 119.
- Administration of schools in America, 20.
- Advantages of close relation between elementary and secondary schools, 29.
- Africa, elementary schools of countries of, statistics of, 233.
- African Methodist schools in Liberia, 127.
- Agencies for art education in the United States, xxx.
- Aggregate days' attendance, in commercial and business schools, 1224; in city schools, 432, 437; in city and village schools, 507; in the United States and in the different States, 496.
- Agricultural and mechanical colleges, changes in course of study of, 673; courses of study offered by, 678-686; income of, 658; organization of, 246; new buildings for, 674; statistics of, 657-708; students in technical courses in, 657; in the United States, xli; value of property of, 658.
- Agricultural and Mechanical College for Negroes (Ala.), forestry course in, 238.
- Agricultural Department, description of, 254; present work of, 254; rise of, 246.
- Agricultural education, the American system of, 244-256; history of, in the United States, 245-246; in the United States, xxxiii.
- Agricultural experiment stations, establishment of, 247; work of, 254-256.
- Agricultural instruction in secondary and primary schools, 251-253.
- Agricultural research, relation of Department of Agriculture and the experiment stations to, 254-256.
- Agriculture, college courses in, 249-251; courses of study, changes of, in agricultural and mechanical colleges, 673; in the schools of France and Belgium, xxi, 87; students in, in colleges for men and for both sexes, 552; students in, in schools of technology, 568; summer schools of, 248; technical courses in, in higher institutions, 573.
- Agronomy, national institute of, in France, 92.
- Alabama, business schools, statistics of, 1230; child-labor law, synopsis of, 187; city and village schools, statistics of, 510; city schools, statistics of, 461, 480, 491, superintendents of, 366; college presidents of, 378, 385, 387; colleges for women, statistics of, 640, 645; colored race, statistics of private secondary and higher schools for, 1310, 1320; of public high schools for, 1302; dental practice, legal requirement for, 716; dental schools, statistics of, 750; high schools, statistics of, private, 1094, public, 869; kindergartens, public, statistics of, 529, 530; law schools, statistics of, 739; manual training, cities in which taught, 1169, statistics of, 1180; medical practice, legal requirements for, 712; medical schools, statistics of, 744; normal schools, private, principals of, 394, statistics of, 806; normal schools, public, principals of, 390, statistics of, 794; normal students in universities and colleges, 778; nurse training schools, statistics of, 1261; pharmacy schools, statistics of, 752; professors of pedagogy in colleges of, 388; reform schools of, 1332; Rhodes scholarship committee, 42; students of public normal schools pursuing certain studies, 786; theological schools, statistics of, 732; universities and colleges for men and for both sexes, statistics of, 578, 598, 616.
- Alabama Polytechnic Institute, forestry course in, 238.
- Alaska, directory of teachers in native schools of, 281; education in, xxxiv; enrollment in public schools for natives, 275-279; expenditure for schools in, 282; Federal appropriation for education in, 281; Federal appropriations for reindeer introduction, 284; medical practice, legal requirements for, 712; reindeer in, xxxv; reindeer in, report on, 283-291; report on education in, 267-282; school buildings, new, 281; school fund for natives of, 281; statistics of public schools of, 275-279; teachers in public schools of, 280.
- Algebra, examination questions for Oxford, 48; proportion of students in, in high schools, private, 848, public, 832; students in, in high schools, private, 842, public, 826.
- Amanuensis course, graduates in, in commercial and business schools, 1224; students in, in commercial and business schools, 1225.
- American Academy, course of study of, 145; description of, 144.
- American bachelor and French bachelier, 100.
- American Bankers' Association, 108.
- American college, does not tie the student to a course, 103.
- American commercial education, 109.
- American elementary schools not infant schools, 25.
- American life, general trend of, 32.
- American (native) boys and girls do not become day laborers, 24.
- American Rhodes scholars in 1904, 49.
- American school, does not solve the question of coordination, 29.
- American school system, inauguration of, in Porto Rico, history of the, 293-344.
- American systems of education, spirit of, 38.
- American universities, attempts at Europeanizing, 103.
- Amos Tuck School, Dartmouth, 100.
- Anderson, Arthur, 18.
- Anxiety to hold attention leads to superficial habits of thought, 24.
- Applied science, instruction in, 13.
- Appointment to Rhodes scholarships, 45.
- Apprentices, in reindeer herding, in Alaska, 287.
- Apprenticeship, commercial, 98.
- Appropriations, educational, in Philippine Islands, 345; Federal, for education of Alaskan natives, 281; Federal, for reindeer introduction, 284; for French schools, 61, 71; for French art schools, 82; to high schools, private, 850; public, 837; for institutions of higher learning, 559; to normal schools, private, 773; for normal schools, public, xlv, for buildings, 763; for maintenance, 762; to Porto Rican schools, 337; to schools of technology, 572; State, to private secondary and higher schools for colored race, 1300; State, to public high schools for colored race, 1296; successive annual, to public normal schools, 764.

- Architecture, naval, technical courses in, in higher institutions, 573; students in, in colleges for men and for both sexes, 552; in schools of technology, 568; technical courses in, in higher institutions, 573.
- Argentina, elementary schools, statistics of, 234.
- Arithmetic, examination questions for Oxford, 47.
- Arizona, agricultural and mechanical college of, legislation affecting, 660; business schools, statistics of, 1230; city and village schools, statistics of, 510; city schools, statistics of, 461, 480, 491, superintendents of, 366; college presidents of, 378; compulsory education law, synopsis of, 157; dental practice, legal requirements for, 717; higher education, State taxation for, 543; high schools, statistics of, private, 1094, public, 871; industrial schools for Indian children, detail statistics of, 1190; medical practice, legal requirements for, 712; normal schools, public, principals of, 390; normal schools, public, statistics of, 795; normal students in universities and colleges, 778; reform schools of, 1332; Rhodes scholarship committee, 43; students of public normal schools pursuing certain studies, 786; universities and colleges for men and for both sexes, statistics of, 578, 598, 616.
- Arkansas, agricultural and mechanical college of, legislation affecting, 660; business schools, statistics of, 1230; child-labor law of, 187; city and village schools, statistics of, 510; city schools, statistics of, 461, 480, 491, superintendents of, 366; college presidents of, 378, 385; colleges for women, statistics of, 640, 645; colored race, statistics of private secondary and higher schools for, 1310, 1320; of public high schools for, 1302; dental practice, legal requirement for, 717; evening schools, statistics of, 502, 503; high schools, statistics of, private, 1094, public, 872; manual training, cities in which taught, 1166; medical practice, legal requirements for, 712; medical schools, statistics of, 744; normal schools, private, principals of, 394, statistics of, 806; normal schools, public, principals of, 390, statistics of, 794; normal students in universities and colleges, 778; professors of pedagogy in colleges of, 388; Rhodes scholarship committee, 43; students of public normal schools pursuing certain studies, 786; universities and colleges for men and for both sexes, statistics of, 578, 598, 616; University of, forestry course in, 238; nurse training schools, statistics of, 1261.
- Armstrong, Henry E., 2, 6, 7, 18, 23, 29, 38.
- Art, organization of committees of award on, at St. Louis Exposition, 182; students in, in colleges for men and for both sexes, 552; in schools of technology, 568; art education, an important factor in industrial development, 155-183; in the city of Cincinnati 171; in Europe, 164; in Germany and France, 176.
- Art and industry, in ancient Rome, 175; the relation to each other, 158.
- Art exhibit, at Centennial Exposition, 180; at Louisiana Purchase Exposition, 179.
- Art institutions devoted to education, classification of, 165.
- Art lectures, for workmen, 164.
- Art museums, aim and scope of, in general education, 159; cooperation of, with the public schools, 163; popularizing the work of, 157.
- Art schools, establishment of, 165.
- Arts and industries, xxvii.
- Arts and Trades School, in Philippine Islands, 352.
- Asia, elementary school of countries of, statistics of, 232-233.
- Assam, elementary schools, statistics of, 232.
- Association of American Agricultural Colleges and Experiment stations, college course of study recommended by, 245.
- Astronomy, proportion of students in, in high schools, private, 848, public, 832; students in, in high schools, private, 843, public, 827.
- Attainment of American schools no higher than in England, 24.
- Attendance, aggregate daily, in commercial and business schools, 1224; in all educational institutions in the United States, significance, ix; average, in Alaskan schools, 278-9; aggregate days, in city schools, 432, 437; average daily, in city and village schools, 507; in common schools, expended per pupil in, 416; in city schools, 432, 437; by decades, in the United States, and in the different States, 405; in Philippines, 355; in Porto Rican schools, 339; compulsory, laws of, 187-92; days of, by each child, for 35 years, in the United States and in the different States, 407; days of, by each pupil enrolled in the United States and in the different States, 406; in higher institutions of the United States, xl; relation of, to enrollment in public schools, 405; severe criticism of, in American schools, 26.
- Attitude of employers in the United States toward technically trained students, 37.
- Australasia, elementary schools in countries of, statistics of, 235.
- Austria, elementary schools, statistics of, 229.
- Austria-Hungary, elementary schools, statistics of, 229.
- Average daily attendance, by decades, in the U. S. and in the different States, 405.
- Ayer, F. W., 107.
- Ayrton, W. E., 18, 33.

B.

- Baptist high schools, statistics of, 832.
- Baptist schools in Liberia, 127.
